Right-click the table of contents and choose Update Field (or press F9) to refresh the page numbers.

1. Introduction

1.1 Purpose

This manual is for the people who administer eBankPlus (eBusiness Plus). It covers only the Administration menu: fees and terminals, transaction profiles, back-office users and roles, customer profiles and channels, online and customer account policies, security questions, billers and corporate customers. Day-to-day operations (cards, approvals, broadcasts, direct debit, reports) are covered in the eBankPlus User Manual.

1.2 Before you start

- You need a back-office user whose role includes the Administration menu items you will use (Administration > Roles & Permissions).
- Sign in on the sign-in page with your username, password and branch. Open Menu and click Administration to expand it.
- Several changes are maker-checker: what you capture here must be approved by a different authorised user under the Approval menu.
- Customer data in the screenshots is blurred.

1.3 How this manual is organised

Chapter 2 groups the administration tasks by what you want to achieve and explains the main life cycles (back-office users, customer profiles, policies). Chapter 3 describes every Administration screen in menu order: menu path, purpose, screenshot, fields, buttons and step-by-step instructions. The appendices give good-practice checklists and an index of the Administration menu.

1.4 Conventions

Convention	Meaning
Menu > Administration > Item	The path to open a screen from the main menu.
Field name *	A required field.
Note	Important information or a rule enforced by the system.
Blurred areas	Customer data hidden in screenshots for privacy.

2. Administration at a glance

The Administration menu has 17 screens. Use this table to find the one you need.

I want to...	Screen (Menu > Administration > ...)
Create, change or disable a back-office user; set limits and roles	User Profile
Unlock a user or clear a stuck logon	Reset User Profile
Create a role and choose the screens it can use	Roles & Permissions
Create eTeller users and their limits	Setup eTeller Profile
Activate or deactivate customers and their channels	Profile Activation
Clear a customer's device binding or security questions	Profile Maintenance
Link a mobile number to an account for USSD	USSD Onboarding
Change bank-wide limits (withdrawals, NIP transfers, hours)	Online Policy
Give one customer a different limit	Customer Account Policy (then Approval > Approve Account Policy)
Maintain the security questions customers choose from	Setup Application Security Questions
Set fees and rates by amount band	Setup Fees
Register a POS or ATM terminal	Terminal Registration
Link accounts to a funds-transfer description and type	Setup Transaction Profile
Add billers and their products for bill payments	Setup Biller, Setup Biller Product
Set up corporate internet-banking customers and their users	Setup Corporate Organization, Setup Corporate User Profile

2.1 Back-office user life cycle

1. Create the roles first (Roles & Permissions): a role ID, description and the menu items and actions it may use.
2. Create the user (User Profile): user ID, full names, permissions (amend, review, approve), data-posting and approval limits, and role memberships. Tellers are set up under Setup eTeller Profile instead.
3. The user signs in with the username, password and branch.
4. If the user is locked out or a logon is stuck, use Reset User Profile and choose the right reset option.
5. When the user leaves or changes job, tick Disable user account on User Profile, or change the roles. Do not reuse user IDs.

2.2 Customer profile life cycle

1. Customers register on the online, mobile or USSD channels; USSD customers can also be onboarded by staff (USSD Onboarding).
2. New self-registrations are activated under eChannels Management > eChannels Activation; existing profiles are activated or deactivated, with their channels, under Profile Activation.

3. When a customer changes phone or forgets security answers, use Profile Maintenance to clear the device binding or security questions (a reason is required).
4. Deactivation always needs a reason, which is kept in the audit log.

2.3 Policies and approvals

- Online Policy holds the bank-wide values and takes effect when saved.
- Customer Account Policy captures a request for one account; it only applies after a second user approves it under Approval > Approve Account Policy.
- Fees (Setup Fees) apply to every transaction in the amount band; check bands do not overlap.

3. Administration

Set-up and maintenance screens for fees, terminals, users, roles, customer profiles, policies, security questions, billers and corporate customers. Usually restricted to administrators.

3.1 Setup Fees

Menu path: Menu > Administration > Setup Fees

Purpose: Sets up the rate and fee charged for each transaction amount range (charge setup).

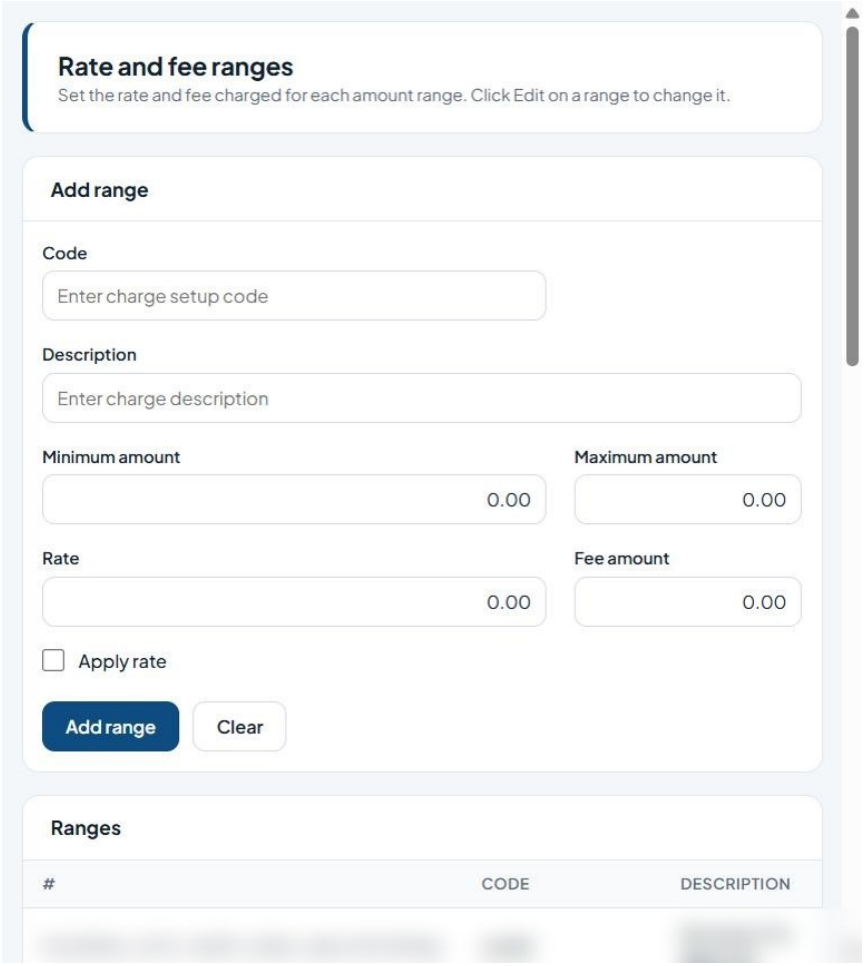

Figure 1: Rate and fee ranges

Fields

Field	Type	Description
Code	Text	Unique code/identifier.
Description	Text	Free-text description.
Minimum amount	Text	Amount in Naira (NGN).
Maximum amount	Text	Amount in Naira (NGN).
Rate	Text	Percentage rate.
Fee amount	Text	Amount in Naira (NGN).
Apply rate	Tick box	Percentage rate.

List columns: #, Code, Description, Minimum amount, Maximum amount, Rate, Fee amount, Apply.

Buttons and actions

Button	What it does
Add range	Save the new fee range.
Clear	Clear the form without saving.

How to use this screen

1. Enter a Code and Description for the charge range.
2. Enter the Minimum amount and Maximum amount the range covers.
3. Enter the Rate and/or the flat Fee amount.
4. Tick Apply rate if the percentage rate should be applied (otherwise the fee amount is used).
5. Click Add range. The range appears in the Ranges list.
6. To change a range, click Edit on its row, update the values and save. Click Clear to empty the form.

3.2 Terminal Registration

Menu path: Menu > Administration > Terminal Registration

Purpose: Registers POS and ATM terminals and links them to a customer account and branch.

