1. Introduction

1.1 Purpose

This manual explains how to use eBankPlus (eBusiness Plus), the bank's back-office web application for managing electronic channels: customer and staff profiles, policies and fees, cards, approvals, bulk notifications, direct debit (NDD), funds transfers, reconciliation and reports.

1.2 Who should use this manual

- Branch and operations staff who raise requests, onboard customers and process cards.
- Supervisors and approvers who authorise requests, payments, mandates and policy changes.
- System administrators who maintain users, roles, policies, fees and billers.

1.3 How this manual is organised

Chapter 2 covers signing in, the dashboard and the menu. Chapter 2 also introduces the new look. Chapters 3 to 13 follow the main menu, one chapter per module. For each screen you will find the menu path, its purpose, a screenshot, the fields and buttons, and step-by-step instructions. The appendices cover common controls, a menu index and notes on this edition.

1.4 Conventions

Convention	Meaning
Menu > Module > Item	The path to open a screen from the main menu.
Bold text	A button, field or menu name as it appears on screen.
Note	Important information or a rule enforced by the system.
Blurred areas	Customer data hidden in screenshots for privacy.

1.5 Maker-checker (approval) workflow

Most changes follow a maker-checker process: one user captures a request (maker) and a different, authorised user approves it (checker) under the Approval menu.

Captured under (maker)	Approved under (checker)
eBranch Management > eChannels Requistion	Approval > Approve eChannels Request
Administration > Customer Account Policy	Approval > Approve Account Policy
eOperations > Bulk FundsTransfer	Approval > Approve Bulk Payments
Card Management > Generate Cards Request	Approval > Approve Card Request
Direct Debit > Create eMandate (NDD)	Approval > Approve NDD e-mandate
Customer KYC uploads / QR merchant registration	Approval > Approve User KYC / Approve QRCode Information

1.6 What changed in this edition

- A new look throughout: the eBusiness Plus top bar (logo, Home, About, your name and Log out), a new home page with shortcut tiles, and a redesigned sign-in page.

- Card Management, Broadcast, Direct Debit (NDD) and the eOperations upload screens were rebuilt. They work the same way as before, but the screens, field names and buttons have changed; the sections for those screens have new screenshots and instructions.
- Lists now have a tick box on every row, a header box that ticks the whole page and, where useful, an option to include every page. A bar at the bottom shows how many rows are ticked, and actions that change or remove data ask you to confirm first.
- Results appear in a green (success) or red (problem) message at the top of the screen; when only some rows succeed, the failed rows are listed with the reason.
- Four statement screens and the external journal upload, which are not on the standard menu, are now documented (sections marked "Not on the menu").

2. Getting Started

How to open eBankPlus, sign in, read the dashboard, use the menu and sign out.

2.1 Sign-in page

Menu path: Open the site address in your browser and click Log In

Purpose: The sign-in page. It has been redesigned for this edition: a single card with Username, Password and a Branch / location list that fills in once your username is recognised.

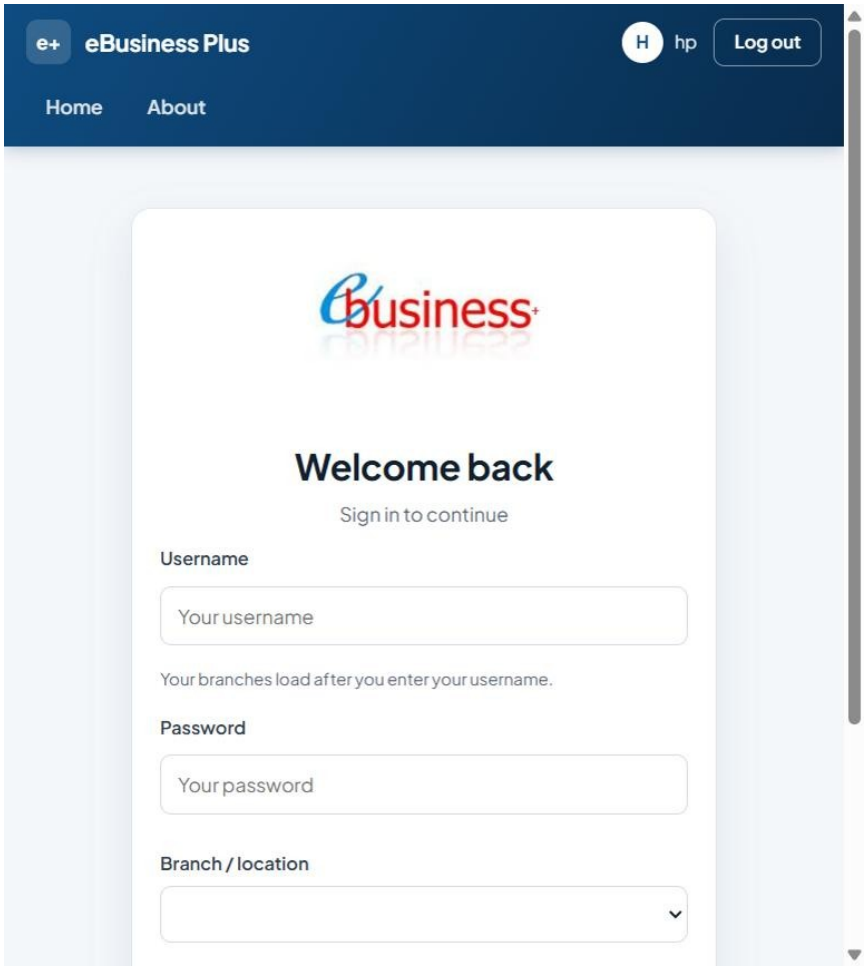

Figure 1: Log In

Fields

Field	Type	Description
Username	Text	Enter the username.
Password	Password	Enter the password.
Branch / location	Drop-down list	The bank branch.
Keep me signed in	Tick box	Tick to enable.

Buttons and actions

Button	What it does
Sign in	Sign in with the username, password and branch entered.

How to use this screen

1. Open the eBankPlus address in your browser and click Log In (or go straight to Account/Auth.aspx).
2. Enter your Username. Your branches load into Branch / location after you leave the field.
3. Enter your Password.
4. Choose the Branch / location you are working from.
5. Tick Keep me signed in only on a computer you alone use.
6. Click Sign in. You are taken to your dashboard.

2.2 Home page

Menu path: Click Home in the top bar

Purpose: The home page, in the new eBusiness Plus theme. The top bar carries the e+ logo, the Home and About links, your initials and user name, and Log out. The page greets you by name and shows shortcut tiles (Card requests, Direct debit (NDD), Approvals and more).

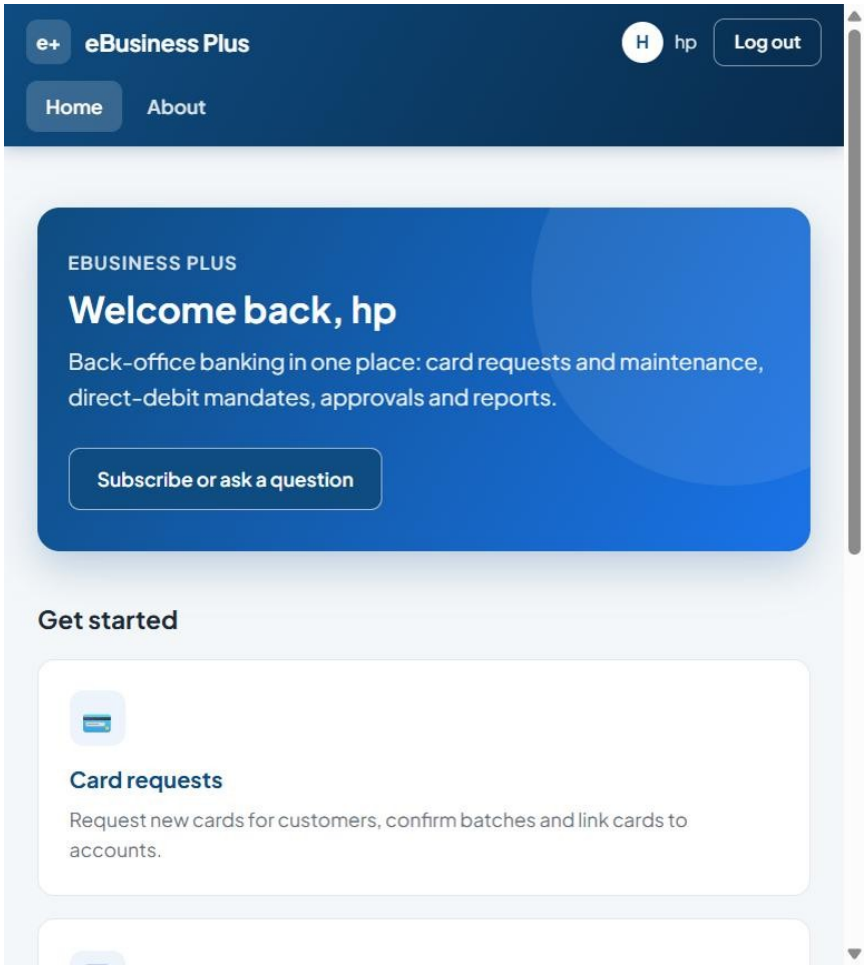

Figure 2: Home - eBusiness Plus

Buttons and actions

Button	What it does
Subscribe or ask a question	Open an e-mail to the support team.
Log out	Sign out of eBankPlus.

How to use this screen

1. Click a tile under Get started to go to that area.
2. Click Subscribe or ask a question to e-mail the support team.
3. Click Log out (top right) when you finish.

2.3 Dashboard (after login)

Menu path: Shown after you sign in

Purpose: Your dashboard after signing in. It greets you, shows who you are signed in as and your branch, the number of requests pending approval, the system date and time, outstanding items and your recent activity.

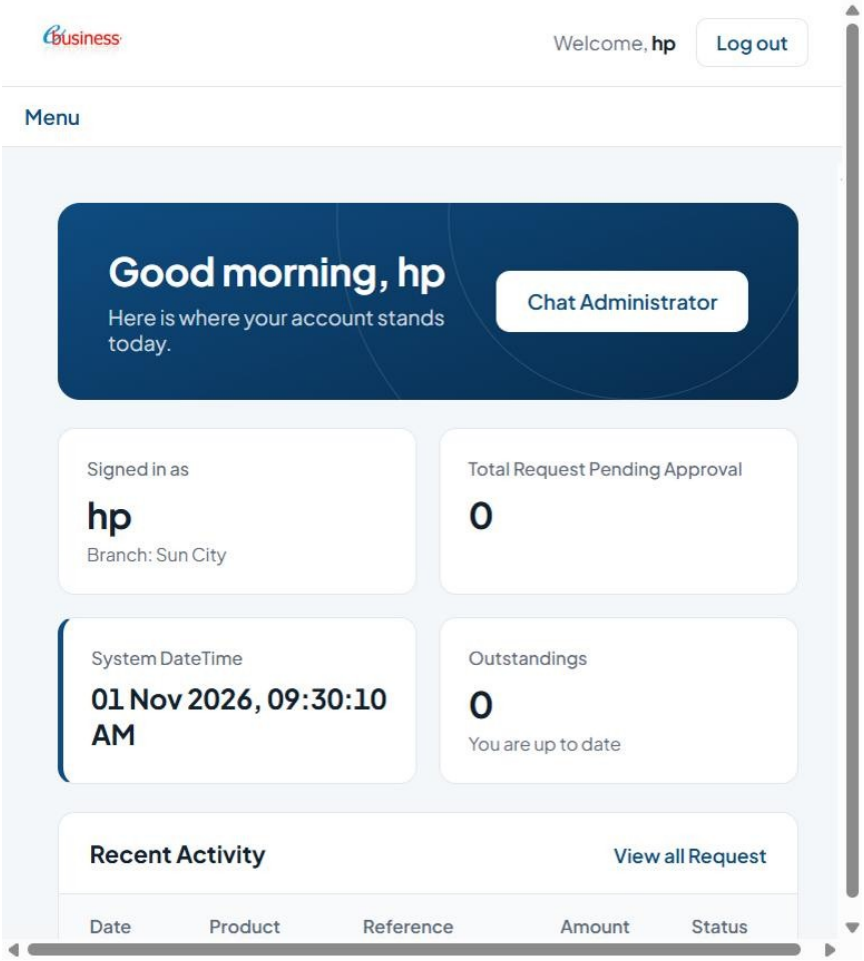

Figure 3: Web Registrar

List columns: Date, Product, Reference, Amount, Status.

Buttons and actions

Button	What it does
Log out	Sign out of eBankPlus.
Menu	Open or close the main menu.
Chat Administrator	Send a message to the system administrator.
View all Request	Show all your requests.

How to use this screen

1. Check the Signed in as card to confirm your user ID and branch.
2. Review Total Request Pending Approval and Outstandings to see work waiting for you.
3. Use View all Request to see the full list of your recent requests.
4. Use Chat Administrator to contact the system administrator.
5. Click Log out (top right) when you finish.

2.4 Main menu

Menu path: Click Menu below the header

Purpose: The Menu button opens the main navigation. Functions are grouped into modules (Manage Account, Administration, Reports, Approval, Card Management, Broadcast, eBranch Management, eChannels Management, Revenue Collection, Direct Debit and eOperations). You only see the menu items your role allows.

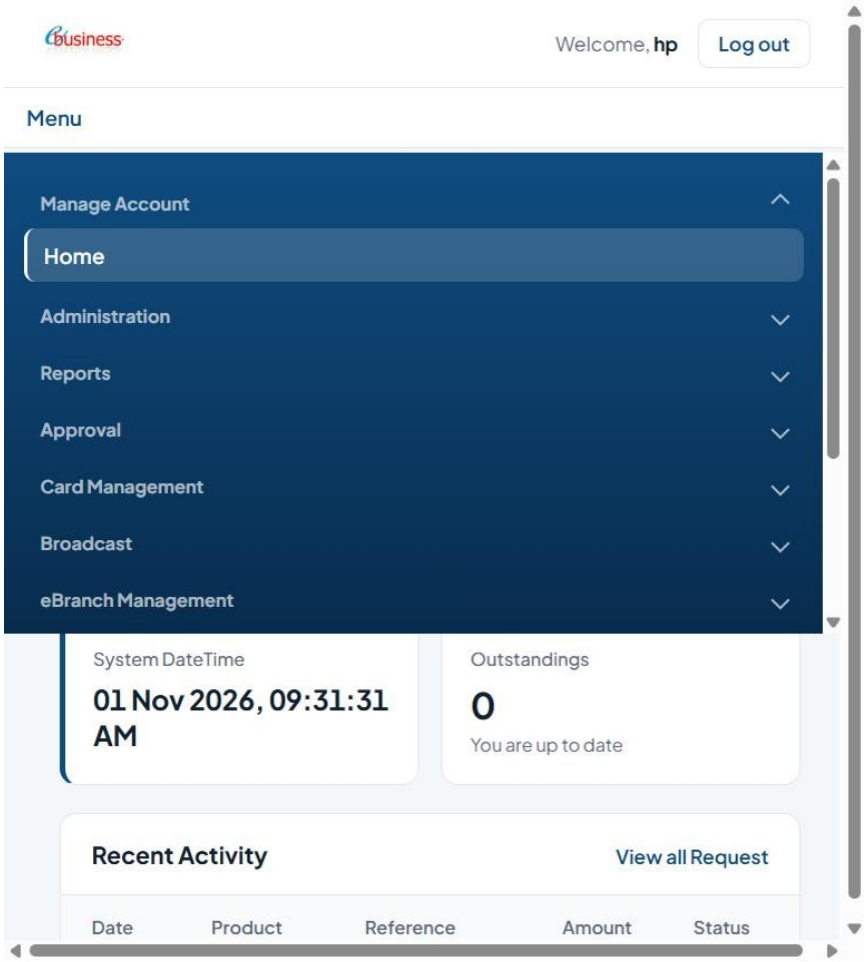

Figure 4: Menu

How to use this screen

1. Click Menu below the header.
2. Click a module name to expand it (the arrow turns up).
3. Click the screen you need. It opens in the main area.
4. Click the module name again to collapse it.

3. Manage Account

Your own account summary and activity.

3.1 Home (Subscribe to products / payment details)

Menu path: Menu > Manage Account > Home

Purpose: The Home screen (Manage Account > Subscribe to new products and view all existing payment details) summarises your account: pending approvals, outstanding items and recent activity, with a link to view all requests.

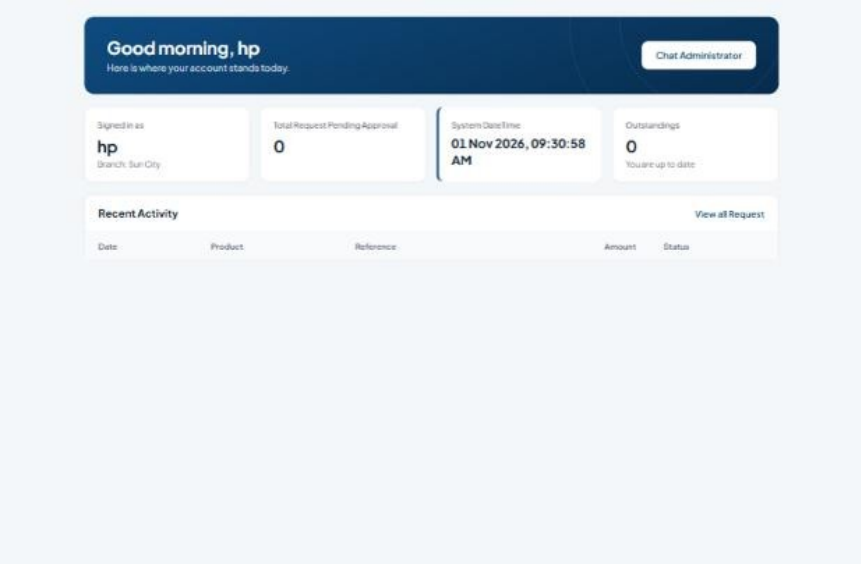

Figure 5: Home

List columns: Date, Product, Reference, Amount, Status.