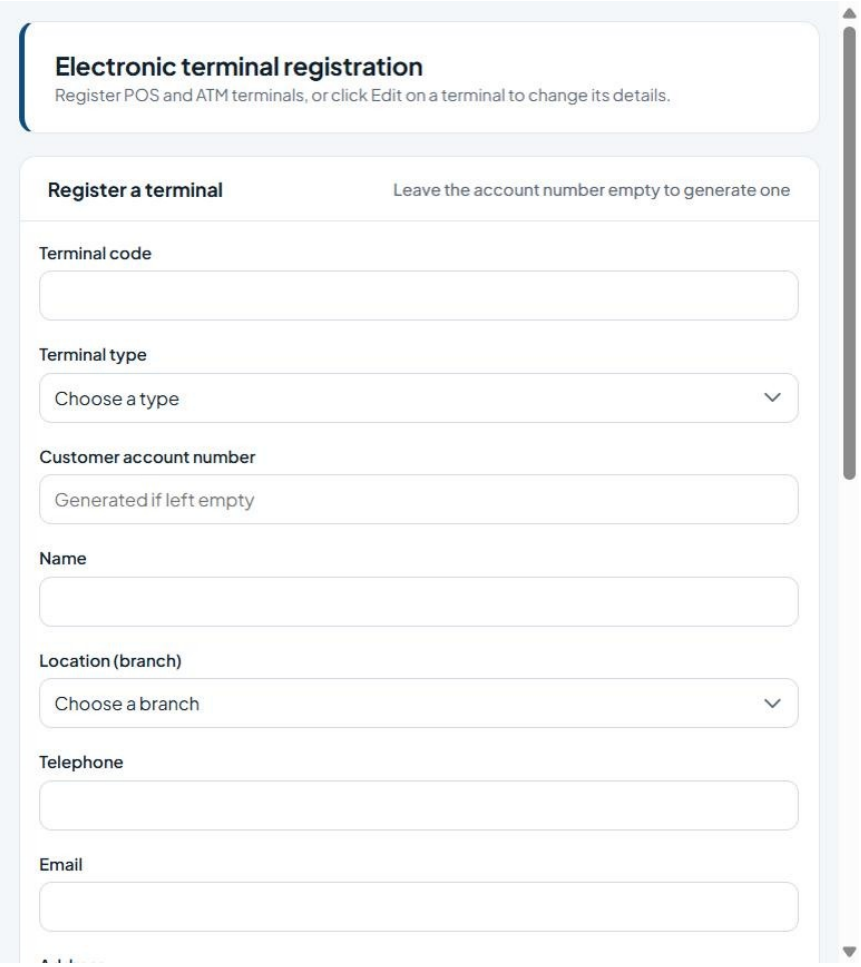

Figure 2: Terminal registration

Fields

Field	Type	Description
Terminal code	Text	Unique code/identifier.
Terminal type	Drop-down list	Choose the type from the list.
Customer account number	Text	The customer account number (validated against the core banking system).
Name	Text	Name to record.
Location (branch)	Drop-down list	The bank branch.
Telephone	Phone number	Contact phone number.
Email	E-mail address	Contact e-mail address.
Address	Text	Enter the address.
Terminal IP	Text	Enter the terminal IP.
Relationship officer	Text	Enter the relationship officer.

List columns: Terminal code, Type, Name, Account no, Balance, Branch, Telephone, Status.

Buttons and actions

Button	What it does
Register terminal	Save the new terminal.
Clear	Clear the form without saving.

How to use this screen

1. Enter the Terminal code and choose the Terminal type (POS or ATM).
2. Enter the Customer account number, or leave it empty to have one generated.
3. Enter the terminal Name and choose the Location (branch).
4. Enter Telephone, Email, Address, Terminal IP and the Relationship officer.
5. Click Register terminal. The terminal appears in the Terminals list.
6. To change a terminal, click Edit on its row.

3.3 Setup Transaction Profile

Menu path: Menu > Administration > Setup Transaction Profile

Purpose: Links accounts to a transaction description and type (Credit or Debit) for funds-transfer processing.

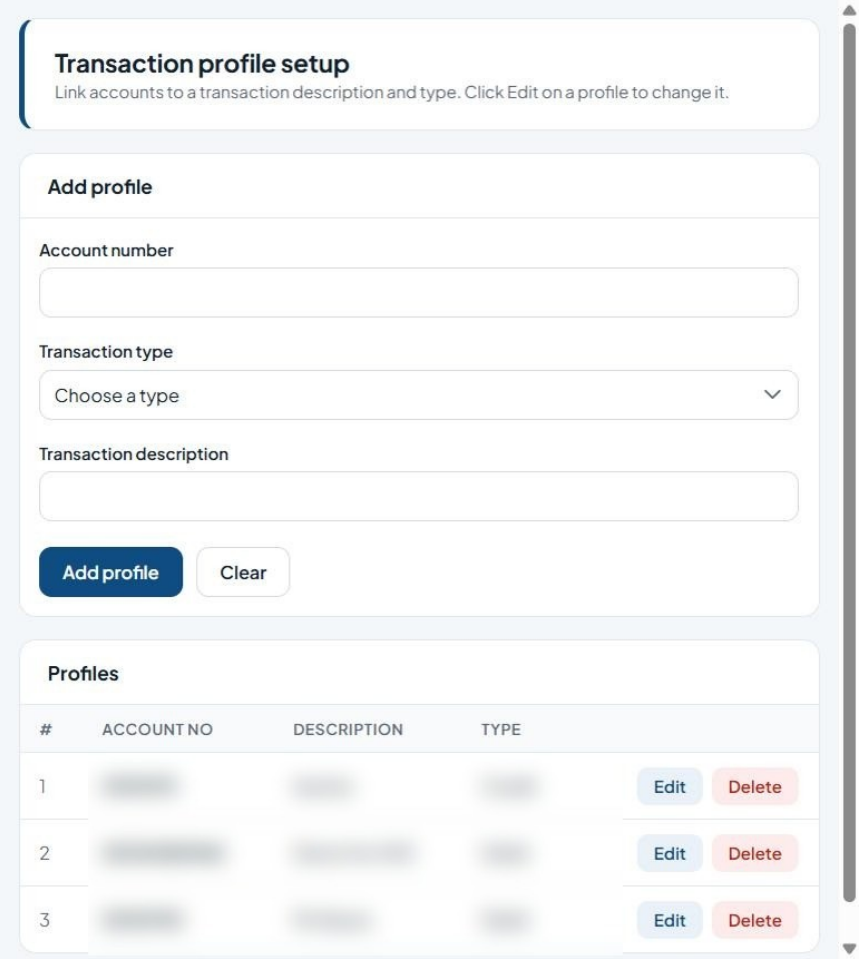

Figure 3: Transaction profile setup

Fields

Field	Type	Description
Account number	Text	The customer account number (validated against the core banking system).
Transaction type	Drop-down list	Choose the type from the list.
Transaction description	Text	Free-text description.

List columns: #, Account no, Description, Type.

Buttons and actions

Button	What it does
Add profile	Save the new transaction profile.
Clear	Clear the form without saving.
Edit	Edit the row.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the Account number.
2. Choose the Transaction type (Credit or Debit).

3. Enter the Transaction description.
4. Click Add profile.
5. Use Edit or Delete on a row in the Profiles list to change or remove a profile.

3.4 USSD Onboarding

Menu path: Menu > Administration > USSD Onboarding

Purpose: Creates, updates or deletes a customer's USSD profile by linking a mobile number (MSISDN) to an account.

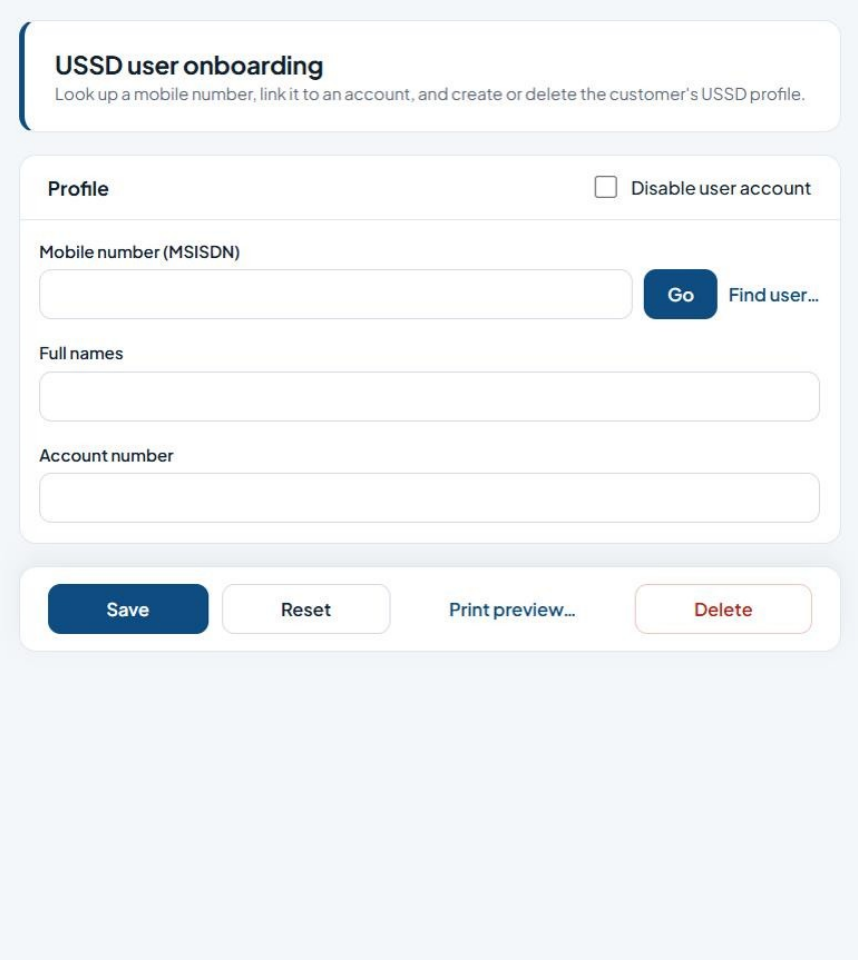

Figure 4: USSD user onboarding

Fields

Field	Type	Description
Disable user account	Tick box	Tick to block the account from signing in.
Mobile number (MSISDN)	Text	Customer's mobile number in international format.
Full names	Text	The person's full name.
Account number	Text	The customer account number (validated against the core banking system).

Buttons and actions

Button	What it does
Go	Load the record for the ID entered.
Find user…	Search for a user.
Save	Save the changes.
Reset	Clear the form, or apply the chosen reset to the ticked users.
Print preview…	Preview a printable copy.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the customer's Mobile number (MSISDN) and click Go, or click Find user… to search.
2. Check or enter the Full names and Account number.
3. Tick Disable user account only if the USSD profile should be blocked.
4. Click Save to create or update the profile.
5. Use Delete to remove the profile, Reset to clear the form, or Print preview… to print it.

3.5 Profile Maintenance

Menu path: Menu > Administration > Profile Maintenance

Purpose: Maintains existing customer (internet/mobile/USSD) profiles: clears device bindings or security questions and sets eToken and channel options.

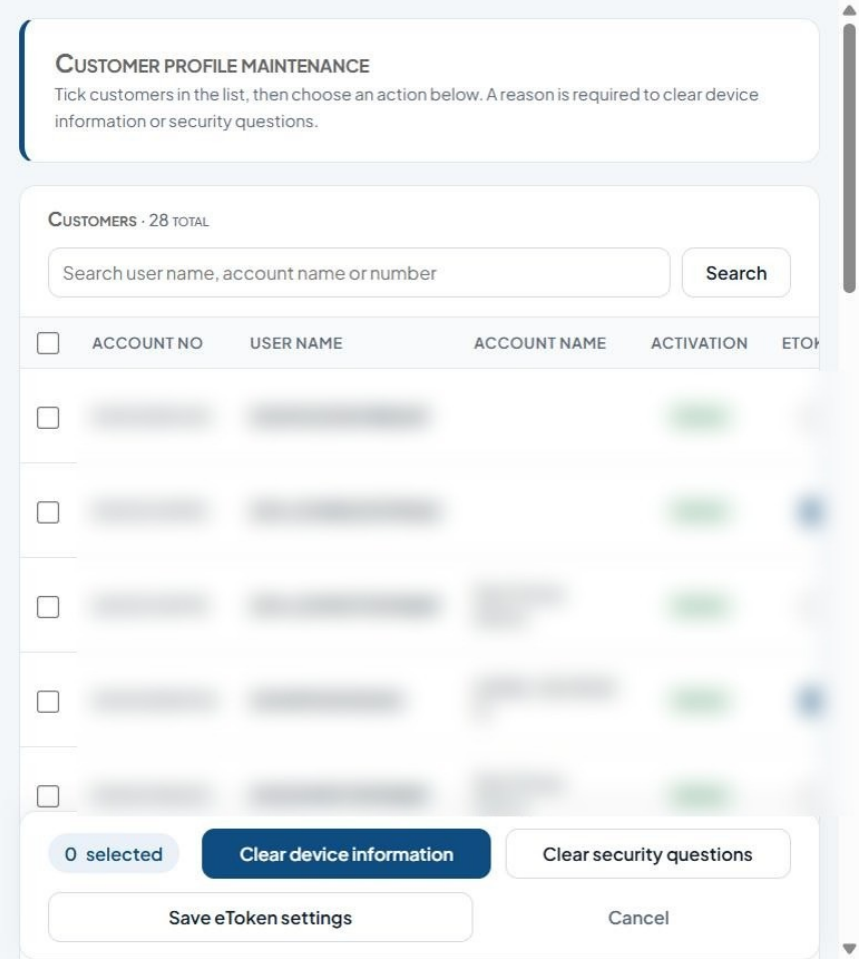

Figure 5: Customer profile maintenance

Fields

Field	Type	Description
Search user name, account name or number	Text	Text to search for.
Select (per customer)	Tick box	Tick to include the row(s) in the next action.
eToken / Mobile / iPortal / USSD (per customer)	Tick box	Tick to enable.
Reason (to deactivate or clear questions)	Multi-line text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

List columns: Account no, User name, Account name, Activation, Etoken, Registration phone, Registration address, Mobile, Iportal, Ussd, Reason.

Buttons and actions

Button	What it does
Search	Run the search.
Clear device information	Unbind the ticked customers' registered devices (reason required).
Clear security questions	Make the ticked customers set new security questions (reason required).

Button	What it does
Save eToken settings	Save the eToken and channel tick boxes for the listed customers.
Cancel	Discard and clear the selection.

How to use this screen

1. Type a user name, account name or account number and click Search.
2. Tick the customer(s) to work on.
3. Enter a Reason in the row. A reason is required to clear device information or security questions.
4. Click Clear device information to unbind the customer's device, or Clear security questions to make them set new ones.
5. Tick or untick eToken, Mobile, iPortal and USSD for each customer and click Save eToken settings to save channel settings.
6. Click Cancel to discard.

3.6 User Profile

Menu path: Menu > Administration > User Profile

Purpose: Creates and maintains back-office user accounts: permissions, data-posting limits, approval limits and role memberships.

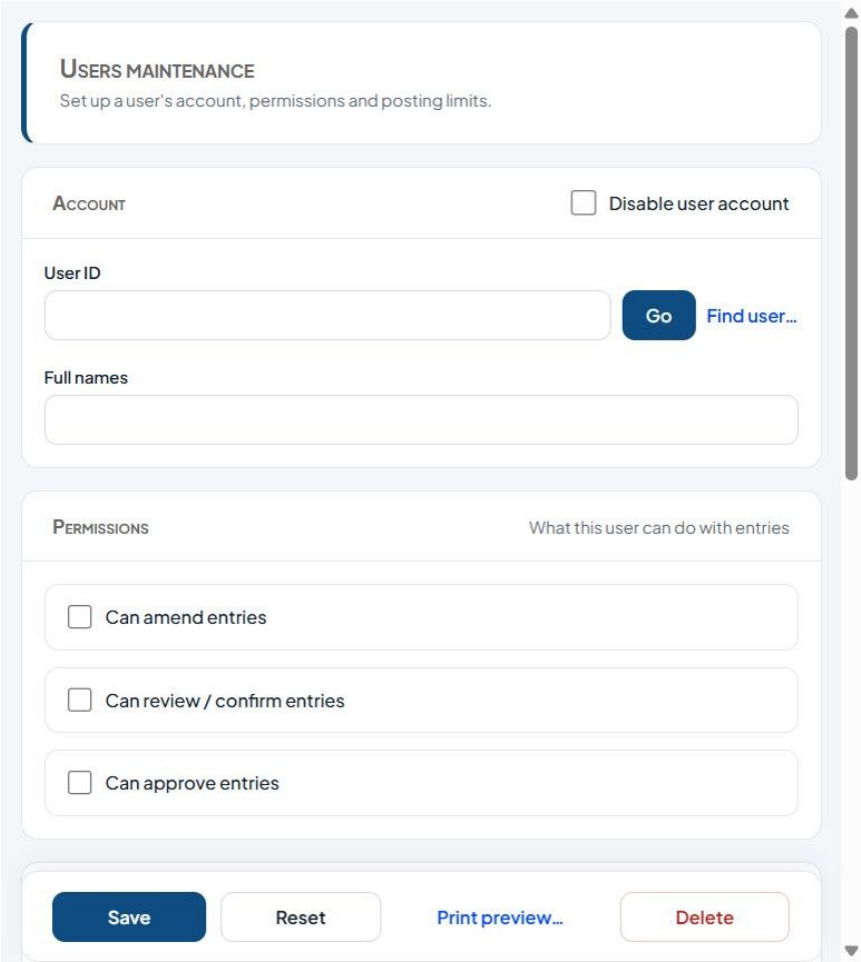

Figure 6: Users maintenance

Fields

Field	Type	Description
Disable user account	Tick box	Tick to block the account from signing in.
User ID	Text	The user's login ID. Click Go to load an existing user.
Full names	Text	The person's full name.
Can amend entries	Tick box	Permission granted to the user.
Can review / confirm entries	Tick box	Permission granted to the user.
Can approve entries	Tick box	Permission granted to the user.
Data posting limits - Cash receipts / Cash payments / Non-cash payments (minimum, maximum, ceiling)	Text	Amount limits per transaction category.
Posting approval limits - Cash receipts / Cash payments / Non-cash payments (minimum, maximum)	Text	Amount limits per transaction category.