Buttons and actions

Button	What it does
Chat Administrator	Send a message to the system administrator.

How to use this screen

1. Open Menu > Manage Account > Home.
2. Review the summary cards and the Recent Activity table (Date, Product, Reference, Amount, Status).
3. Click View all Request to see every request.

4. Administration

Set-up and maintenance screens for fees, terminals, users, roles, customer profiles, policies, security questions, billers and corporate customers. Usually restricted to administrators.

4.1 Setup Fees

Menu path: Menu > Administration > Setup Fees

Purpose: Sets up the rate and fee charged for each transaction amount range (charge setup).

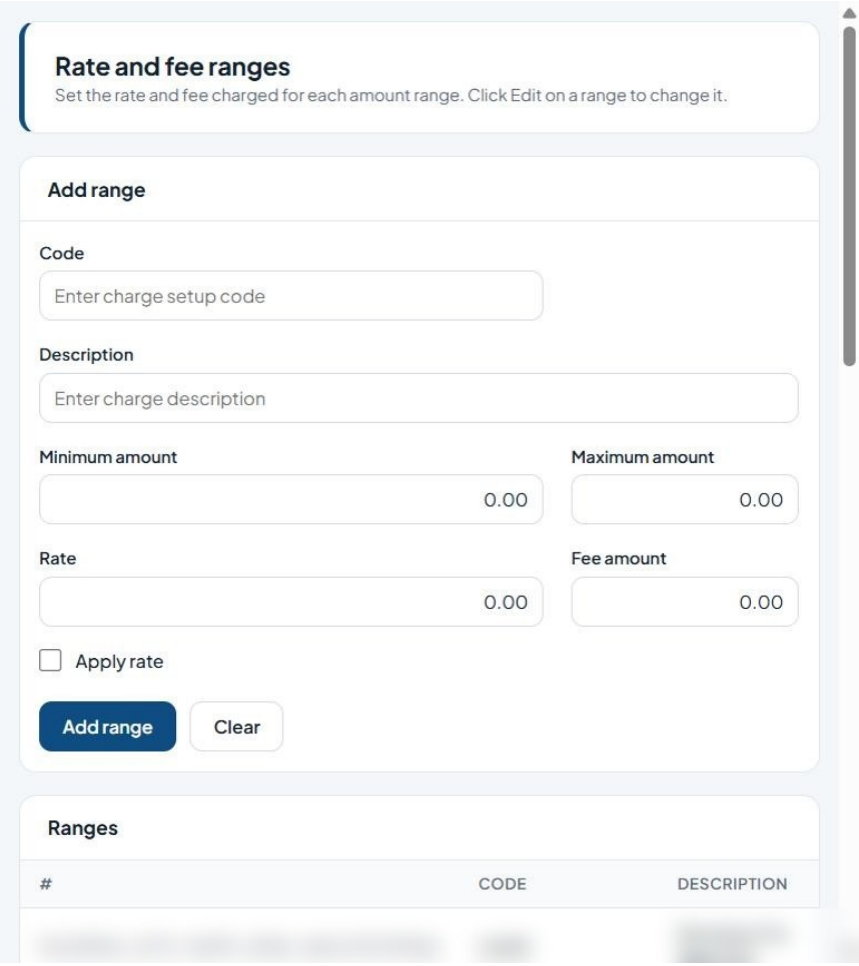

Figure 6: Rate and fee ranges

Fields

Field	Type	Description
Code	Text	Unique code/identifier.
Description	Text	Free-text description.
Minimum amount	Text	Amount in Naira (NGN).
Maximum amount	Text	Amount in Naira (NGN).
Rate	Text	Percentage rate.
Fee amount	Text	Amount in Naira (NGN).
Apply rate	Tick box	Percentage rate.

List columns: #, Code, Description, Minimum amount, Maximum amount, Rate, Fee amount, Apply.

Buttons and actions

Button	What it does
Add range	Save the new fee range.
Clear	Clear the form without saving.

How to use this screen

1. Enter a Code and Description for the charge range.
2. Enter the Minimum amount and Maximum amount the range covers.
3. Enter the Rate and/or the flat Fee amount.
4. Tick Apply rate if the percentage rate should be applied (otherwise the fee amount is used).
5. Click Add range. The range appears in the Ranges list.
6. To change a range, click Edit on its row, update the values and save. Click Clear to empty the form.

4.2 Terminal Registration

Menu path: Menu > Administration > Terminal Registration

Purpose: Registers POS and ATM terminals and links them to a customer account and branch.

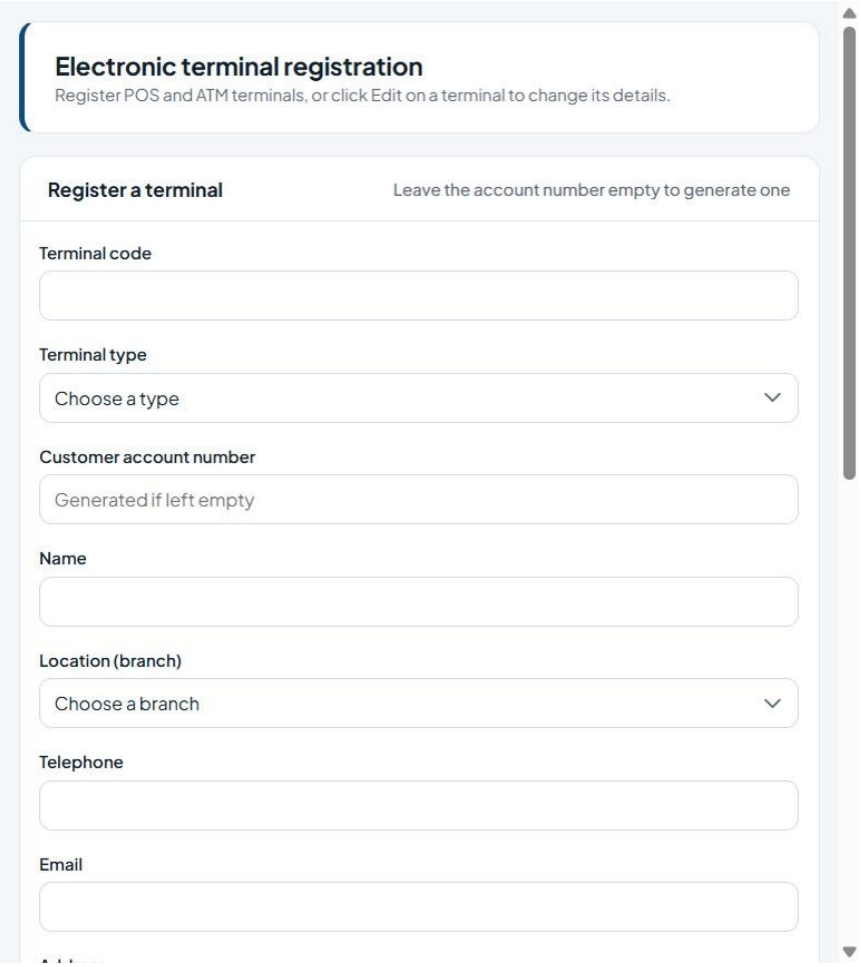

Figure 7: Terminal registration

Fields

Field	Type	Description
Terminal code	Text	Unique code/identifier.
Terminal type	Drop-down list	Choose the type from the list.
Customer account number	Text	The customer account number (validated against the core banking system).
Name	Text	Name to record.
Location (branch)	Drop-down list	The bank branch.
Telephone	Phone number	Contact phone number.
Email	E-mail address	Contact e-mail address.
Address	Text	Enter the address.
Terminal IP	Text	Enter the terminal IP.
Relationship officer	Text	Enter the relationship officer.

List columns: Terminal code, Type, Name, Account no, Balance, Branch, Telephone, Status.

Buttons and actions

Button	What it does
Register terminal	Save the new terminal.
Clear	Clear the form without saving.

How to use this screen

1. Enter the Terminal code and choose the Terminal type (POS or ATM).
2. Enter the Customer account number, or leave it empty to have one generated.
3. Enter the terminal Name and choose the Location (branch).
4. Enter Telephone, Email, Address, Terminal IP and the Relationship officer.
5. Click Register terminal. The terminal appears in the Terminals list.
6. To change a terminal, click Edit on its row.

4.3 Setup Transaction Profile

Menu path: Menu > Administration > Setup Transaction Profile

Purpose: Links accounts to a transaction description and type (Credit or Debit) for funds-transfer processing.

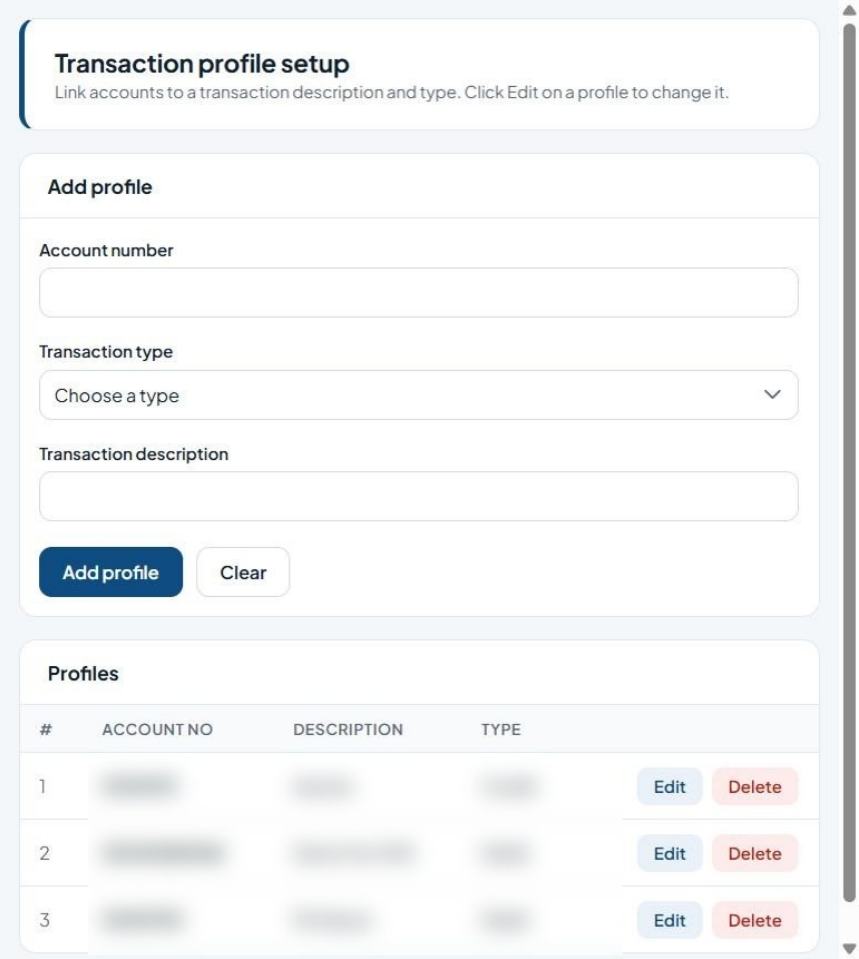

Figure 8: Transaction profile setup

Fields

Field	Type	Description
Account number	Text	The customer account number (validated against the core banking system).
Transaction type	Drop-down list	Choose the type from the list.
Transaction description	Text	Free-text description.

List columns: #, Account no, Description, Type.

Buttons and actions

Button	What it does
Add profile	Save the new transaction profile.
Clear	Clear the form without saving.
Edit	Edit the row.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the Account number.
2. Choose the Transaction type (Credit or Debit).

3. Enter the Transaction description.
4. Click Add profile.
5. Use Edit or Delete on a row in the Profiles list to change or remove a profile.

4.4 USSD Onboarding

Menu path: Menu > Administration > USSD Onboarding

Purpose: Creates, updates or deletes a customer's USSD profile by linking a mobile number (MSISDN) to an account.

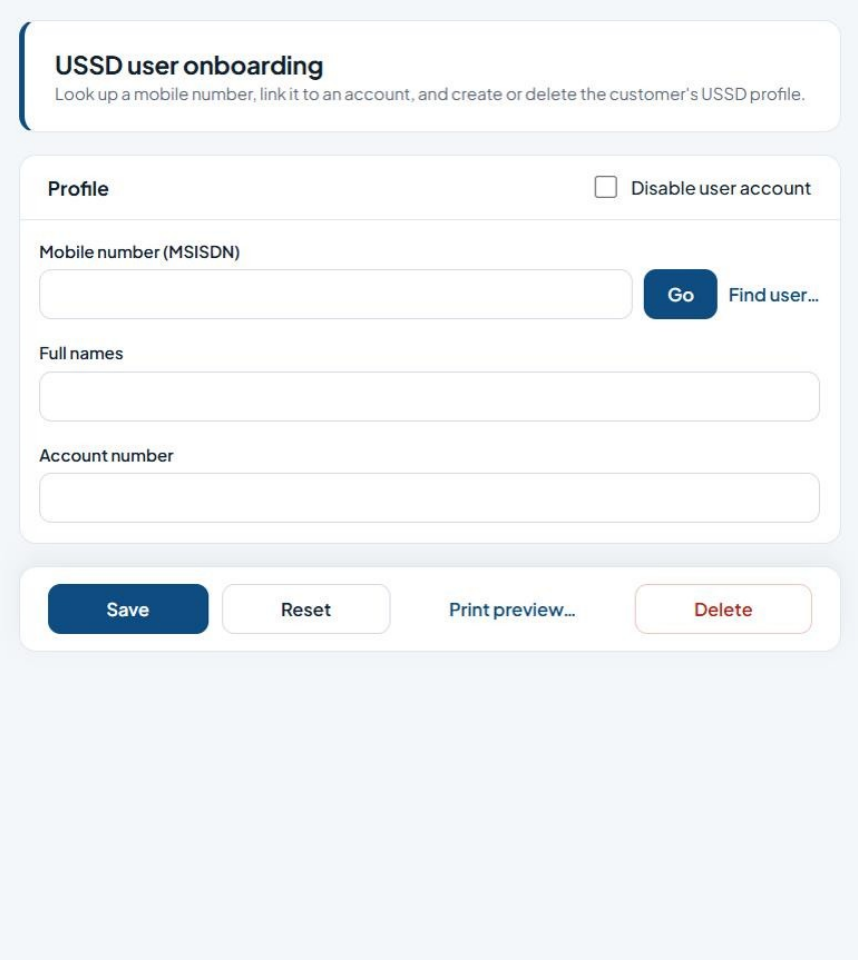

Figure 9: USSD user onboarding

Fields

Field	Type	Description
Disable user account	Tick box	Tick to block the account from signing in.
Mobile number (MSISDN)	Text	Customer's mobile number in international format.
Full names	Text	The person's full name.
Account number	Text	The customer account number (validated against the core banking system).

Buttons and actions

Button	What it does
Go	Load the record for the ID entered.
Find user…	Search for a user.
Save	Save the changes.
Reset	Clear the form, or apply the chosen reset to the ticked users.
Print preview…	Preview a printable copy.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the customer's Mobile number (MSISDN) and click Go, or click Find user… to search.
2. Check or enter the Full names and Account number.
3. Tick Disable user account only if the USSD profile should be blocked.
4. Click Save to create or update the profile.
5. Use Delete to remove the profile, Reset to clear the form, or Print preview… to print it.

4.5 Profile Maintenance

Menu path: Menu > Administration > Profile Maintenance

Purpose: Maintains existing customer (internet/mobile/USSD) profiles: clears device bindings or security questions and sets eToken and channel options.