Buttons and actions

Button	What it does
Go	Load the record for the ID entered.
Find user…	Search for a user.
Save	Save the changes.
Reset	Clear the form, or apply the chosen reset to the ticked users.
Print preview…	Preview a printable copy.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the User ID and click Go, or click Find user… to search.
2. Enter or check the Full names. Tick Disable user account to block the user.
3. Under Permissions, tick what the user may do: amend, review/confirm, or approve entries.
4. Under Data posting limits, enter the minimum, maximum and ceiling amounts for cash receipts, cash payments and non-cash payments.
5. Under Posting approval limits, enter the minimum and maximum approval amounts.
6. Under Memberships, assign the user's role(s).
7. Click Save. Use Reset to clear, Delete to remove the user, or Print preview… to print.

3.7 Profile Activation

Menu path: Menu > Administration > Profile Activation

Purpose: Activates or deactivates customer profiles and sets the channels (eToken, Mobile, iPortal, USSD) each customer can use.

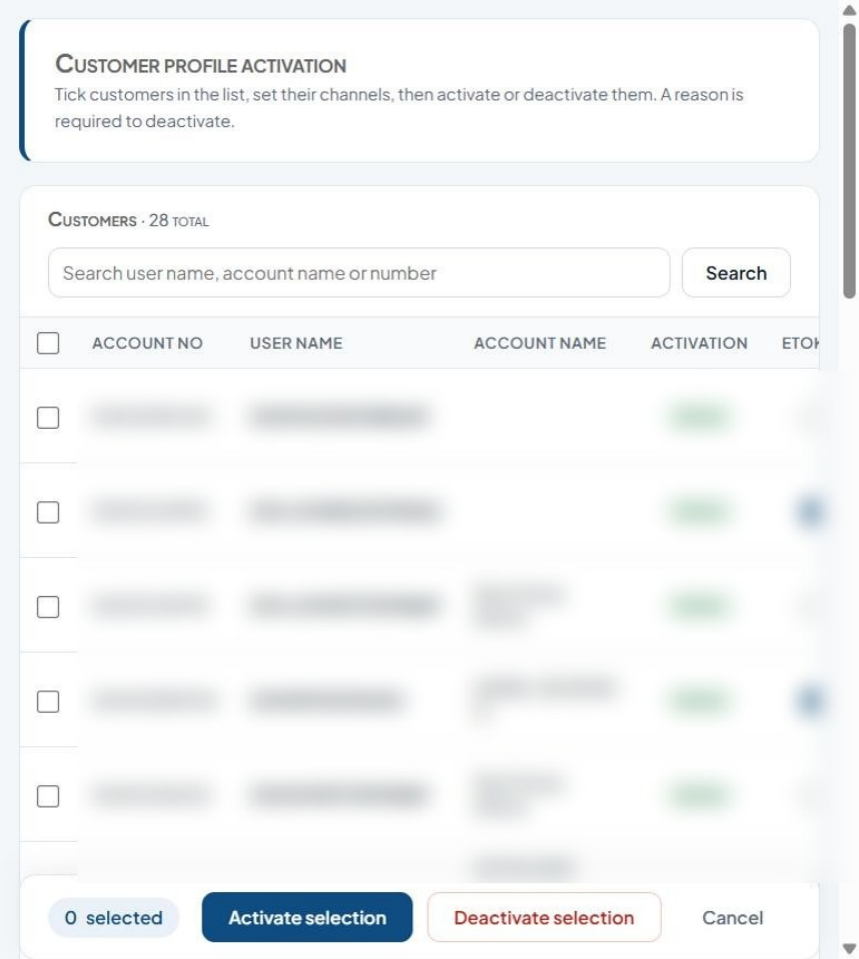

Figure 7: Customer profile activation

Fields

Field	Type	Description
Search user name, account name or number	Text	Text to search for.
Select (per customer)	Tick box	Tick to include the row(s) in the next action.
Active / eToken / Mobile / iPortal / USSD (per customer)	Tick box	Tick to enable.
Reason (required to deactivate)	Multi-line text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

List columns: Account no, User name, Account name, Activation, Etoken, Registration phone, Registration address, Mobile, Iportal, Ussd, Reason.

Buttons and actions

Button	What it does
Search	Run the search.
Activate selection	Activate the ticked items.
Deactivate selection	Deactivate the ticked customers (reason required).
Cancel	Discard and clear the selection.

How to use this screen

1. Search by user name, account name or number.
2. Tick the customer(s) and set their channel tick boxes.
3. Click Activate selection to activate them.
4. To deactivate, enter a Reason on each row (required) and click Deactivate selection.
5. Click Cancel to discard.

3.8 Online Policy

Menu path: Menu > Administration > Online Policy

Purpose: Bank-wide (general) online policies, such as the maximum withdrawal per week, non-working hours per day, and NIP local and inter-bank transfer limits.

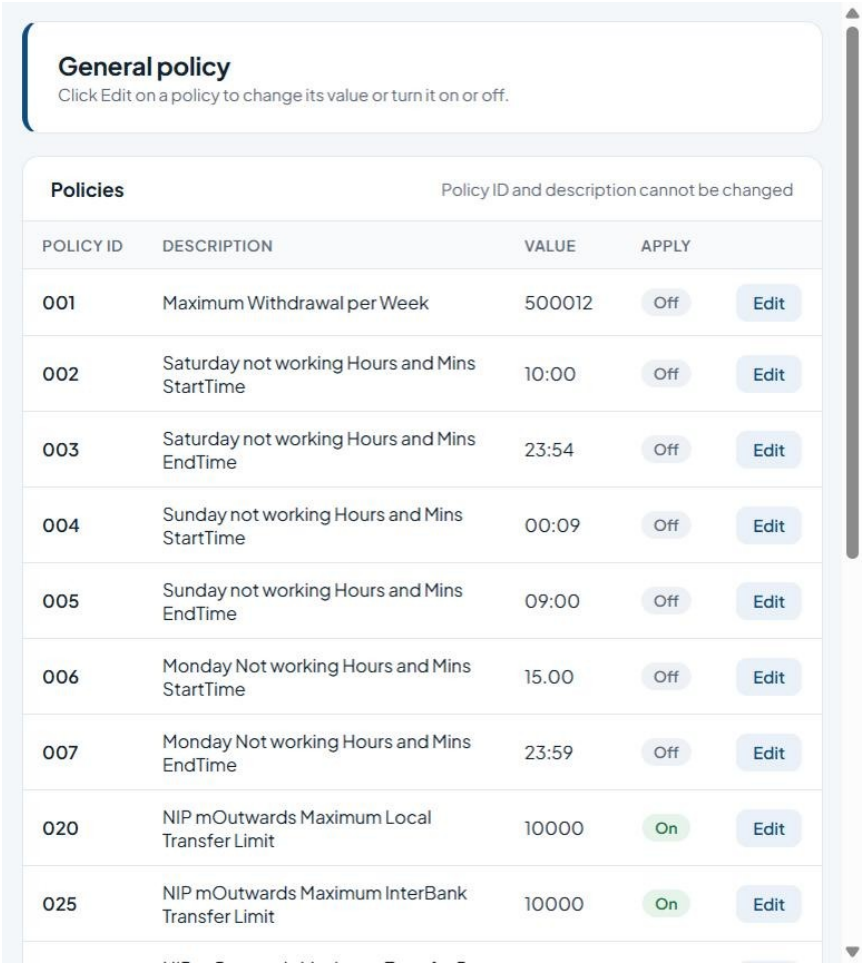

Figure 8: General policy

List columns: Policy id, Description, Value, Apply.

Buttons and actions

Button	What it does
Edit	Edit the row.

How to use this screen

1. Find the policy in the Policies list (Policy ID, Description, Value, Apply).

2. Click Edit on its row.
3. Change the Value and/or switch Apply on or off. Policy ID and description cannot be changed.
4. Save the change.