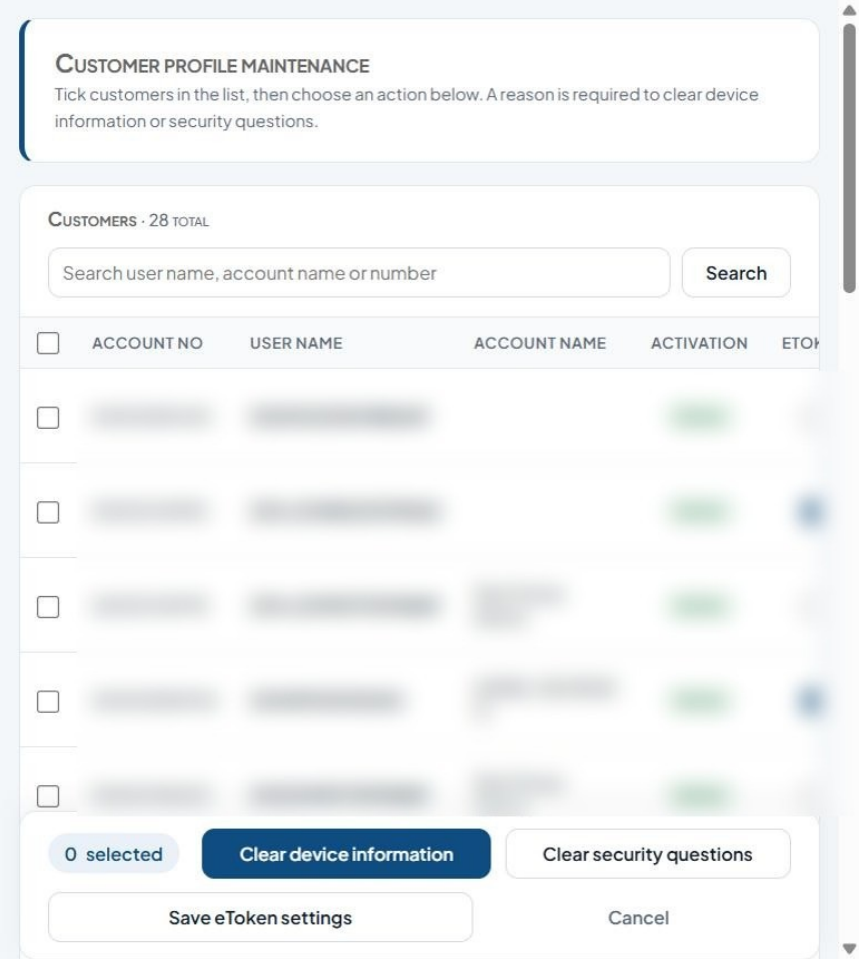

Figure 10: Customer profile maintenance

Fields

Field	Type	Description
Search user name, account name or number	Text	Text to search for.
Select (per customer)	Tick box	Tick to include the row(s) in the next action.
eToken / Mobile / iPortal / USSD (per customer)	Tick box	Tick to enable.
Reason (to deactivate or clear questions)	Multi-line text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

List columns: Account no, User name, Account name, Activation, Etoken, Registration phone, Registration address, Mobile, Iportal, Ussd, Reason.

Buttons and actions

Button	What it does
Search	Run the search.
Clear device information	Unbind the ticked customers' registered devices (reason required).
Clear security questions	Make the ticked customers set new security questions (reason required).

Button	What it does
Save eToken settings	Save the eToken and channel tick boxes for the listed customers.
Cancel	Discard and clear the selection.

How to use this screen

1. Type a user name, account name or account number and click Search.
2. Tick the customer(s) to work on.
3. Enter a Reason in the row. A reason is required to clear device information or security questions.
4. Click Clear device information to unbind the customer's device, or Clear security questions to make them set new ones.
5. Tick or untick eToken, Mobile, iPortal and USSD for each customer and click Save eToken settings to save channel settings.
6. Click Cancel to discard.

4.6 User Profile

Menu path: Menu > Administration > User Profile

Purpose: Creates and maintains back-office user accounts: permissions, data-posting limits, approval limits and role memberships.

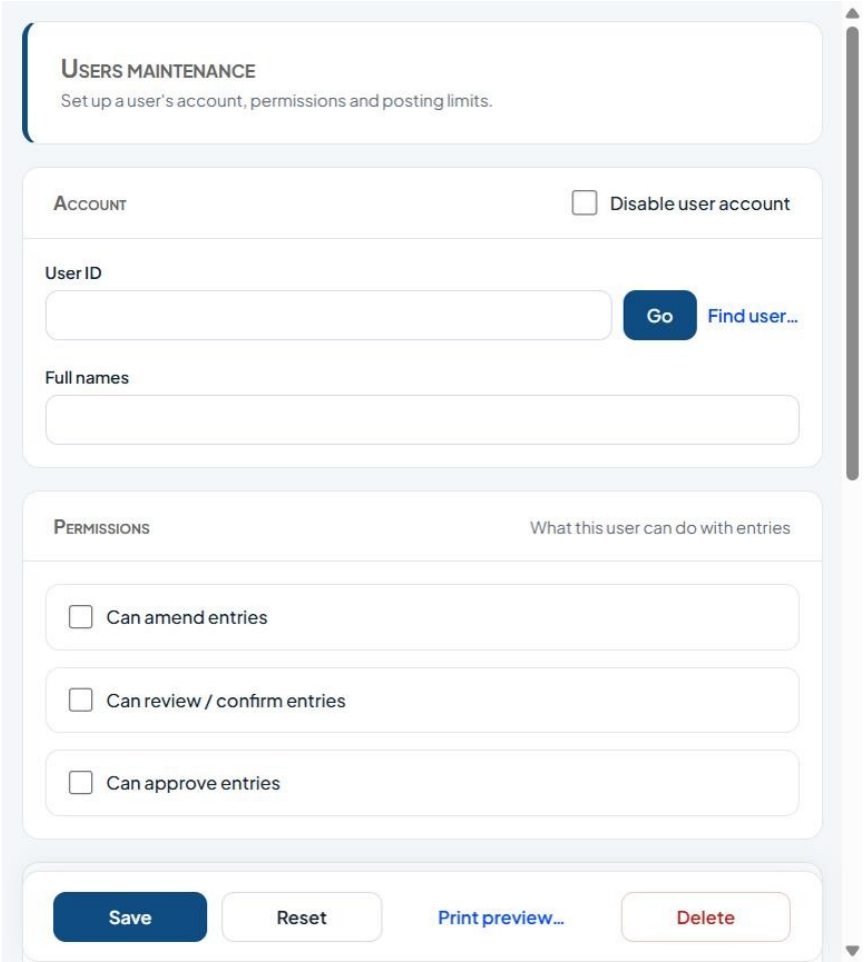

Figure 11: Users maintenance

Fields

Field	Type	Description
Disable user account	Tick box	Tick to block the account from signing in.
User ID	Text	The user's login ID. Click Go to load an existing user.
Full names	Text	The person's full name.
Can amend entries	Tick box	Permission granted to the user.
Can review / confirm entries	Tick box	Permission granted to the user.
Can approve entries	Tick box	Permission granted to the user.
Data posting limits - Cash receipts / Cash payments / Non-cash payments (minimum, maximum, ceiling)	Text	Amount limits per transaction category.
Posting approval limits - Cash receipts / Cash payments / Non-cash payments (minimum, maximum)	Text	Amount limits per transaction category.

Buttons and actions

Button	What it does
Go	Load the record for the ID entered.
Find user…	Search for a user.
Save	Save the changes.
Reset	Clear the form, or apply the chosen reset to the ticked users.
Print preview…	Preview a printable copy.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the User ID and click Go, or click Find user… to search.
2. Enter or check the Full names. Tick Disable user account to block the user.
3. Under Permissions, tick what the user may do: amend, review/confirm, or approve entries.
4. Under Data posting limits, enter the minimum, maximum and ceiling amounts for cash receipts, cash payments and non-cash payments.
5. Under Posting approval limits, enter the minimum and maximum approval amounts.
6. Under Memberships, assign the user's role(s).
7. Click Save. Use Reset to clear, Delete to remove the user, or Print preview… to print.

4.7 Profile Activation

Menu path: Menu > Administration > Profile Activation

Purpose: Activates or deactivates customer profiles and sets the channels (eToken, Mobile, iPortal, USSD) each customer can use.

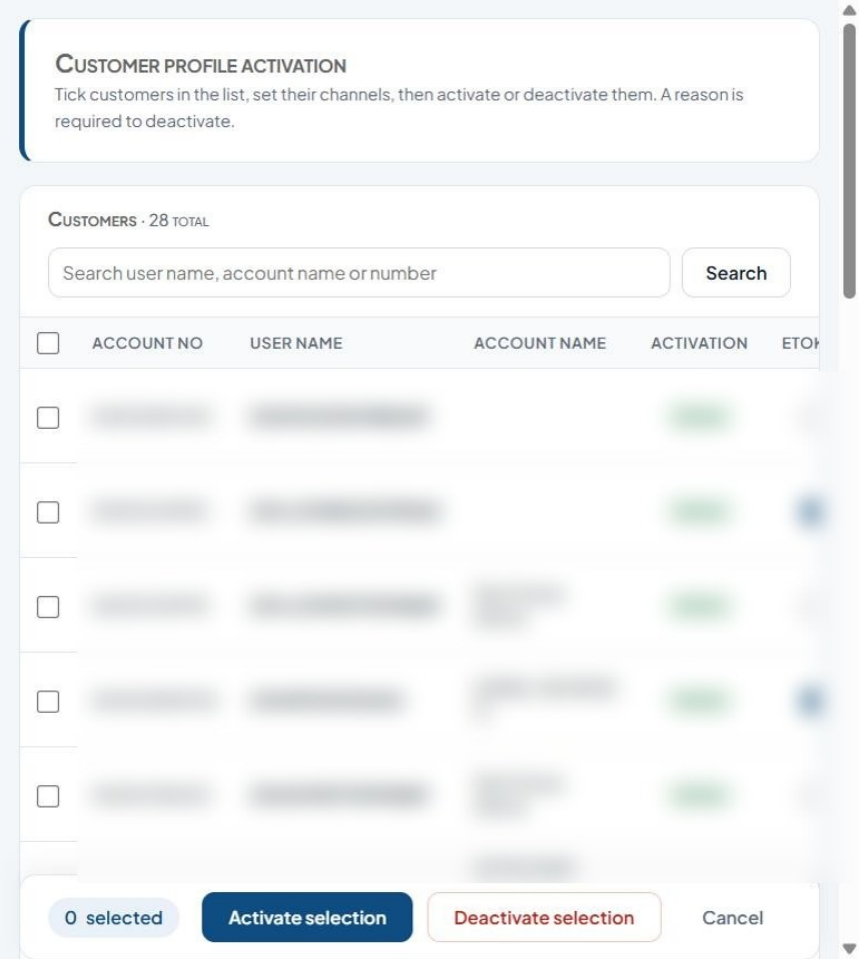

Figure 12: Customer profile activation

Fields

Field	Type	Description
Search user name, account name or number	Text	Text to search for.
Select (per customer)	Tick box	Tick to include the row(s) in the next action.
Active / eToken / Mobile / iPortal / USSD (per customer)	Tick box	Tick to enable.
Reason (required to deactivate)	Multi-line text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

List columns: Account no, User name, Account name, Activation, Etoken, Registration phone, Registration address, Mobile, Iportal, Ussd, Reason.

Buttons and actions

Button	What it does
Search	Run the search.
Activate selection	Activate the ticked items.
Deactivate selection	Deactivate the ticked customers (reason required).
Cancel	Discard and clear the selection.

How to use this screen

1. Search by user name, account name or number.
2. Tick the customer(s) and set their channel tick boxes.
3. Click Activate selection to activate them.
4. To deactivate, enter a Reason on each row (required) and click Deactivate selection.
5. Click Cancel to discard.

4.8 Online Policy

Menu path: Menu > Administration > Online Policy

Purpose: Bank-wide (general) online policies, such as the maximum withdrawal per week, non-working hours per day, and NIP local and inter-bank transfer limits.

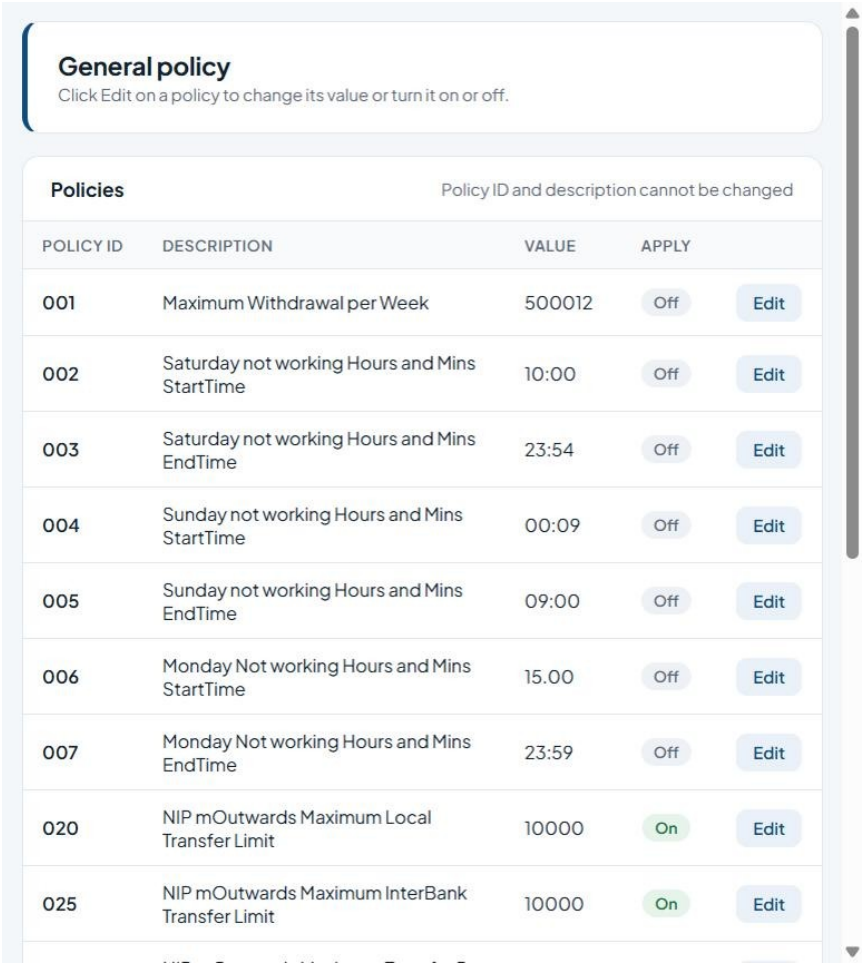

Figure 13: General policy

List columns: Policy id, Description, Value, Apply.

Buttons and actions

Button	What it does
Edit	Edit the row.

How to use this screen

1. Find the policy in the Policies list (Policy ID, Description, Value, Apply).

2. Click Edit on its row.
3. Change the Value and/or switch Apply on or off. Policy ID and description cannot be changed.
4. Save the change.

Note: Policy ID and description cannot be changed; click Edit to change a policy's value or turn it on/off (e.g. weekly withdrawal limit, non-working hours, NIP transfer limits).

4.9 Customer Account Policy

Menu path: Menu > Administration > Customer Account Policy

Purpose: Requests a customer-specific policy (for example a higher transfer limit) for an account. Requests go for approval under Approval > Approve Account Policy.

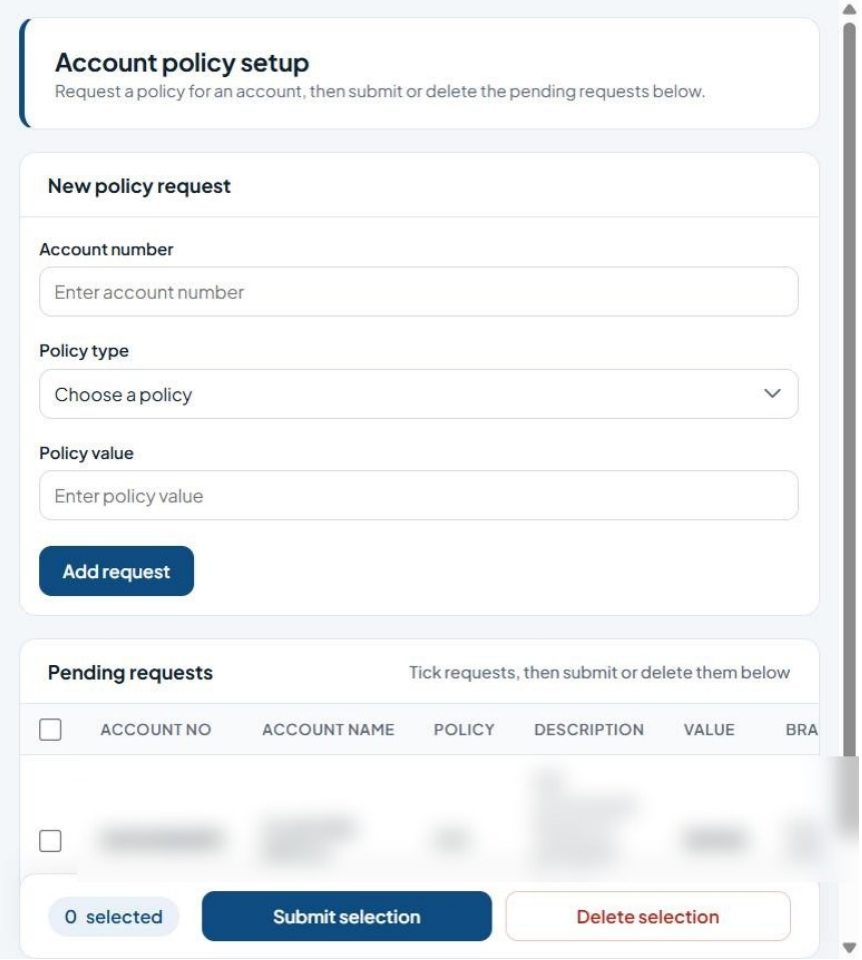

Figure 14: Account policy setup

Fields

Field	Type	Description
Account number	Text	The customer account number (validated against the core banking system).
Policy type	Drop-down list	The policy to apply.
Policy value	Text	The value for the policy (e.g. limit amount).
Select (per request)	Tick box	Tick to include the row(s) in the next action.

List columns: Account no, Account name, Policy, Description, Value, Branch, Requested.

Buttons and actions

Button	What it does
Add request	Add the request to the pending list.
Submit selection	Send the ticked items for approval.
Delete selection	Remove the ticked items.

How to use this screen

1. Enter the Account number.
2. Choose the Policy type and enter the Policy value.
3. Click Add request. It appears under Pending requests.
4. Tick the requests to send and click Submit selection to send them for approval, or Delete selection to remove them.

4.10 Roles & Permissions

Menu path: Menu > Administration > Roles & Permissions

Purpose: Creates and maintains user roles and the screens/actions each role is allowed to use.

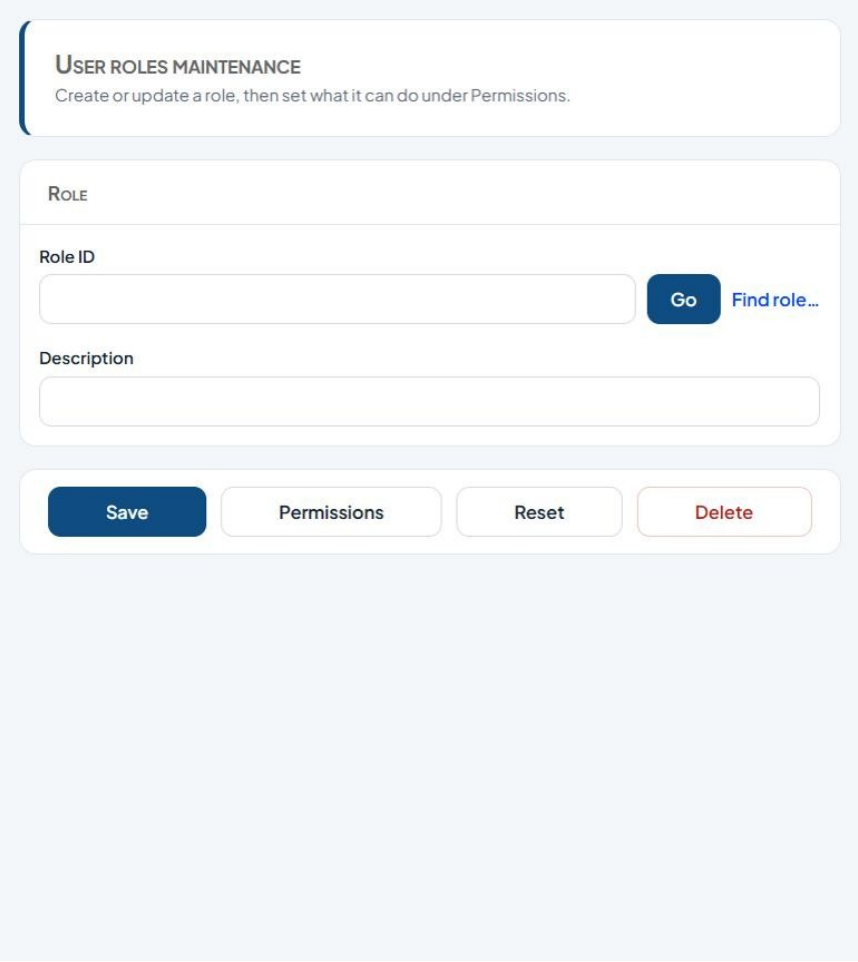

Figure 15: User roles maintenance

Fields

Field	Type	Description
Role ID	Text	Enter the role ID.
Description	Text	Free-text description.

Buttons and actions

Button	What it does
Go	Load the record for the ID entered.
Find role…	Search for a role.
Save	Save the changes.
Permissions	Set what the role can access.
Reset	Clear the form, or apply the chosen reset to the ticked users.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter a Role ID and click Go, or use Find role… to search.
2. Enter the Description.
3. Click Save.
4. Click Permissions to choose the menu items and actions the role can access, then save.
5. Use Delete to remove a role or Reset to clear the form.

4.11 Reset User Profile

Menu path: Menu > Administration > Reset User Profile

Purpose: Resets locked or disabled back-office users and clears logon problems.

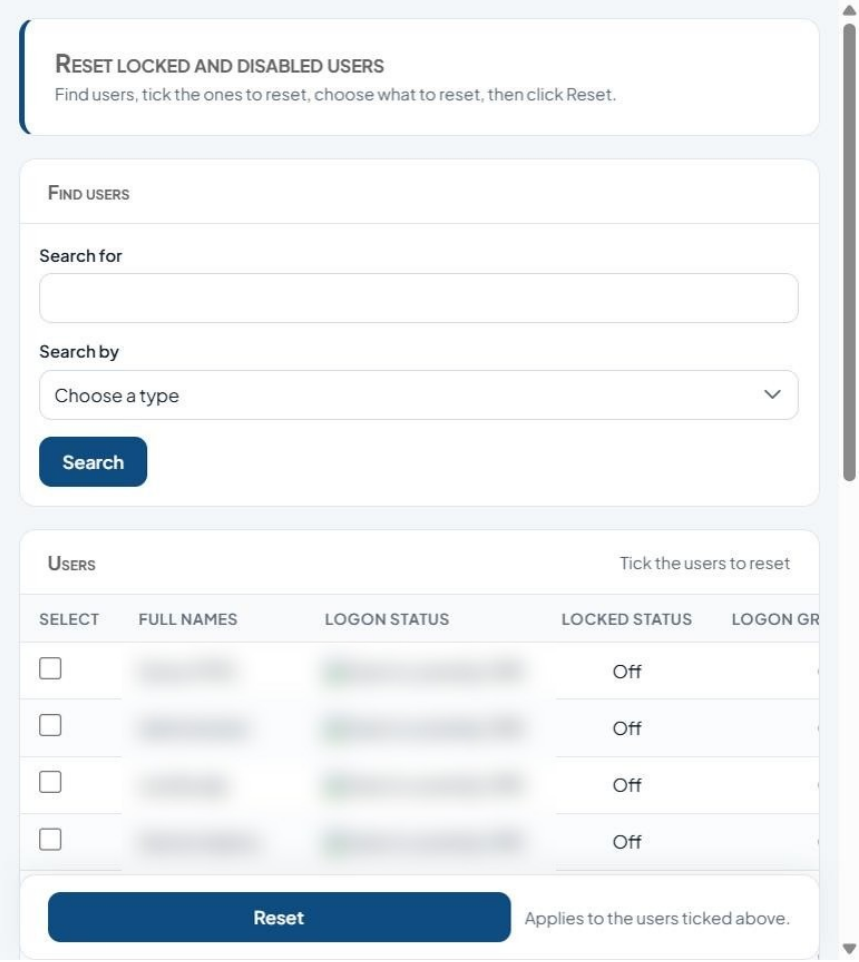

Figure 16: Reset locked and disabled users

Fields

Field	Type	Description
Search for	Text	Text to search for.
Search by	Drop-down list	Text to search for.
Select (per user)	Tick box	Tick to include the row(s) in the next action.
Reset locked users only	Tick box	Tick to enable.
Clear user from logon log	Tick box	Tick to enable.
Reset locked and disabled users	Tick box	Tick to enable.
Reset all	Tick box	Tick to enable.
Reset user's password only	Tick box	Tick to enable.

List columns: Select, Full names, Logon status, Locked status, Logon group.

Buttons and actions

Button	What it does
Search	Run the search.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. Enter a search value in Search for and choose Search by, then click Search.
2. Tick the user(s) in the Users list.
3. Under What to reset, choose one option: reset locked users only; clear user from logon log; reset locked and disabled users; reset all; or reset the user's password only.
4. Click Reset. The action applies to all ticked users.

4.12 Setup Application Security Questions

Menu path: Menu > Administration > Setup Application Security Questions

Purpose: Maintains the list of security questions customers choose from when they set up their profile.

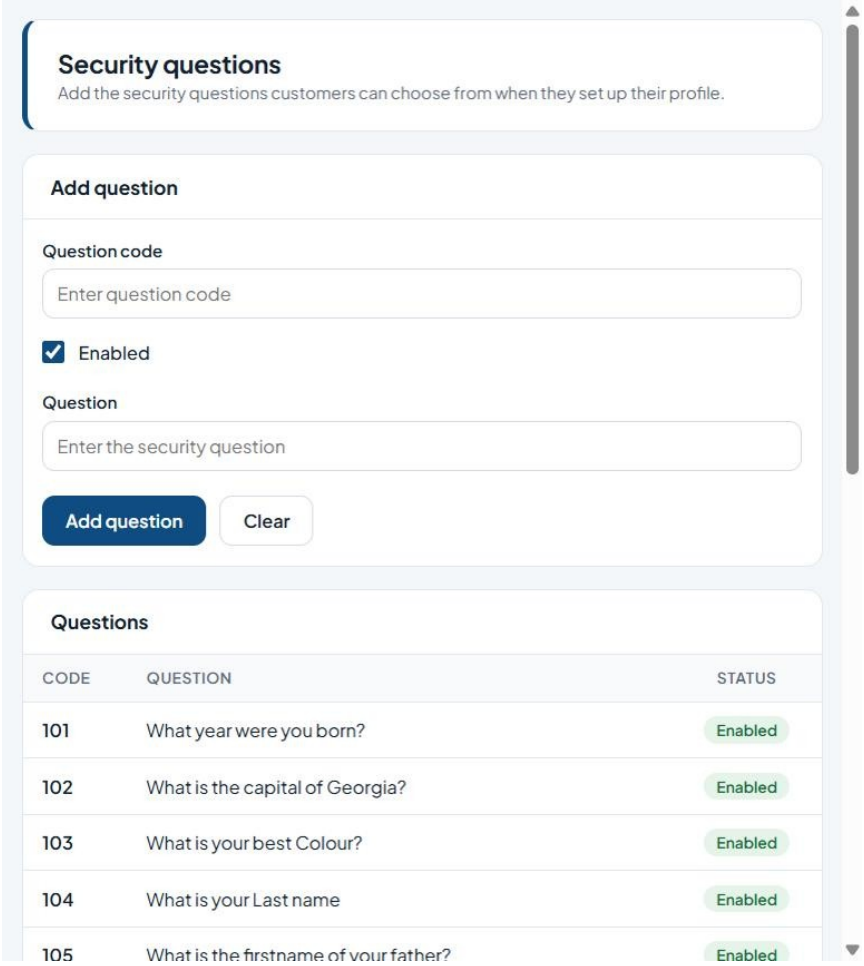

Figure 17: Security questions

Fields

Field	Type	Description
Question code	Text	Unique code/identifier.
Enabled	Tick box	Tick to enable.
Question	Text	Enter the question.

List columns: Code, Question, Status.

Buttons and actions

Button	What it does
Add question	Save the new security question.
Clear	Clear the form without saving.

How to use this screen

1. Enter a Question code.
2. Type the Question.
3. Leave Enabled ticked so customers can choose it.
4. Click Add question. It appears in the Questions list with its status.

4.13 Setup Biller

Menu path: Menu > Administration > Setup Biller

Purpose: Sets up billers (for example airtime, data, utilities) within a biller category for bill payments.

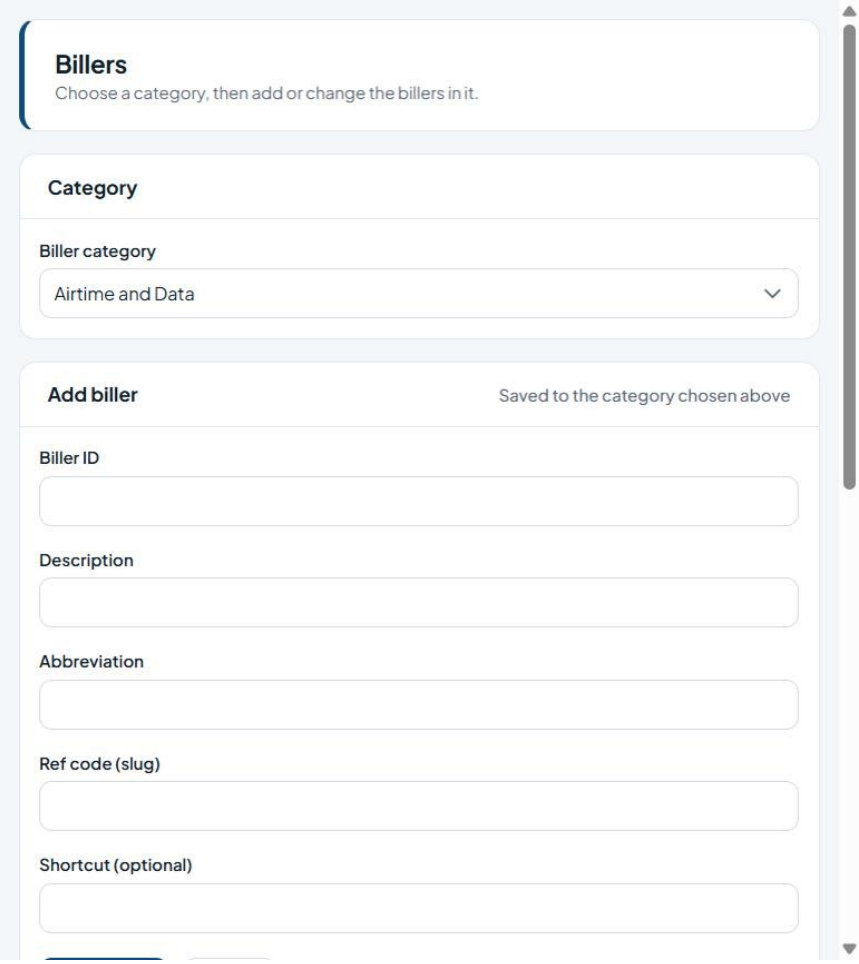

Figure 18: Billers

Fields

Field	Type	Description
Biller category	Drop-down list	Choose a value from the list.

Field	Type	Description
Biller ID	Text	Enter the biller ID.
Description	Text	Free-text description.
Abbreviation	Text	Enter the abbreviation.
Ref code (slug)	Text	Enter the ref code (slug).
Shortcut (optional)	Text	Enter the shortcut (optional).

List columns: Biller id, Description, Abbreviation, Ref code, Category, Shortcut.

Buttons and actions

Button	What it does
Add biller	Save the new biller.
Clear	Clear the form without saving.

How to use this screen

1. Choose the Biller category.
2. Enter Biller ID, Description, Abbreviation, Ref code (slug) and, optionally, a Shortcut.
3. Click Add biller. The biller is saved to the chosen category and appears under Billers in this category.
4. Click Clear to empty the form.

4.14 Setup Biller Product

Menu path: Menu > Administration > Setup Biller Product

Purpose: Maintains the products (packages and price plans) offered by each biller.

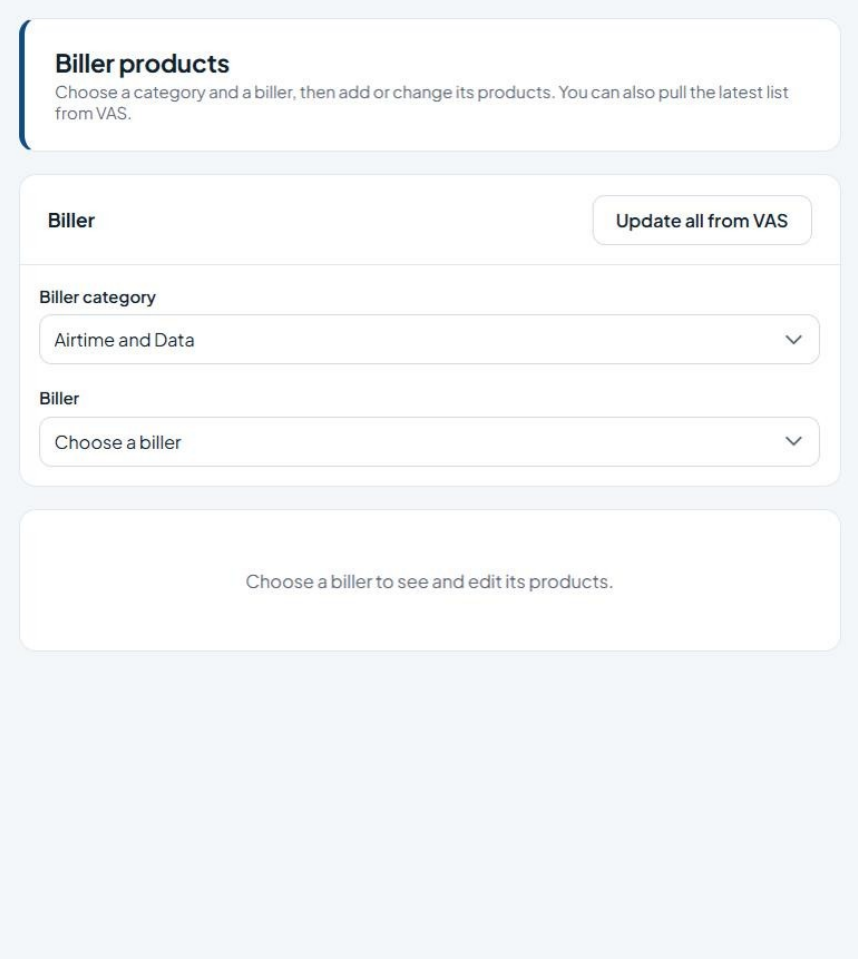

Figure 19: Biller products

Fields

Field	Type	Description
Biller category	Drop-down list	Choose a value from the list.
Biller	Drop-down list	Choose a value from the list.

Buttons and actions

Button	What it does
Update all from VAS	Download the latest products for all billers from the VAS provider.

How to use this screen

1. Choose the Biller category, then the Biller.
2. The biller's products are listed. Add or edit them as needed.
3. Click Update all from VAS to pull the latest product list from the VAS provider.

> **Note:** Choose a category and a biller to see and edit its products; Update all from VAS pulls the latest product list.

4.15 Setup Corporate Organization

Menu path: Menu > Administration > Setup Corporate Organization

Purpose: Sets up corporate organisations (corporate internet-banking customers) and their main account.