Note: Policy ID and description cannot be changed; click Edit to change a policy's value or turn it on/off (e.g. weekly withdrawal limit, non-working hours, NIP transfer limits).

3.9 Customer Account Policy

Menu path: Menu > Administration > Customer Account Policy

Purpose: Requests a customer-specific policy (for example a higher transfer limit) for an account. Requests go for approval under Approval > Approve Account Policy.

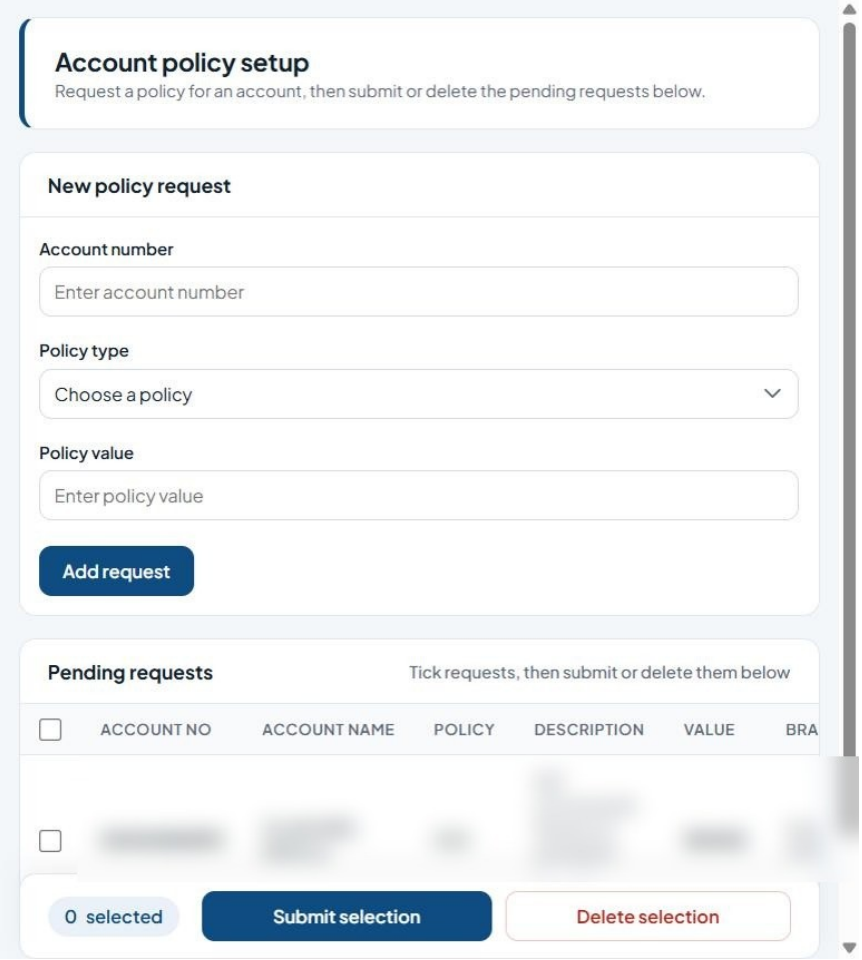

Figure 9: Account policy setup

Fields

Field	Type	Description
Account number	Text	The customer account number (validated against the core banking system).
Policy type	Drop-down list	The policy to apply.
Policy value	Text	The value for the policy (e.g. limit amount).
Select (per request)	Tick box	Tick to include the row(s) in the next action.

List columns: Account no, Account name, Policy, Description, Value, Branch, Requested.

Buttons and actions

Button	What it does
Add request	Add the request to the pending list.
Submit selection	Send the ticked items for approval.
Delete selection	Remove the ticked items.

How to use this screen

1. Enter the Account number.
2. Choose the Policy type and enter the Policy value.
3. Click Add request. It appears under Pending requests.
4. Tick the requests to send and click Submit selection to send them for approval, or Delete selection to remove them.

3.10 Roles & Permissions

Menu path: Menu > Administration > Roles & Permissions

Purpose: Creates and maintains user roles and the screens/actions each role is allowed to use.

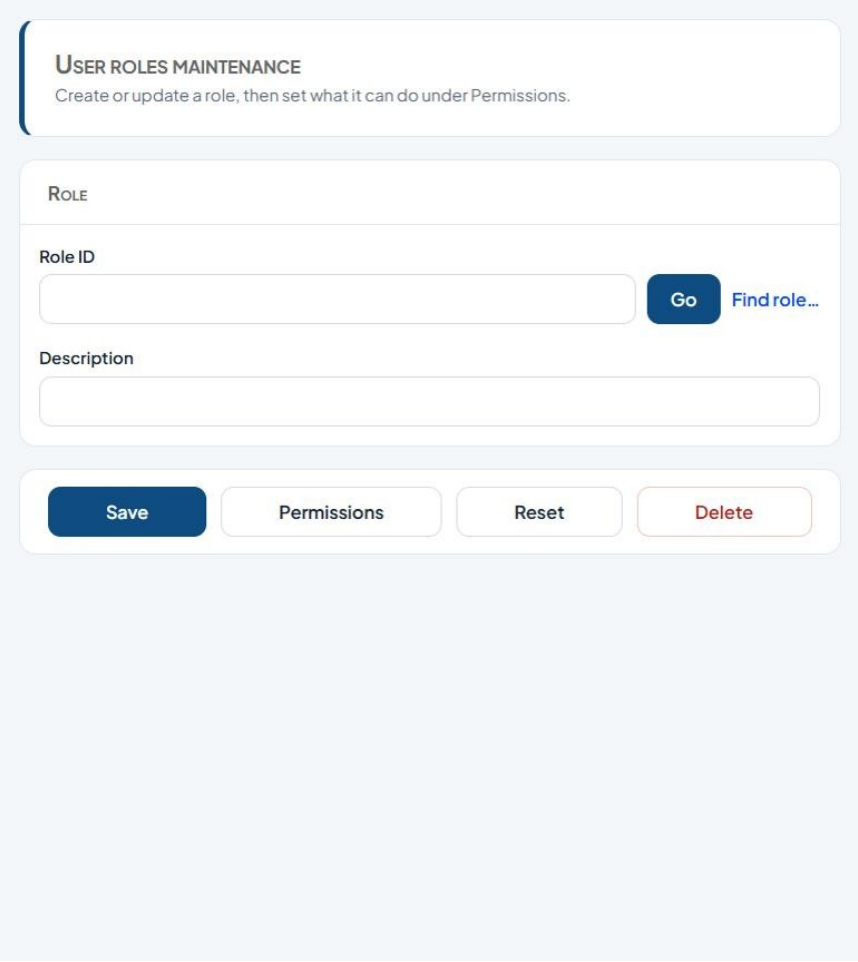

Figure 10: User roles maintenance

Fields

Field	Type	Description
Role ID	Text	Enter the role ID.
Description	Text	Free-text description.

Buttons and actions

Button	What it does
Go	Load the record for the ID entered.
Find role…	Search for a role.
Save	Save the changes.
Permissions	Set what the role can access.
Reset	Clear the form, or apply the chosen reset to the ticked users.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter a Role ID and click Go, or use Find role… to search.
2. Enter the Description.
3. Click Save.
4. Click Permissions to choose the menu items and actions the role can access, then save.
5. Use Delete to remove a role or Reset to clear the form.

3.11 Reset User Profile

Menu path: Menu > Administration > Reset User Profile

Purpose: Resets locked or disabled back-office users and clears logon problems.