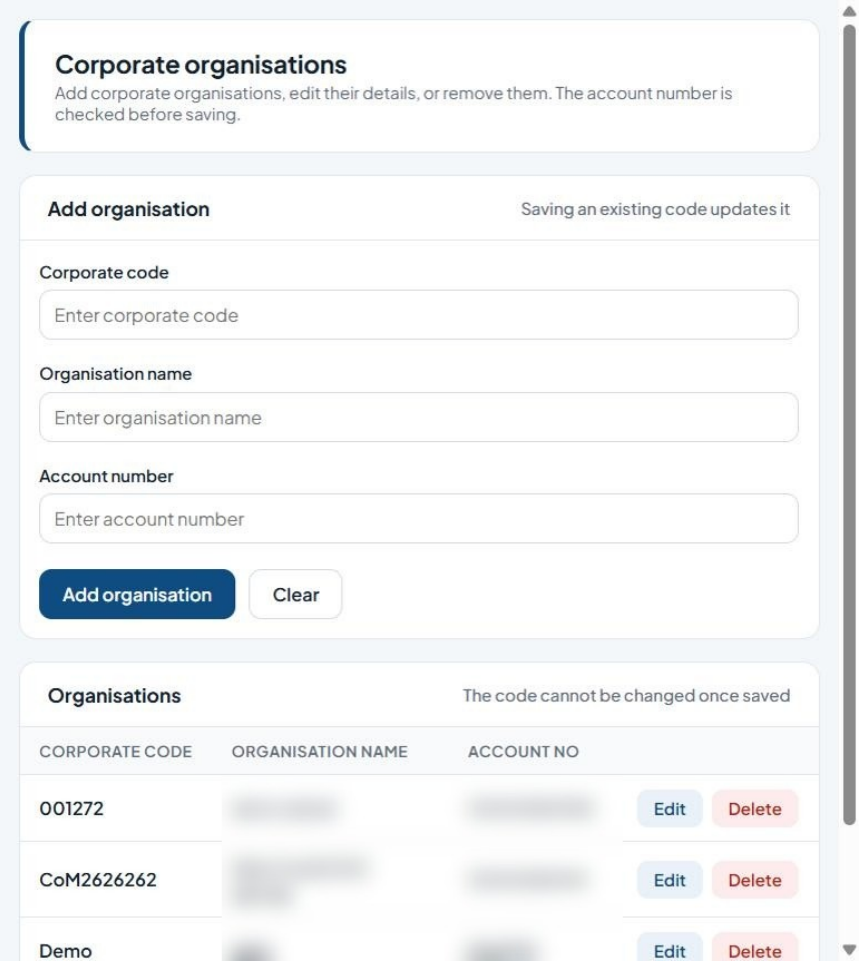

Figure 20: Corporate organisations

Fields

Field	Type	Description
Corporate code	Text	Unique code/identifier.
Organisation name	Text	Name to record.
Account number	Text	The customer account number (validated against the core banking system).

List columns: Corporate code, Organisation name, Account no.

Buttons and actions

Button	What it does
Add organisation	Save the organisation (updates it if the code exists).
Clear	Clear the form without saving.
Edit	Edit the row.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the Corporate code, Organisation name and Account number.
2. Click Add organisation. The account number is checked before saving.
3. Saving an existing code updates that organisation. The code cannot be changed once saved.
4. Use Edit or Delete on a row in the Organisations list.

> **Note:** The account number is checked before saving. Saving an existing code updates it; the code cannot be changed once saved.

4.16 Setup Corporate User Profile

Menu path: Menu > Administration > Setup Corporate User Profile

Purpose: Creates and maintains users for corporate organisations, with their posting and approval rights.

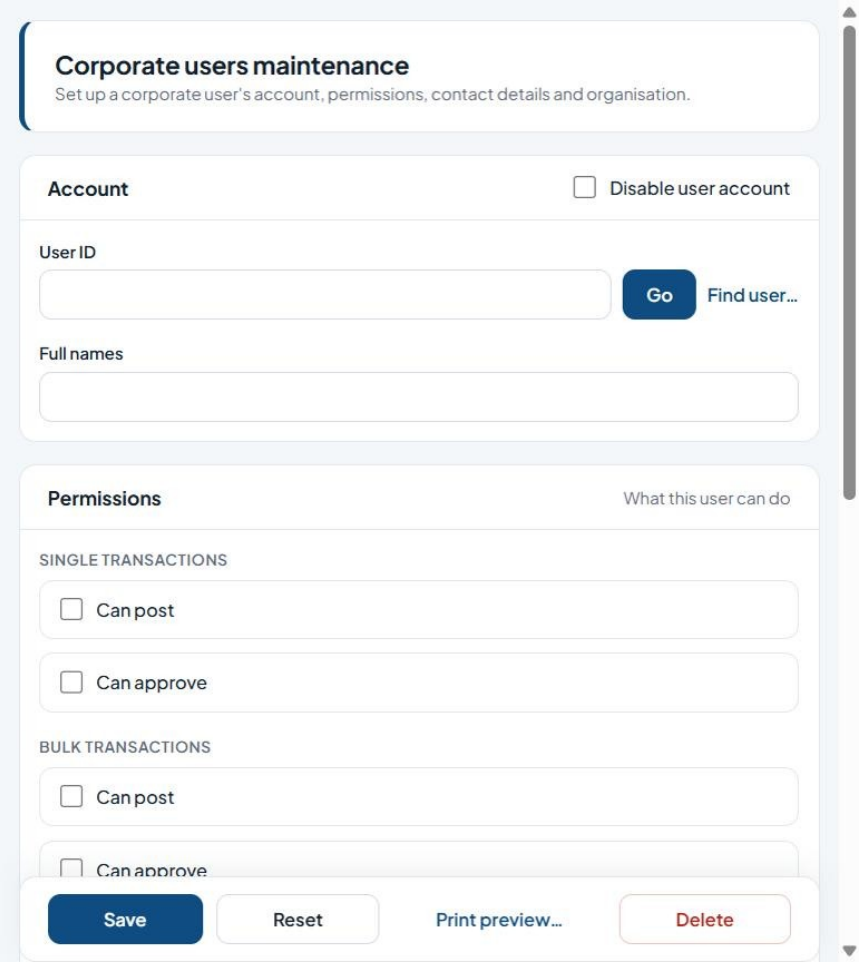

Figure 21: Corporate users maintenance

Fields

Field	Type	Description
Disable user account	Tick box	Tick to block the account from signing in.
User ID	Text	The user's login ID. Click Go to load an existing user.
Full names	Text	The person's full name.

Field	Type	Description
Single transactions - Can post / Can approve	Tick box	Tick to enable.
Bulk transactions - Can post / Can approve	Tick box	Tick to enable.
Can view balance	Tick box	Permission granted to the user.
Is approving officer	Tick box	Permission granted to the user.
Can view status	Tick box	Permission granted to the user.
Contact phone number	Phone number	Contact phone number.
Contact email	E-mail address	Contact e-mail address.
Organisation name	Drop-down list	Name to record.

Buttons and actions

Button	What it does
Go	Load the record for the ID entered.
Find user…	Search for a user.
Save	Save the changes.
Reset	Clear the form, or apply the chosen reset to the ticked users.
Print preview…	Preview a printable copy.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the User ID and click Go (or Find user…). Enter the Full names.
2. Under Permissions, tick Can post / Can approve for single and bulk transactions, plus Can view balance, Is approving officer and Can view status as needed.
3. Enter the Contact phone number and email and choose the Organisation name.
4. Assign memberships and click Save.

4.17 Setup eTeller Profile

Menu path: Menu > Administration > Setup eTeller Profile

Purpose: Creates and maintains eTeller users: their teller account, permissions and posting/approval limits.

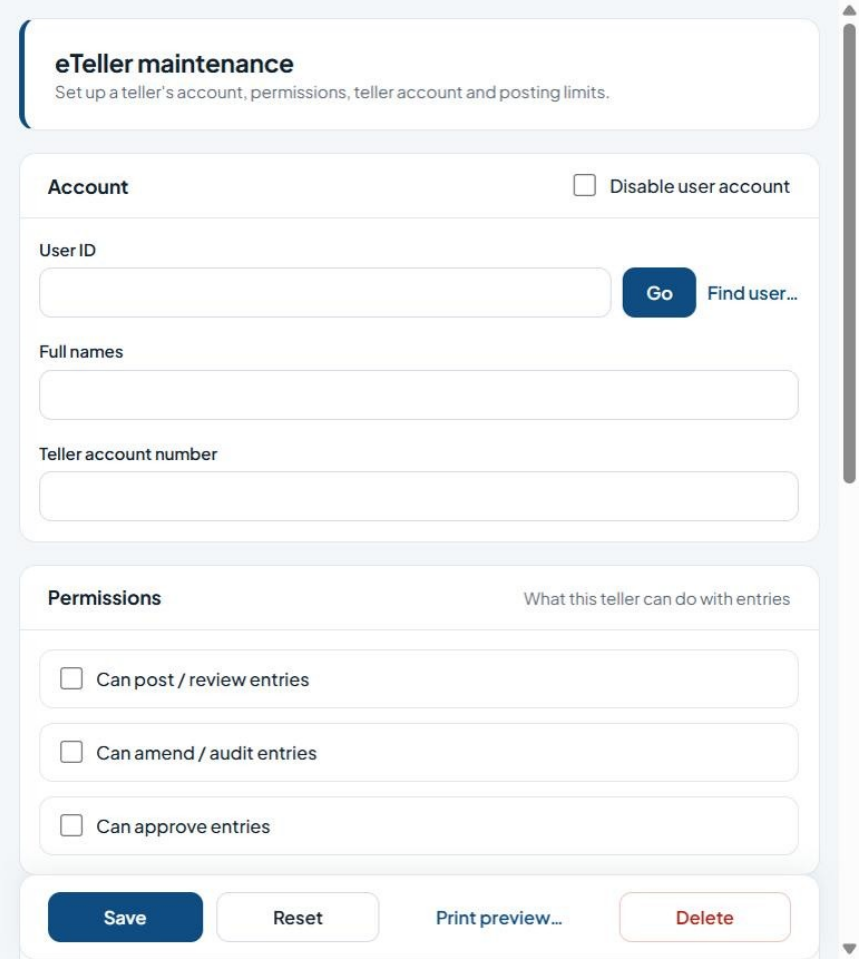

Figure 22: eTeller maintenance

Fields

Field	Type	Description
Disable user account	Tick box	Tick to block the account from signing in.
User ID	Text	The user's login ID. Click Go to load an existing user.
Full names	Text	The person's full name.
Teller account number	Text	Enter the teller account number.
Can post / review entries	Tick box	Permission granted to the user.
Can amend / audit entries	Tick box	Permission granted to the user.
Can approve entries	Tick box	Permission granted to the user.
Data posting limits - Cash receipts / Cash payments / Non-cash payments (minimum, maximum, ceiling)	Text	Amount limits per transaction category.
Posting approval limits - Cash receipts / Cash payments / Non-cash payments (minimum, maximum)	Text	Amount limits per transaction category.

Buttons and actions

Button	What it does
Go	Load the record for the ID entered.
Find user…	Search for a user.
Save	Save the changes.
Reset	Clear the form, or apply the chosen reset to the ticked users.
Print preview…	Preview a printable copy.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Enter the User ID and click Go (or Find user…). Enter the Full names and Teller account number.
2. Tick permissions: post/review, amend/audit, approve entries.
3. Enter the data posting limits and posting approval limits.
4. Assign memberships and click Save.

5. Reports

All reports use the same report viewer: choose a Start Date and End Date, optionally add filter conditions, click go, then page through, zoom or export the results.

5.1 Card Reports

Menu path: Menu > Reports > Card Reports

Purpose: Lists card requests (account, card display name, PAN, display-name length, address) for a date range.

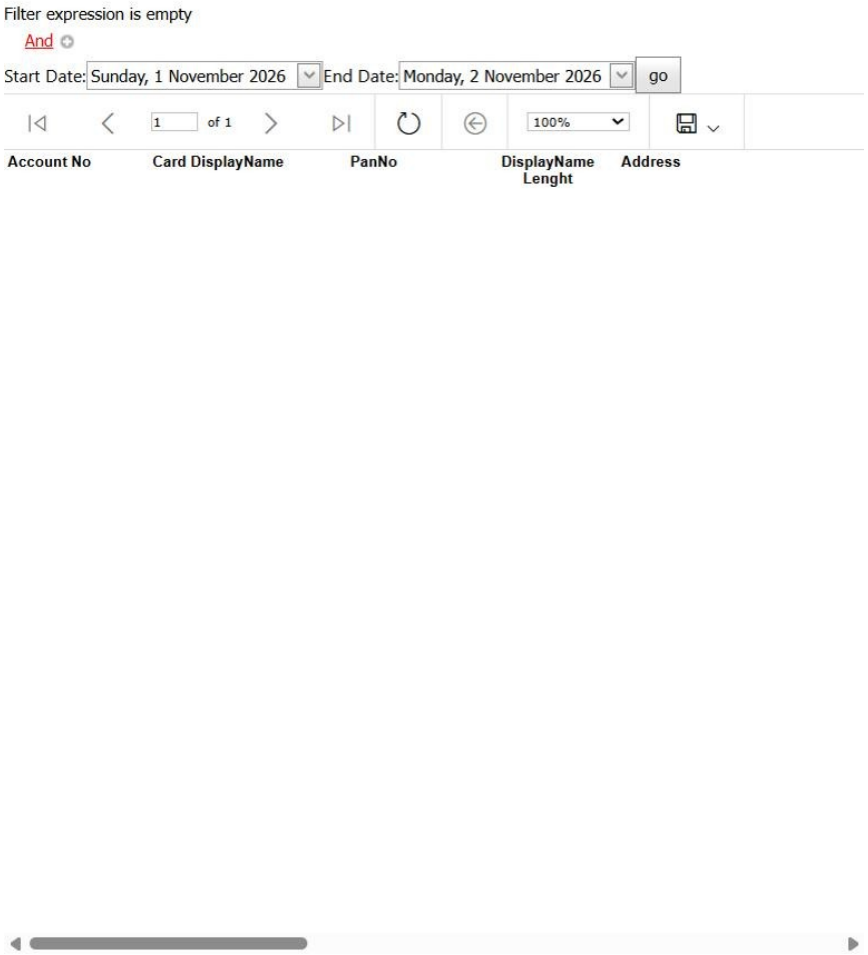

Figure 23: Card Request Report

Fields

Field	Type	Description
Filter expression (And / +)	Filter builder	Optional conditions to narrow the report (click And / + to add a condition).
Start Date	Date picker	Start (or issue) date.
End Date	Date picker	End (or expiry) date.

List columns: Account no, Card displayname, Panno, Displayname lenght, Address.

Buttons and actions

Button	What it does
go	Load the record / run the report.
First / Previous / Page / Next / Last	Move between report pages.
Refresh	Reload the list.
Back	Go back.
Zoom	Change the report zoom.
Export / Save	Export the report (e.g. PDF, Excel).

How to use this screen

1. Choose the Start Date and End Date.
2. Optionally build a filter: click And / (+) to add a condition.
3. Click go to run the report.
4. Use the toolbar to page through results, refresh, zoom, or export/save (for example to PDF or Excel).

5.2 eChannels Reports / eChannels By Branch Reports

Menu path: Menu > Reports > eChannels Reports

Purpose: Lists e-channel requests (tracking number, display name, account, address), including the branch breakdown.

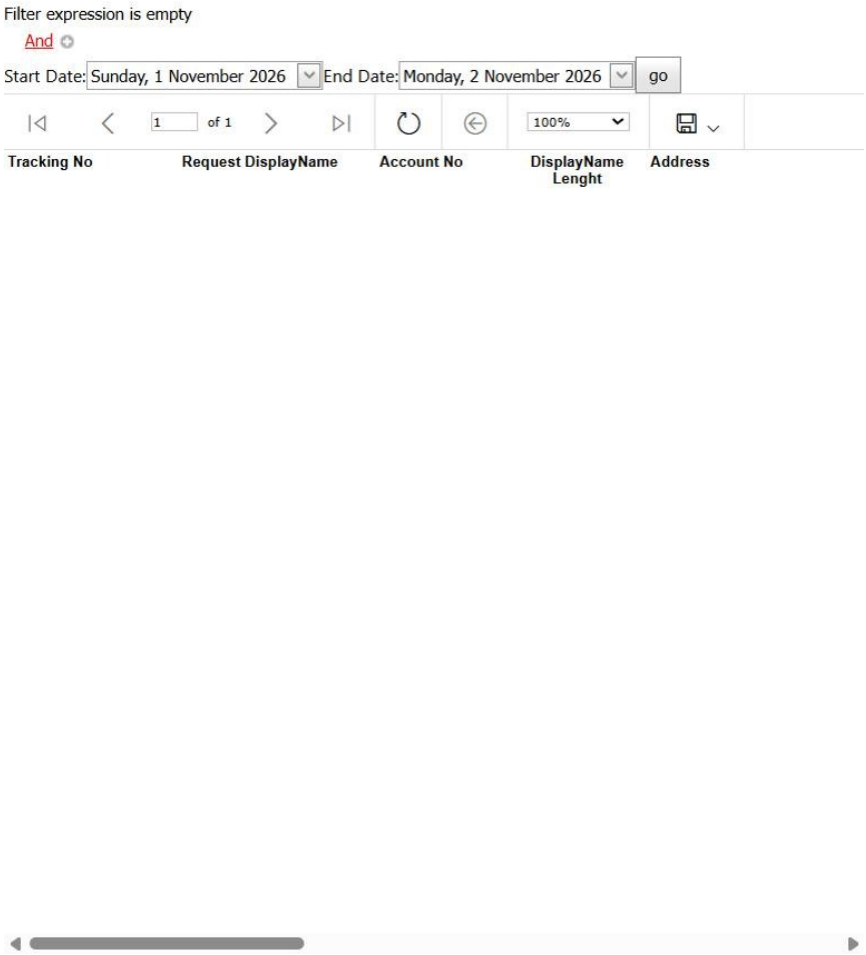

Figure 24: eChannels Request Report

Fields

Field	Type	Description
Filter expression (And / +)	Filter builder	Optional conditions to narrow the report (click And / + to add a condition).
Start Date	Date picker	Start (or issue) date.
End Date	Date picker	End (or expiry) date.