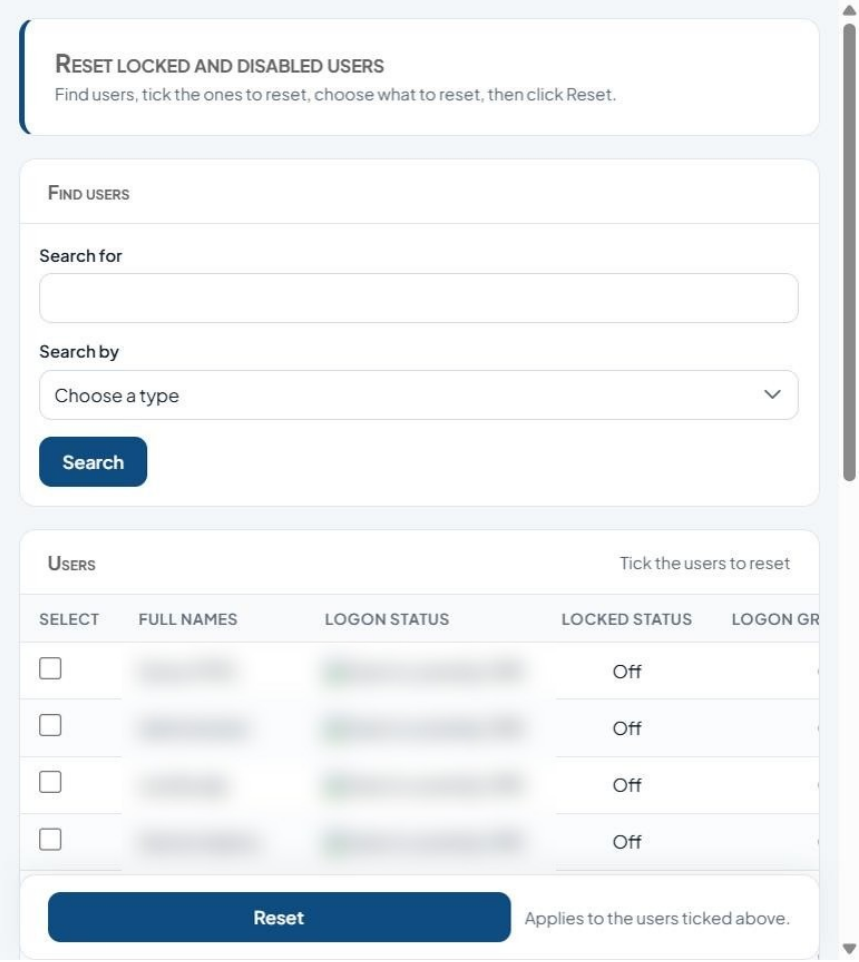

Figure 11: Reset locked and disabled users

Fields

Field	Type	Description
Search for	Text	Text to search for.
Search by	Drop-down list	Text to search for.
Select (per user)	Tick box	Tick to include the row(s) in the next action.
Reset locked users only	Tick box	Tick to enable.
Clear user from logon log	Tick box	Tick to enable.
Reset locked and disabled users	Tick box	Tick to enable.
Reset all	Tick box	Tick to enable.
Reset user's password only	Tick box	Tick to enable.

List columns: Select, Full names, Logon status, Locked status, Logon group.

Buttons and actions

Button	What it does
Search	Run the search.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. Enter a search value in Search for and choose Search by, then click Search.
2. Tick the user(s) in the Users list.
3. Under What to reset, choose one option: reset locked users only; clear user from logon log; reset locked and disabled users; reset all; or reset the user's password only.
4. Click Reset. The action applies to all ticked users.

3.12 Setup Application Security Questions

Menu path: Menu > Administration > Setup Application Security Questions

Purpose: Maintains the list of security questions customers choose from when they set up their profile.

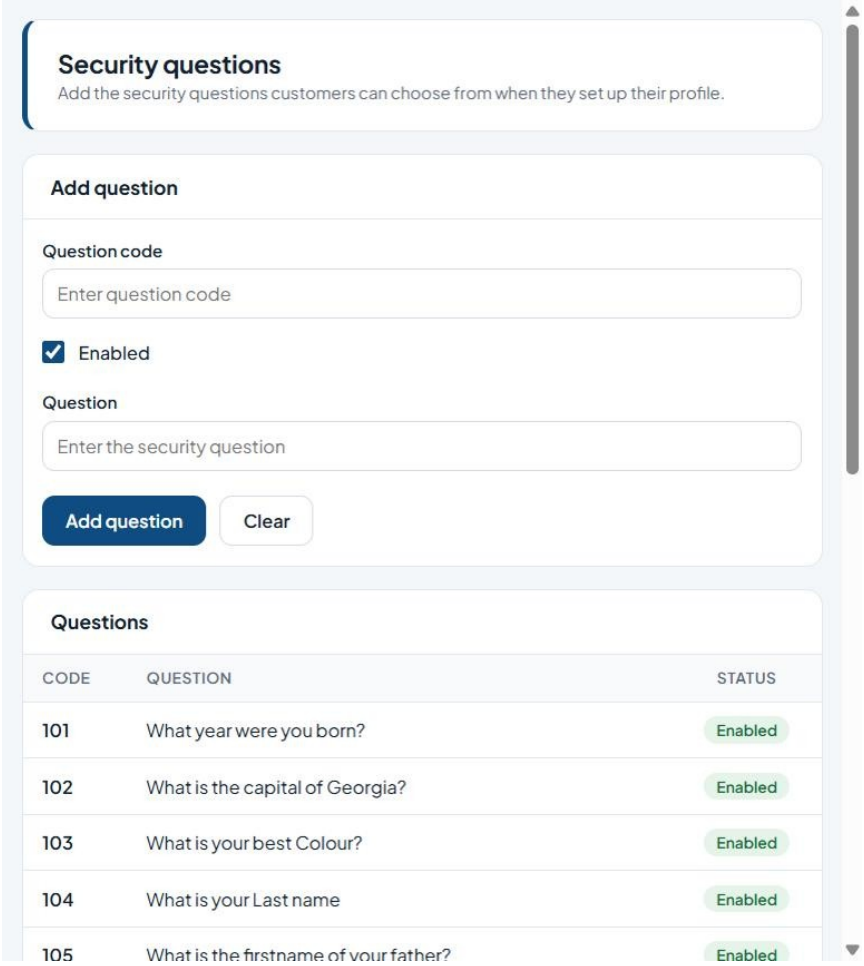

Figure 12: Security questions

Fields

Field	Type	Description
Question code	Text	Unique code/identifier.
Enabled	Tick box	Tick to enable.
Question	Text	Enter the question.

List columns: Code, Question, Status.

Buttons and actions

Button	What it does
Add question	Save the new security question.
Clear	Clear the form without saving.

How to use this screen

1. Enter a Question code.
2. Type the Question.
3. Leave Enabled ticked so customers can choose it.
4. Click Add question. It appears in the Questions list with its status.

3.13 Setup Biller

Menu path: Menu > Administration > Setup Biller

Purpose: Sets up billers (for example airtime, data, utilities) within a biller category for bill payments.

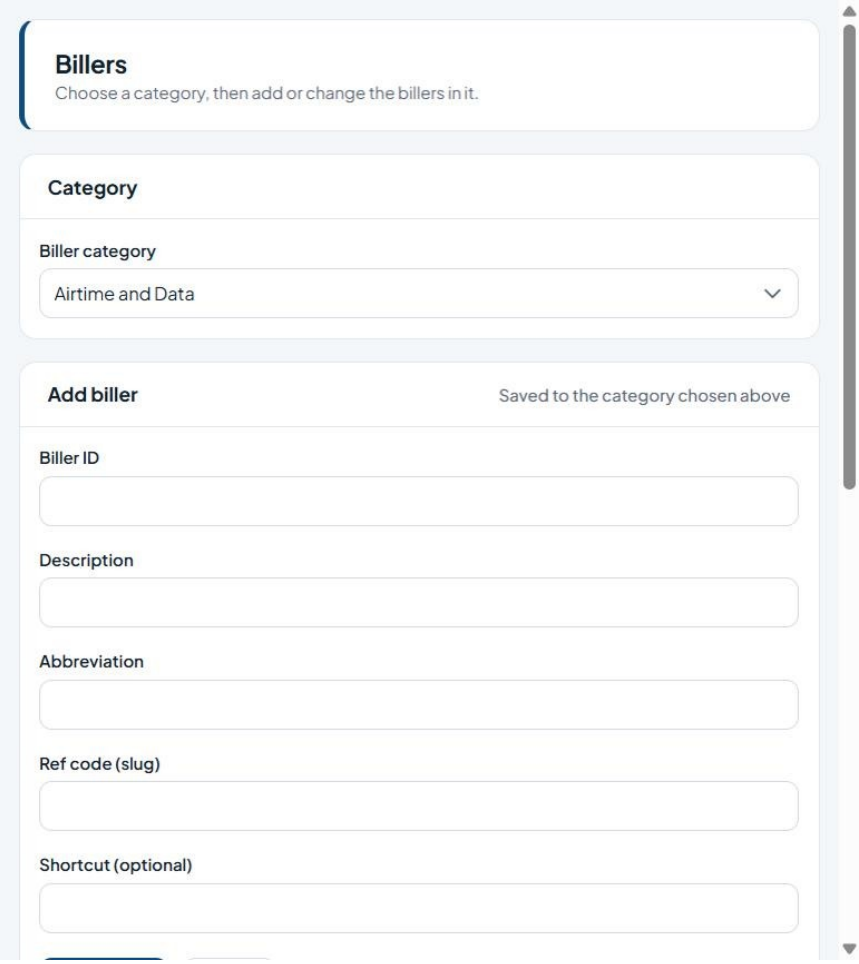

Figure 13: Billers

Fields

Field	Type	Description
Biller category	Drop-down list	Choose a value from the list.