List columns: Tracking no, Request displayname, Account no, Displayname lenght, Address.

Buttons and actions

Button	What it does
go	Load the record / run the report.
First / Previous / Page / Next / Last	Move between report pages.
Refresh	Reload the list.
Back	Go back.
Zoom	Change the report zoom.
Export / Save	Export the report (e.g. PDF, Excel).

How to use this screen

1. Choose the Start Date and End Date.
2. Optionally add filter conditions.
3. Click go, then page through, zoom or export the results.

5.3 Customer AuditLog Reports

Menu path: Menu > Reports > Customer AuditLog Reports

Purpose: Audit trail of customer (application) activity: audit details, serial number, user ID, audit type and remarks.

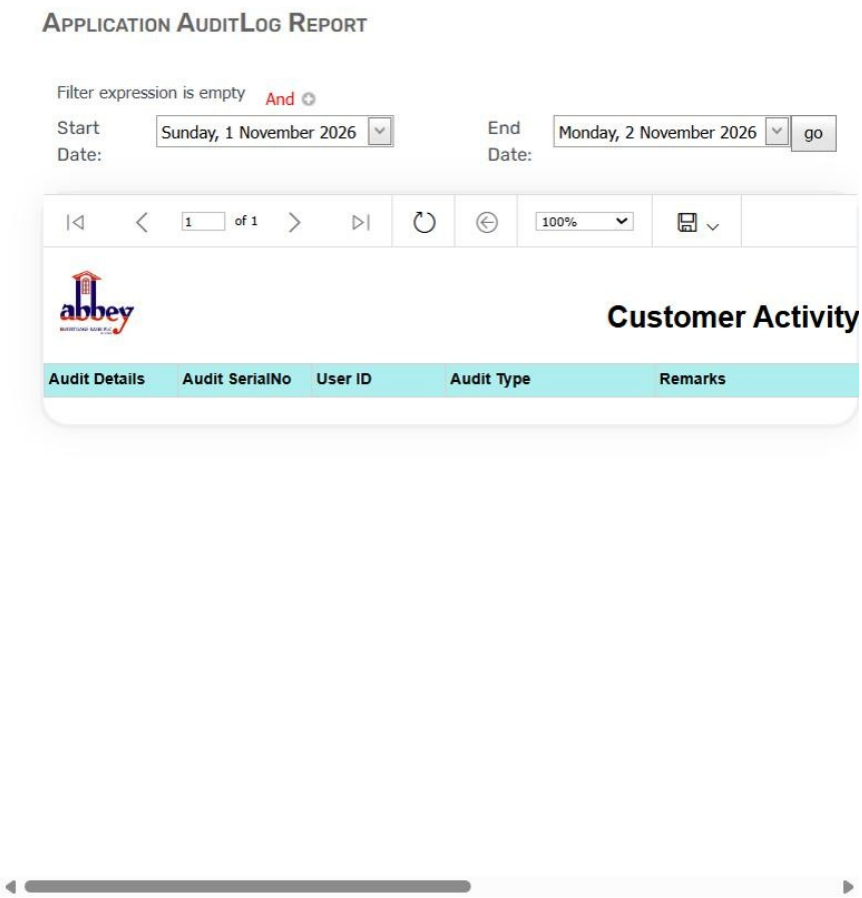

Figure 25: Application AuditLog Report

Fields

Field	Type	Description
Filter expression (And / +)	Filter builder	Optional conditions to narrow the report (click And / + to add a condition).
Start Date	Date picker	Start (or issue) date.
End Date	Date picker	End (or expiry) date.

List columns: Audit details, Audit serialno, User id, Audit type, Remarks.

Buttons and actions

Button	What it does
go	Load the record / run the report.
Page navigation	Move between report pages.
Refresh	Reload the list.
Zoom	Change the report zoom.
Export / Save	Export the report (e.g. PDF, Excel).

How to use this screen

1. Choose the Start Date and End Date and optional filters.
2. Click go.
3. Export the report using the save button if needed.

5.4 Unprofiled User AuditLog Reports

Menu path: Menu > Reports > Unprofiled User AuditLog Reports

Purpose: Audit trail of activity by users who are not yet profiled (unregistered or incomplete users).

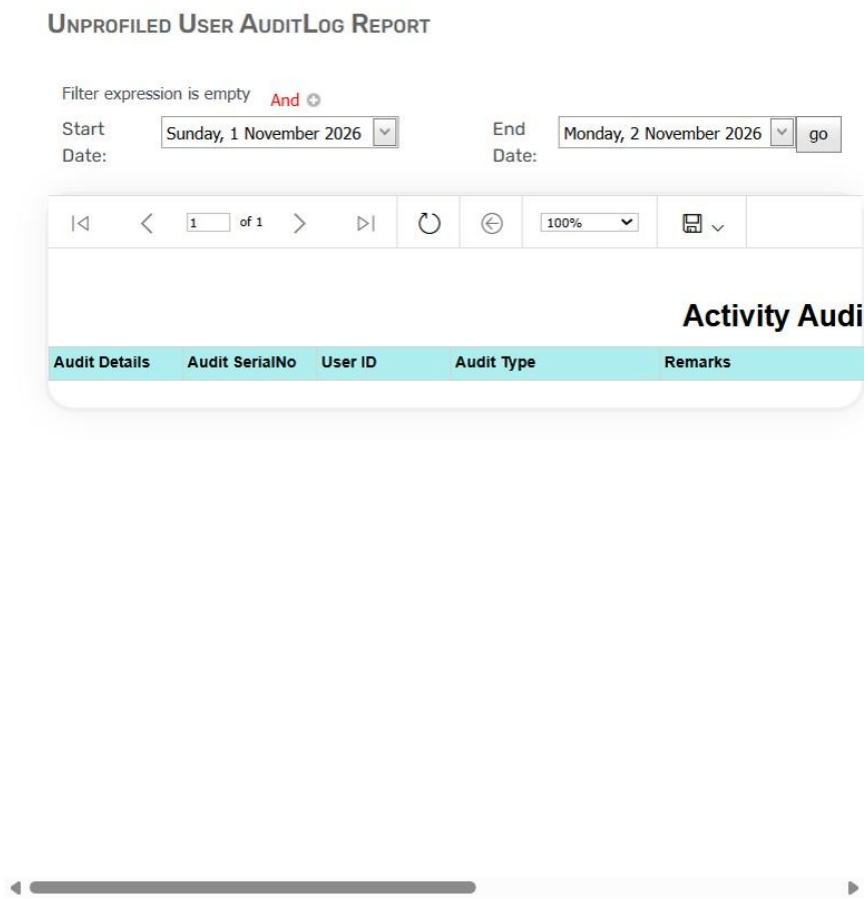

Figure 26: Unprofiled User AuditLog Report

Fields

Field	Type	Description
Filter expression (And / +)	Filter builder	Optional conditions to narrow the report (click And / + to add a condition).
Start Date	Date picker	Start (or issue) date.
End Date	Date picker	End (or expiry) date.

List columns: Audit details, Audit serialno, User id, Audit type, Remarks.

Buttons and actions

Button	What it does
go	Load the record / run the report.
Page navigation	Move between report pages.
Refresh	Reload the list.
Zoom	Change the report zoom.
Export / Save	Export the report (e.g. PDF, Excel).

How to use this screen

1. Choose the date range and optional filters.
2. Click go, then review or export.

5.5 User AuditLog Reports

Menu path: Menu > Reports > User AuditLog Reports

Purpose: Audit trail of back-office (backend) user activity.

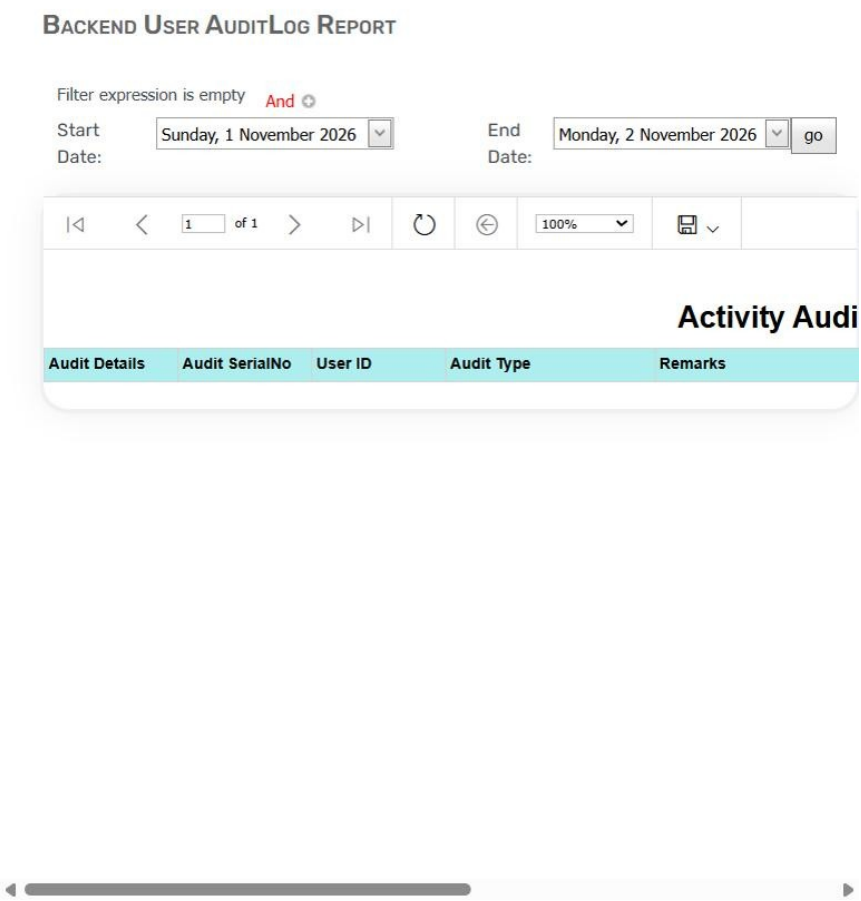

Figure 27: Backend User AuditLog Report

Fields

Field	Type	Description
Filter expression (And / +)	Filter builder	Optional conditions to narrow the report (click And / + to add a condition).
Start Date	Date picker	Start (or issue) date.
End Date	Date picker	End (or expiry) date.

List columns: Audit details, Audit serialno, User id, Audit type, Remarks.

Buttons and actions

Button	What it does
go	Load the record / run the report.
Page navigation	Move between report pages.
Refresh	Reload the list.
Zoom	Change the report zoom.
Export / Save	Export the report (e.g. PDF, Excel).

How to use this screen

1. Choose the date range and optional filters.

2. Click go, then review or export.

5.6 Customer Transaction Reports

Menu path: Menu > Reports > Customer Transaction Reports

Purpose: Customer transaction history (NIP log): transaction date, account, branch, posting date, narration and amount.

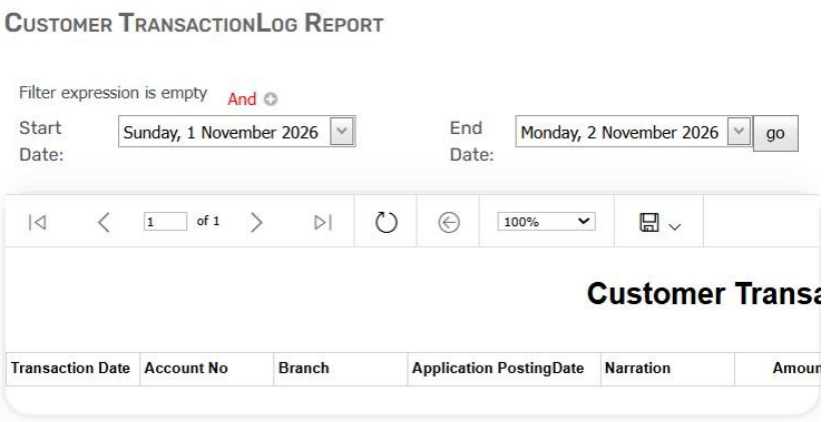

Figure 28: Customer TransactionLog Report

Fields

Field	Type	Description
Filter expression (And / +)	Filter builder	Optional conditions to narrow the report (click And / + to add a condition).
Start Date	Date picker	Start (or issue) date.
End Date	Date picker	End (or expiry) date.

List columns: Transaction date, Account no, Branch, Application postingdate, Narration, Amount.

Buttons and actions

Button	What it does
go	Load the record / run the report.
Page navigation	Move between report pages.

Button	What it does
Refresh	Reload the list.
Zoom	Change the report zoom.
Export / Save	Export the report (e.g. PDF, Excel).

How to use this screen

1. Choose the date range and optional filters (for example account number).
2. Click go, then review or export.

6. Approval

Checker screens. Each shows items waiting for your approval. Tick items, then approve or disapprove them; a reason is always required to disapprove.

6.1 Approve Bulk Payments

Menu path: Menu > Approval > Approve Bulk Payments

Purpose: Approves or rejects bulk payment batches uploaded through Bulk FundsTransfer.

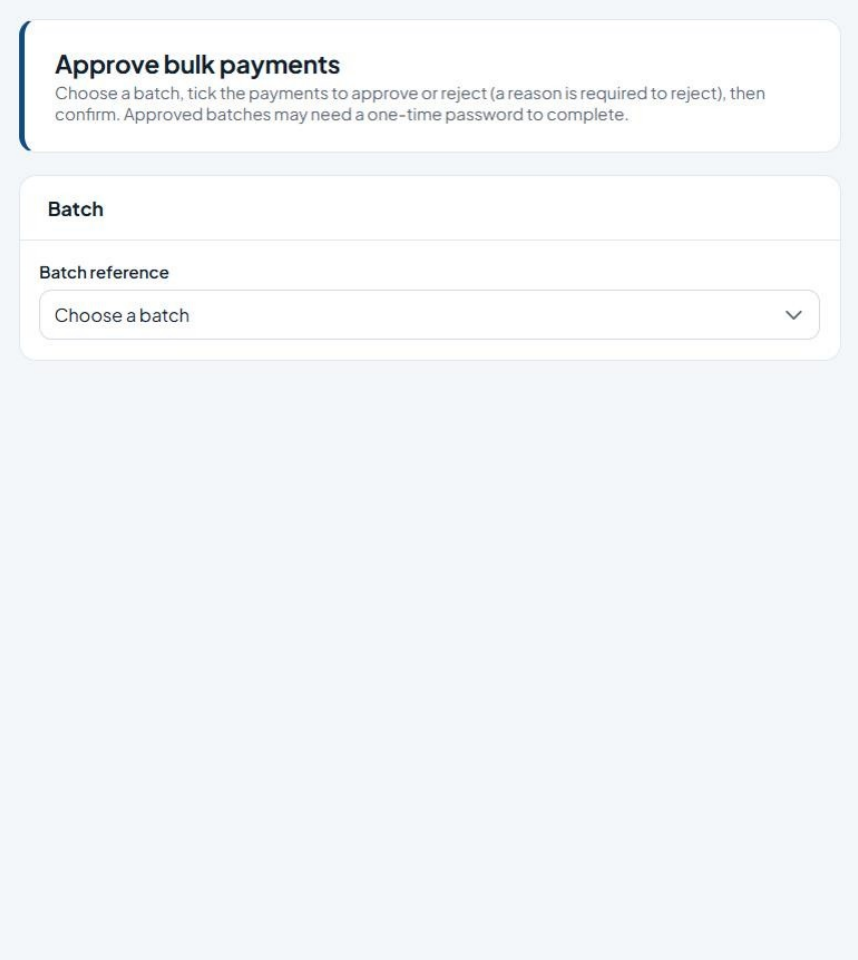

Figure 29: Approve bulk payments

Fields

Field	Type	Description
Batch reference	Drop-down list	The batch to work on.
Select (per payment)	Tick box	Tick to include the row(s) in the next action.
Reason (required to reject)	Text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

Buttons and actions

Button	What it does
Approve	Approve the ticked payments.

Button	What it does
Reject	Reject the ticked payments (reason required).
Confirm	Complete the approval or rejection (an OTP may be requested).

How to use this screen

1. Choose the Batch reference.
2. Review the payments in the batch and tick the ones to approve or reject.
3. To reject, enter a reason (required).
4. Confirm. Approved batches may ask for a one-time password (OTP) to complete.

Note: Choose a batch, tick the payments to approve or reject (a reason is required to reject), then confirm. Approved batches may need a one-time password (OTP) to complete.

6.2 Approve eChannels Request

Menu path: Menu > Approval > Approve eChannels Request

Purpose: Approves or disapproves card and e-channel requests raised for your branch (from eBranch Management > eChannels Requistion).