Field	Type	Description
Biller ID	Text	Enter the biller ID.
Description	Text	Free-text description.
Abbreviation	Text	Enter the abbreviation.
Ref code (slug)	Text	Enter the ref code (slug).
Shortcut (optional)	Text	Enter the shortcut (optional).

List columns: Biller id, Description, Abbreviation, Ref code, Category, Shortcut.

Buttons and actions

Button	What it does
Add biller	Save the new biller.
Clear	Clear the form without saving.

How to use this screen

1. Choose the Biller category.
2. Enter Biller ID, Description, Abbreviation, Ref code (slug) and, optionally, a Shortcut.
3. Click Add biller. The biller is saved to the chosen category and appears under Billers in this category.
4. Click Clear to empty the form.

3.14 Setup Biller Product

Menu path: Menu > Administration > Setup Biller Product

Purpose: Maintains the products (packages and price plans) offered by each biller.

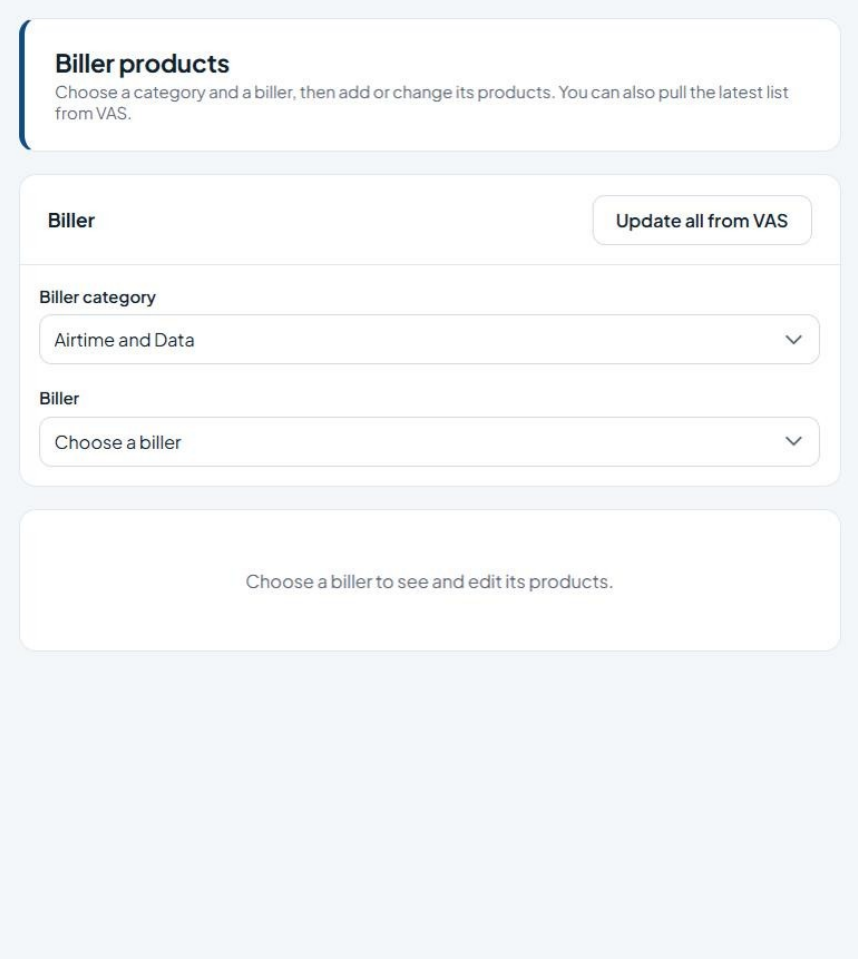

Figure 14: Biller products

Fields

Field	Type	Description
Biller category	Drop-down list	Choose a value from the list.
Biller	Drop-down list	Choose a value from the list.

Buttons and actions

Button	What it does
Update all from VAS	Download the latest products for all billers from the VAS provider.

How to use this screen

1. Choose the Biller category, then the Biller.
2. The biller's products are listed. Add or edit them as needed.
3. Click Update all from VAS to pull the latest product list from the VAS provider.

> **Note:** Choose a category and a biller to see and edit its products; Update all from VAS pulls the latest product list.

3.15 Setup Corporate Organization

Menu path: Menu > Administration > Setup Corporate Organization

Purpose: Sets up corporate organisations (corporate internet-banking customers) and their main account.

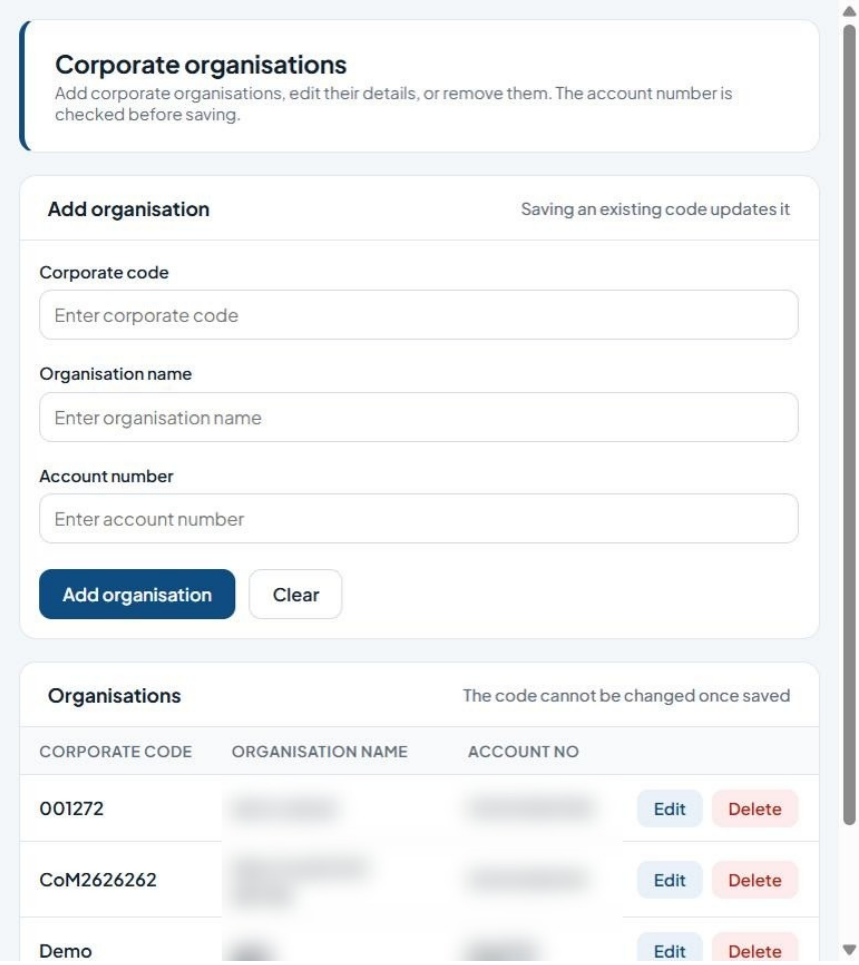

Figure 15: Corporate organisations

Fields

Field	Type	Description
Corporate code	Text	Unique code/identifier.
Organisation name	Text	Name to record.
Account number	Text	The customer account number (validated against the core banking system).

List columns: Corporate code, Organisation name, Account no.

Buttons and actions

Button	What it does
Add organisation	Save the organisation (updates it if the code exists).
Clear	Clear the form without saving.
Edit	Edit the row.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the Corporate code, Organisation name and Account number.
2. Click Add organisation. The account number is checked before saving.
3. Saving an existing code updates that organisation. The code cannot be changed once saved.
4. Use Edit or Delete on a row in the Organisations list.

> **Note:** The account number is checked before saving. Saving an existing code updates it; the code cannot be changed once saved.

3.16 Setup Corporate User Profile

Menu path: Menu > Administration > Setup Corporate User Profile

Purpose: Creates and maintains users for corporate organisations, with their posting and approval rights.