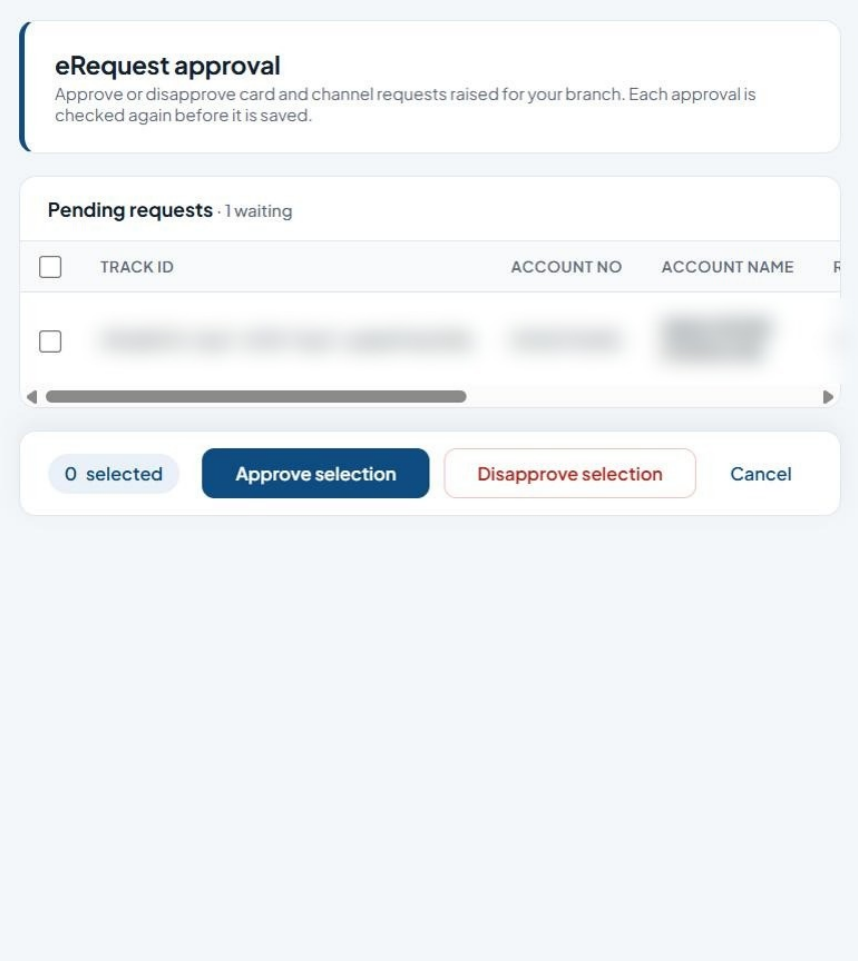

Figure 30: eRequest approval

Fields

Field	Type	Description
Select all / Select (per request)	Tick box	Tick to include the row(s) in the next action.
Reason	Multi-line text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

List columns: Track id, Account no, Account name, Request, Request date, Branch, Reason.

Buttons and actions

Button	What it does
Approve selection	Approve all ticked items.
Disapprove selection	Reject all ticked items (reason required).
Cancel	Discard and clear the selection.

How to use this screen

1. Review the Pending requests list.
2. Tick the request(s).
3. Click Approve selection, or enter a reason and click Disapprove selection.
4. Each approval is checked again before it is saved.

> **Note:** Approve or disapprove card and channel requests raised for your branch. Each approval is checked again before it is saved.

6.3 Approve Account Policy

Menu path: Menu > Approval > Approve Account Policy

Purpose: Approves or disapproves customer account policy changes requested under Administration > Customer Account Policy.

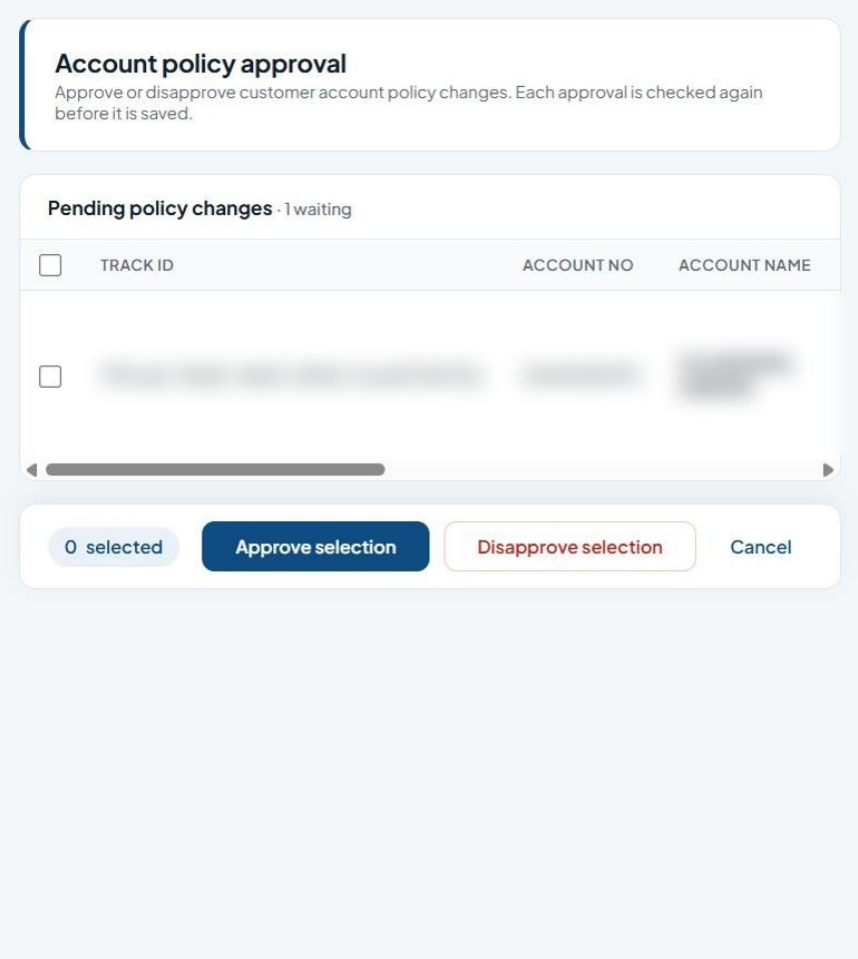

Figure 31: Account policy approval

Fields

Field	Type	Description
Select all / Select (per request)	Tick box	Tick to include the row(s) in the next action.
Reason	Multi-line text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

List columns: Track id, Account no, Account name, Policy type, Request, Policy value, Request date, Branch, Reason.

Buttons and actions

Button	What it does
Approve selection	Approve all ticked items.
Disapprove selection	Reject all ticked items (reason required).
Cancel	Discard and clear the selection.

How to use this screen

1. Review the pending policy changes (policy type, value, branch).
2. Tick the change(s).
3. Click Approve selection, or enter a reason and click Disapprove selection.

6.4 Approve User KYC Information

Menu path: Menu > Approval > Approve User KYC Information

Purpose: Reviews and approves KYC documents uploaded by customers.

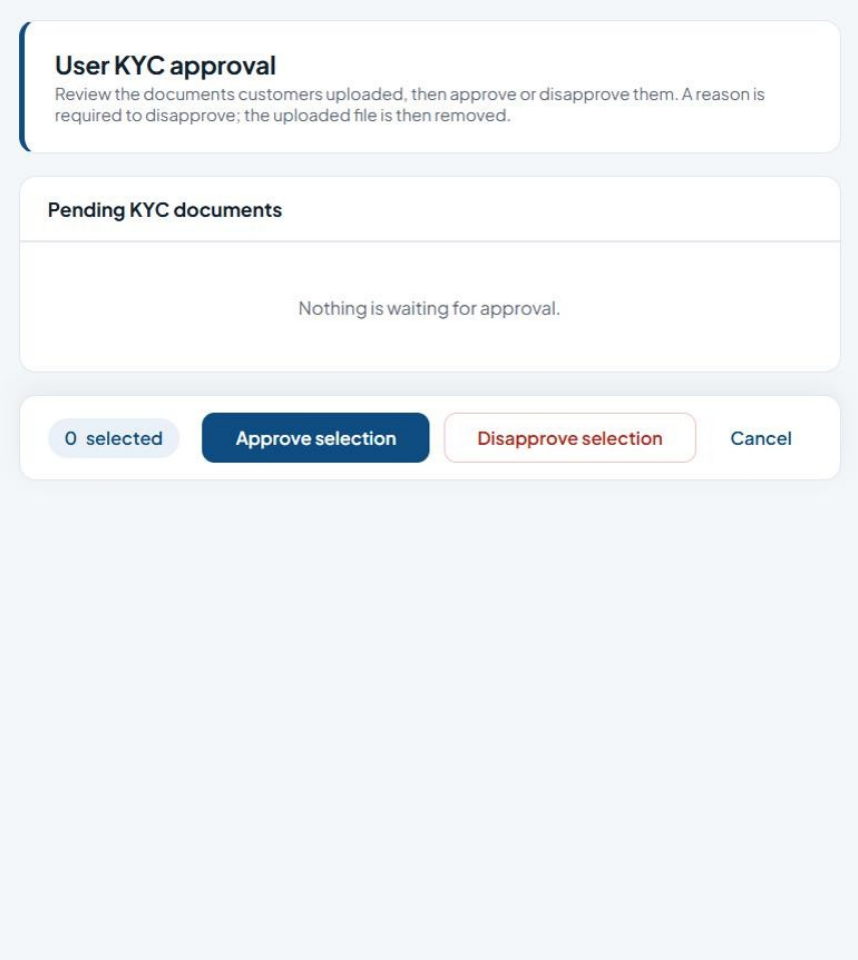

Figure 32: User KYC approval

Fields

Field	Type	Description
Select (per document)	Tick box	Tick to include the row(s) in the next action.
Reason (required to disapprove)	Text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

Buttons and actions

Button	What it does
Approve selection	Approve all ticked items.
Disapprove selection	Reject all ticked items (reason required).
Cancel	Discard and clear the selection.

How to use this screen

1. Open each pending document and check it.
2. Tick the document(s).

3. Click Approve selection, or enter a reason and click Disapprove selection. Disapproving removes the uploaded file.

> **Note:** Review documents customers uploaded. A reason is required to disapprove; the uploaded file is then removed.

6.5 Approve QRCode Information (QR merchants)

Menu path: Menu > Approval > Approve QRCode Information

Purpose: Approves merchants for NIBSS NQR (QR code) payments.

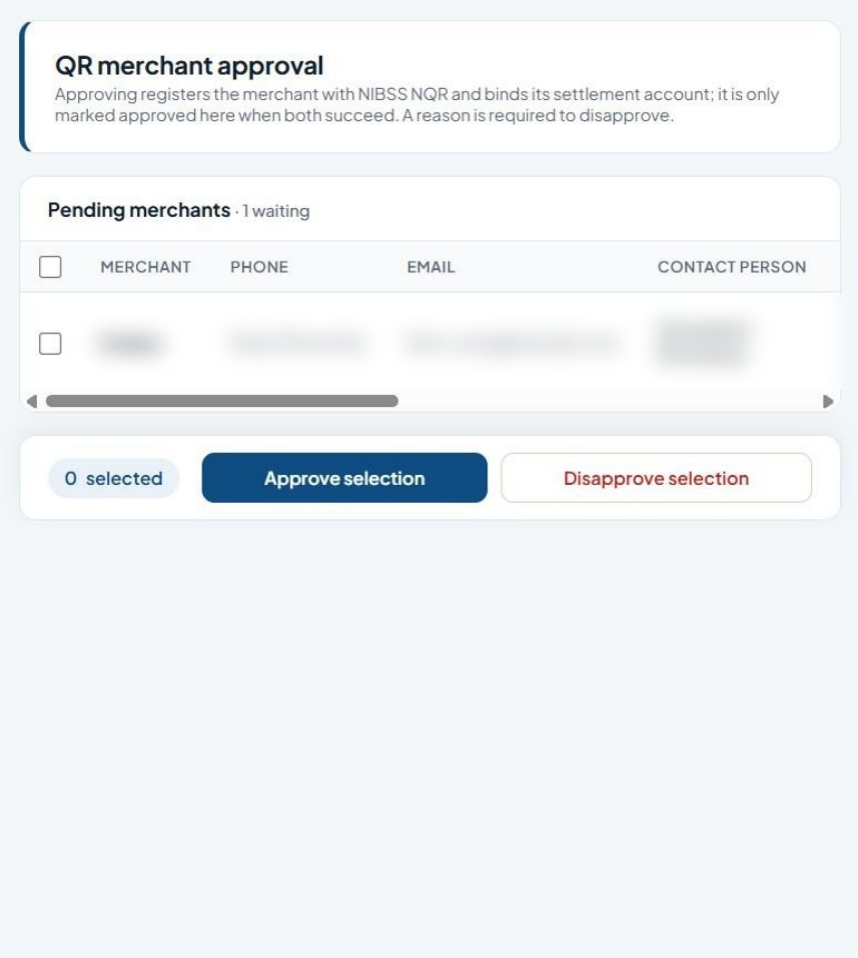

Figure 33: QR merchant approval

Fields

Field	Type	Description
Select all / Select (per merchant)	Tick box	Tick to include the row(s) in the next action.
Reason	Multi-line text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

List columns: Merchant, Phone, Email, Contact person, Tin, Account no, Account name, Address, Posted by, Reason.

Buttons and actions

Button	What it does
Approve selection	Approve all ticked items.
Disapprove selection	Reject all ticked items (reason required).

How to use this screen

1. Review the pending merchants (contact details, TIN, settlement account).
2. Tick the merchant(s) and click Approve selection. Approval registers the merchant with NIBSS NQR and binds the settlement account; it is only marked approved when both succeed.
3. To reject, enter a reason and click Disapprove selection.

Note: Approving registers the merchant with NIBSS NQR and binds its settlement account; it is only marked approved when both succeed. A reason is required to disapprove.

6.6 Approve Card Request

Menu path: Menu > Approval > Approve Card Request

Purpose: Approves or disapproves card requests.

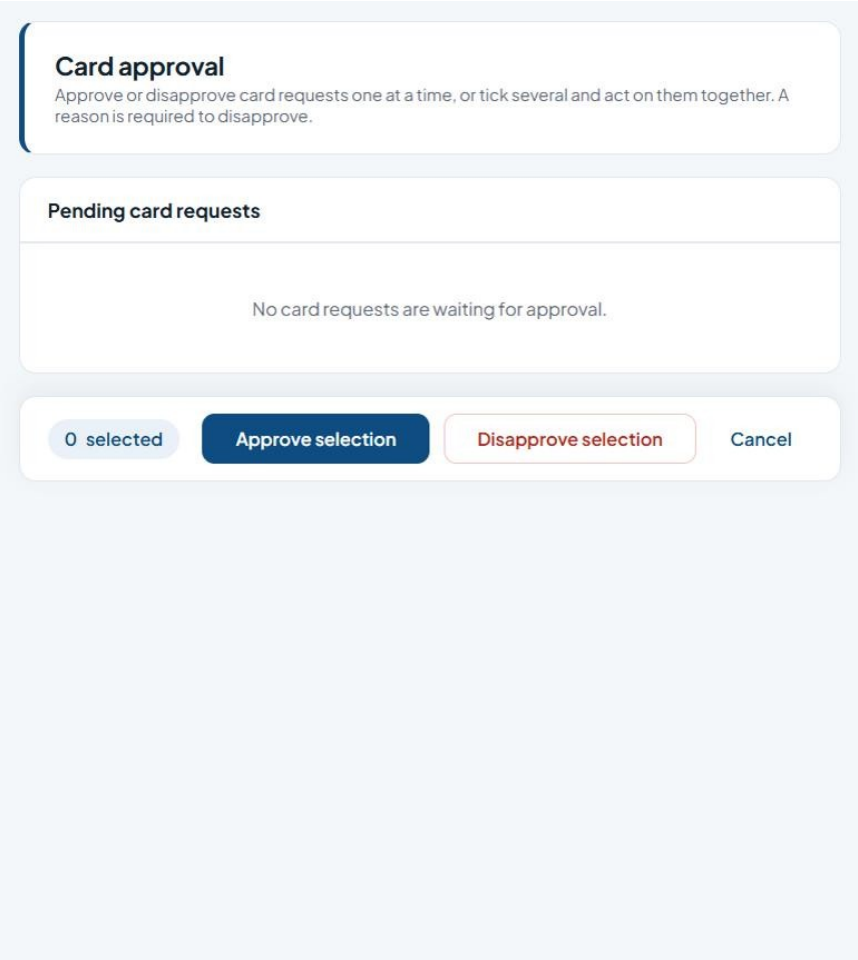

Figure 34: Card approval

Fields

Field	Type	Description
Select (per request)	Tick box	Tick to include the row(s) in the next action.
Reason (required to disapprove)	Text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

Buttons and actions

Button	What it does
Approve selection	Approve all ticked items.
Disapprove selection	Reject all ticked items (reason required).
Cancel	Discard and clear the selection.

How to use this screen

1. Review the Pending card requests.
2. Approve or disapprove them one at a time, or tick several and act on them together.
3. A reason is required to disapprove.

6.7 Approve NDD e-Mandate

Menu path: Menu > Approval > Approve NDD e-Mandate

Purpose: Approves NIBSS Direct Debit (NDD) e-mandates created under Direct Debit > Create eMandate. In the menu this appears as the second 'Approve QRCode Information' item.