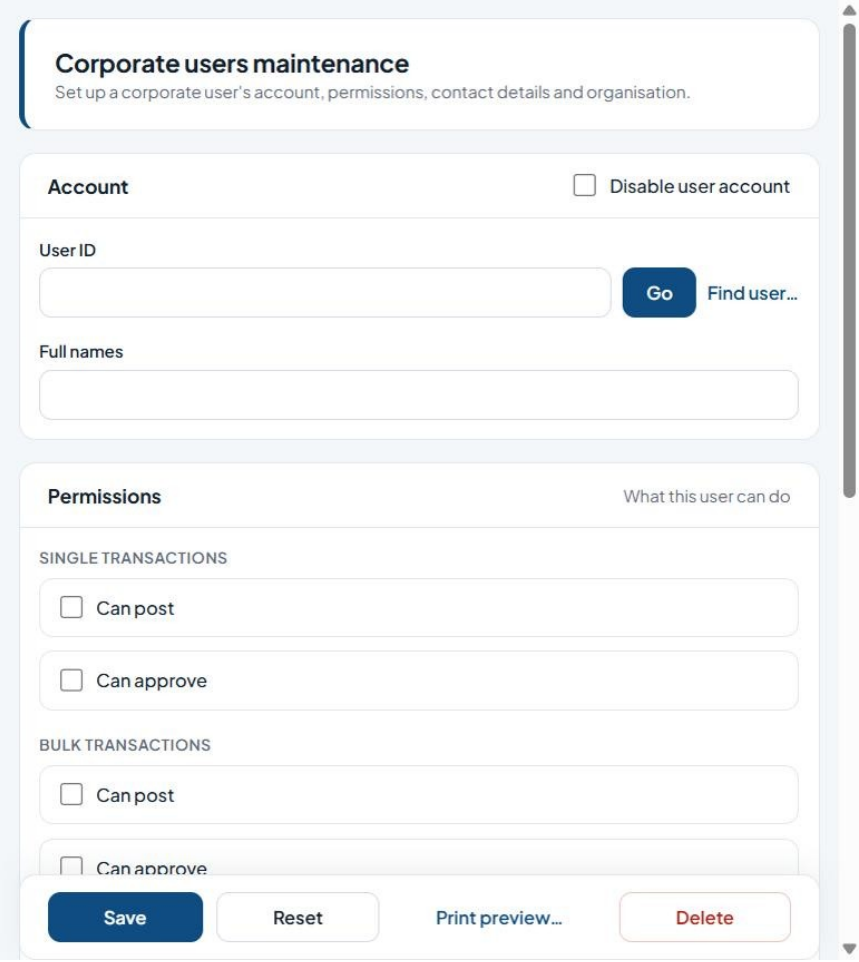

Figure 16: Corporate users maintenance

Fields

Field	Type	Description
Disable user account	Tick box	Tick to block the account from signing in.
User ID	Text	The user's login ID. Click Go to load an existing user.
Full names	Text	The person's full name.

Field	Type	Description
Single transactions - Can post / Can approve	Tick box	Tick to enable.
Bulk transactions - Can post / Can approve	Tick box	Tick to enable.
Can view balance	Tick box	Permission granted to the user.
Is approving officer	Tick box	Permission granted to the user.
Can view status	Tick box	Permission granted to the user.
Contact phone number	Phone number	Contact phone number.
Contact email	E-mail address	Contact e-mail address.
Organisation name	Drop-down list	Name to record.

Buttons and actions

Button	What it does
Go	Load the record for the ID entered.
Find user…	Search for a user.
Save	Save the changes.
Reset	Clear the form, or apply the chosen reset to the ticked users.
Print preview…	Preview a printable copy.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the User ID and click Go (or Find user…). Enter the Full names.
2. Under Permissions, tick Can post / Can approve for single and bulk transactions, plus Can view balance, Is approving officer and Can view status as needed.
3. Enter the Contact phone number and email and choose the Organisation name.
4. Assign memberships and click Save.

3.17 Setup eTeller Profile

Menu path: Menu > Administration > Setup eTeller Profile

Purpose: Creates and maintains eTeller users: their teller account, permissions and posting/approval limits.

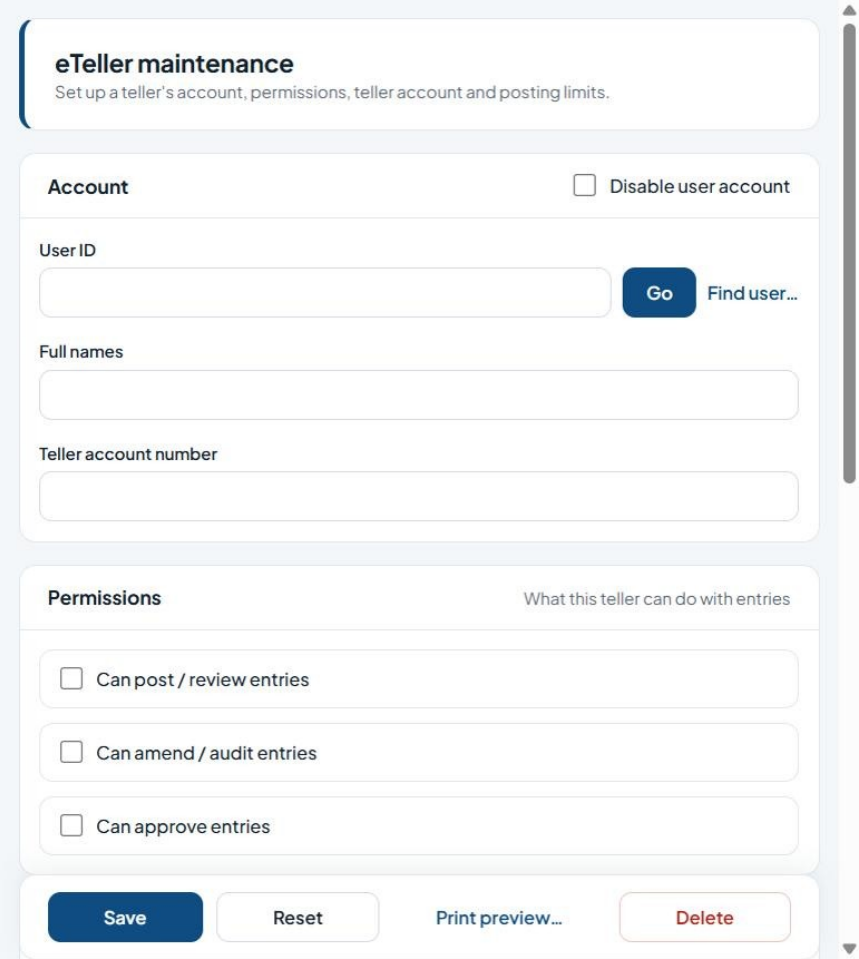

Figure 17: eTeller maintenance

Fields

Field	Type	Description
Disable user account	Tick box	Tick to block the account from signing in.
User ID	Text	The user's login ID. Click Go to load an existing user.
Full names	Text	The person's full name.
Teller account number	Text	Enter the teller account number.
Can post / review entries	Tick box	Permission granted to the user.
Can amend / audit entries	Tick box	Permission granted to the user.
Can approve entries	Tick box	Permission granted to the user.
Data posting limits - Cash receipts / Cash payments / Non-cash payments (minimum, maximum, ceiling)	Text	Amount limits per transaction category.
Posting approval limits - Cash receipts / Cash payments / Non-cash payments (minimum, maximum)	Text	Amount limits per transaction category.

Buttons and actions

Button	What it does
Go	Load the record for the ID entered.
Find user…	Search for a user.
Save	Save the changes.
Reset	Clear the form, or apply the chosen reset to the ticked users.
Print preview…	Preview a printable copy.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the User ID and click Go (or Find user…). Enter the Full names and Teller account number.
2. Tick permissions: post/review, amend/audit, approve entries.
3. Enter the data posting limits and posting approval limits.
4. Assign memberships and click Save.

Appendix A. Good practice for administrators

A.1 Users and roles

- Give each person their own user ID; never share IDs.
- Grant the smallest set of roles a person needs; review role memberships regularly.
- The person who captures a change (maker) must not be the one who approves it (checker). Do not give one user both permissions for the same work.
- Set approval limits deliberately; a zero limit means the user cannot approve that category.
- Disable users promptly when they leave.

A.2 Customer profiles and policies

- Always enter a clear reason when deactivating a customer or clearing devices or security questions; the reason is audited.
- Confirm the customer's identity before clearing a device binding.
- Check bank-wide policy changes with operations before saving; they affect every customer at once.

A.3 Audit

- Back-office user activity: Reports > User AuditLog Reports.
- Customer activity: Reports > Customer AuditLog Reports.
- Activity by users not yet profiled: Reports > Unprofiled User AuditLog Reports.

Appendix B. Administration menu index

Appendix C. About this edition

- Screenshots were taken from the application running locally on branch ebizWorkingBr (http://localhost:8080), signed in as a user with full menu access, in November 2026.
- Customer data is blurred in the screenshots.
- Screens were viewed only: no records were saved, submitted or approved while this manual was prepared.
- For the rest of the application see the eBankPlus User Manual (version 2.0).