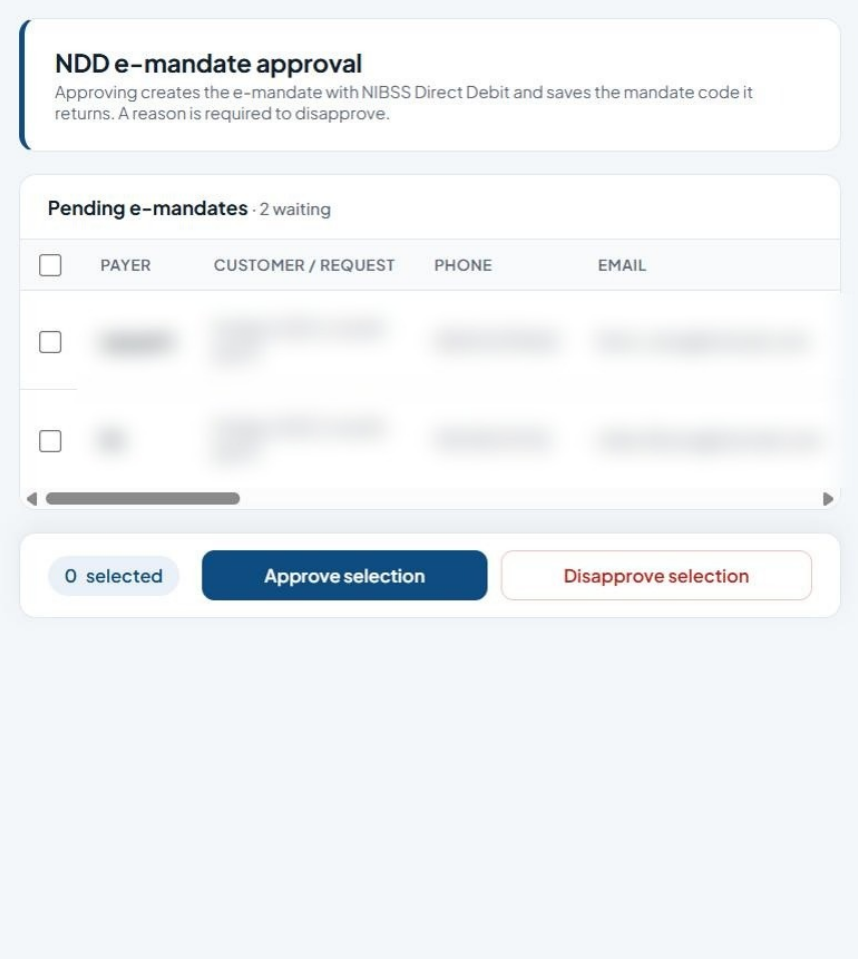

Figure 35: NDD e-mandate approval

Fields

Field	Type	Description
Select all / Select (per mandate)	Tick box	Tick to include the row(s) in the next action.
Reason	Multi-line text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

List columns: Payer, Customer / request, Phone, Email, Amount, Frequency, Narration, Start, End, Payer account, Payer account name, Biller account, Biller account name, Address, Bank, Fixed, Posted by, Reason.

Buttons and actions

Button	What it does
Approve selection	Approve all ticked items.
Disapprove selection	Reject all ticked items (reason required).

How to use this screen

1. Review the pending e-mandates (payer, amount, frequency, start/end, accounts).
2. Tick the mandate(s) and click Approve selection. Approval creates the mandate with NIBSS Direct Debit and saves the returned mandate code.
3. To reject, enter a reason and click Disapprove selection.

> **Note:** Approving creates the e-mandate with NIBSS Direct Debit and saves the mandate code it returns. A reason is required to disapprove.

7. Card Management

The card life cycle: request, approval, extraction/production, confirmation, allocation to accounts and de-allocation, including AfriGOPAY cards and mobile/USSD requests.

7.1 Generate Cards Request

Menu path: Menu > Card Management > Generate Cards Request

Purpose: Requests new cards for customer accounts. Every account submitted together shares one new batch reference, which then goes for approval and extraction.

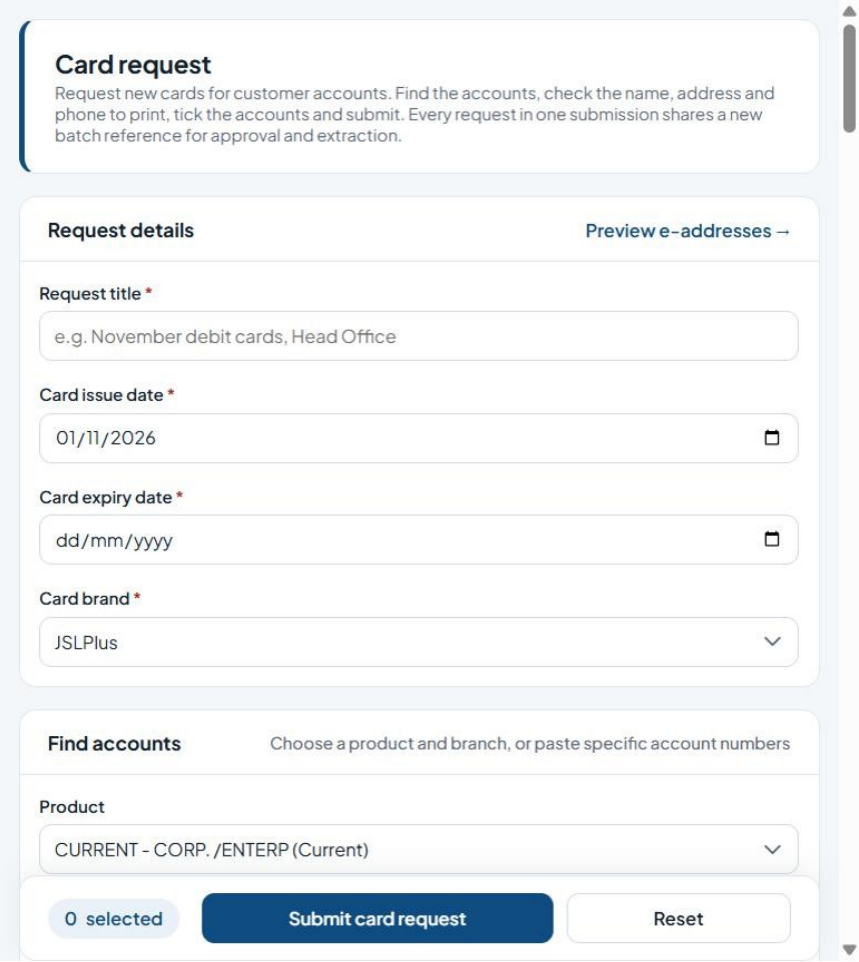

Figure 36: Card request

Fields

Field	Type	Description
Request title *	Text	Required. A short name for the request batch.
Card issue date *	Date picker	Required. Start (or issue) date.
Card expiry date *	Date picker	Required. End (or expiry) date.
Card brand *	Drop-down list	Required. The card scheme/brand to produce.
Product	Drop-down list	Account product to select customers by.
Branch	Drop-down list	The bank branch.

Field	Type	Description
Specific accounts (optional)	Multi-line text	Enter the specific accounts (optional).
Include every page (all listed accounts)	Tick box	Tick to enable.

List columns: Account no, Card display name, Product, Date of birth, Address, City, Phone, Transaction status, Account status.

Buttons and actions

Button	What it does
Load accounts	List the accounts for the chosen product and branch (or the pasted accounts).
Submit card request	Submit the ticked accounts as one new card request batch.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. Enter the Request title and the Card issue date and Card expiry date (expiry must be after issue), and choose the Card brand.
2. Under Find accounts choose the Product and Branch, or paste account numbers into Specific accounts, and click Load accounts.
3. In the list, check (and correct if needed) each customer's card display name, address, city and phone.
4. Tick the accounts to include, or tick Include every page to take every listed account.
5. Click Submit card request. The new batch reference is shown; the batch appears under Approval > Approve Card Request.
6. Reset clears the page.

7.2 Cards Extraction

Menu path: Menu > Card Management > Cards Extraction

Purpose: Lists approved card batches waiting for extraction. Extracting writes the card-production files for a batch into its own folder under the extraction path and moves the batch on.

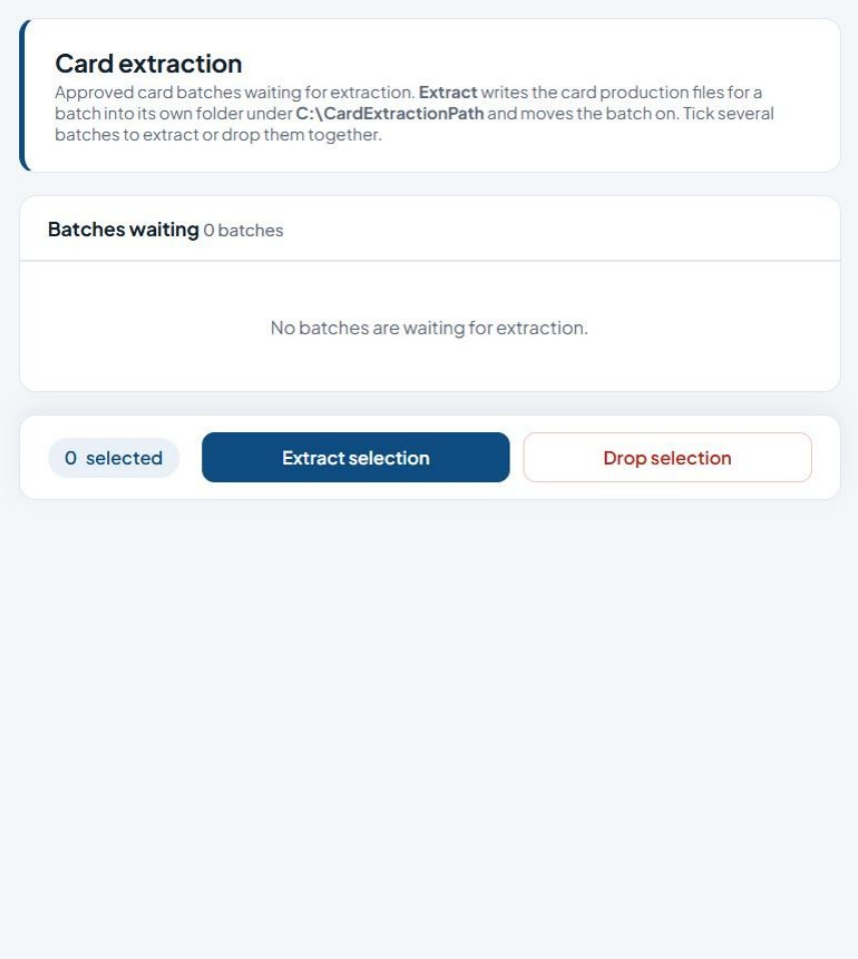

Figure 37: Card extraction

List columns: Request title, Batch ref, Issue date, Expiry date, Generated by.

Buttons and actions

Button	What it does
Extract selection	Write the card production files for the ticked batches.
Extract	Extract that batch.
Drop selection	Remove the ticked items (you are asked to confirm).

How to use this screen

1. Find the batch in Batches waiting (request title, batch ref, issue and expiry dates, generated by).
2. Click Extract on a row, or tick several batches and click Extract selection.
3. Click Drop selection to take ticked batches out of the queue (you are asked to confirm).
4. Collect the files from Card Management > Card Extraction Download.

7.3 Cards Extraction (AfroGOPAY)

Menu path: Menu > Card Management > Cards Extraction

Purpose: Generates AfriGOPAY cards for approved batches.

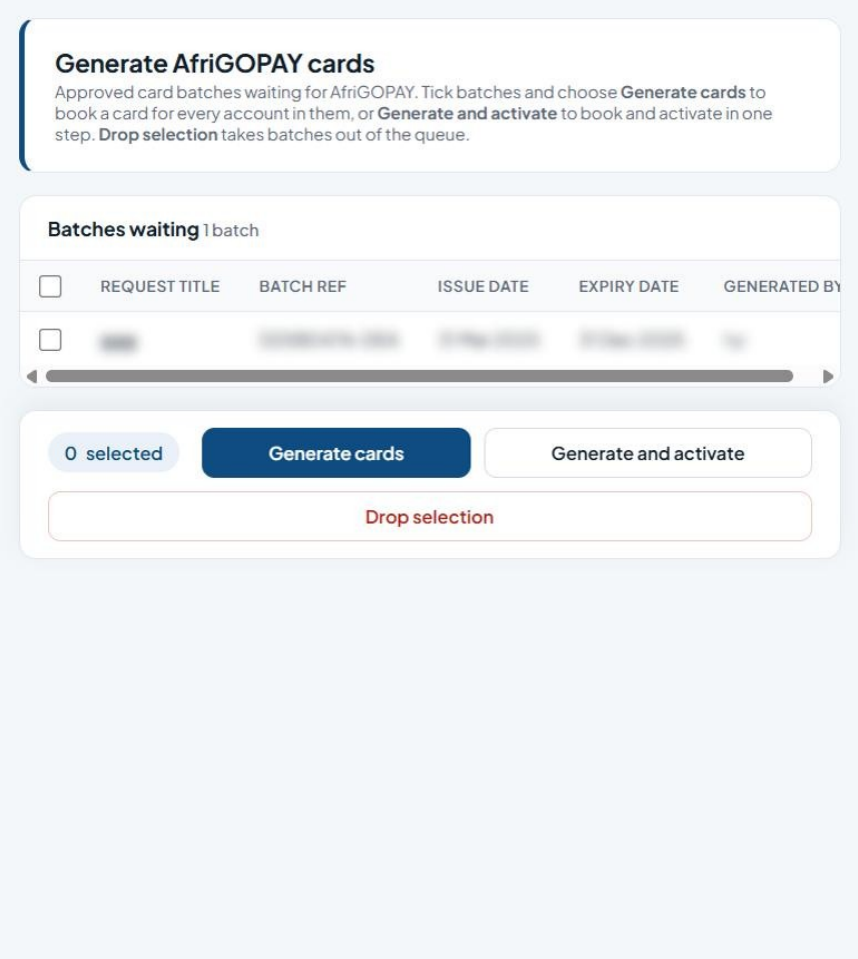

Figure 38: Generate AfriGOPAY cards

List columns: Request title, Batch ref, Issue date, Expiry date, Generated by.

Buttons and actions

Button	What it does
Generate cards	Book a card for every account in the ticked batches.
Generate and activate	Book and activate the cards in one step.
Drop selection	Remove the ticked items (you are asked to confirm).

How to use this screen

1. Tick the batch(es) in Batches waiting.
2. Click Generate cards to book a card for every account in them, or Generate and activate to book and activate in one step.
3. Click Drop selection to remove ticked batches from the queue.
4. Generated (not yet activated) cards are activated under Cards Activation (AfroGOPAY).

7.4 Cards Activation (AfroGOPAY)

Menu path: Menu > Card Management > Cards Activation

Purpose: Activates AfriGOPAY cards that have been generated but not yet activated.

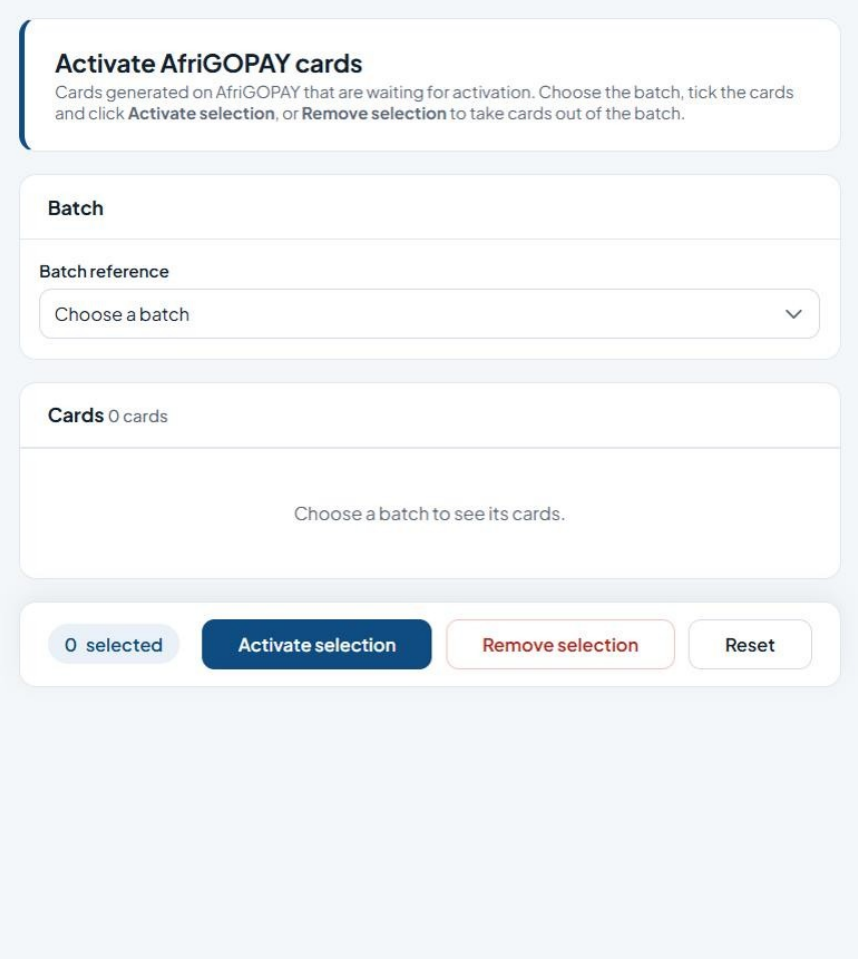

Figure 39: Activate AfriGOPAY cards

Fields

Field	Type	Description
Batch reference	Drop-down list	The batch to work on.

List columns: Account no, Card display name, Product, Pan, Issued, Expires, Issue count, Address.

Buttons and actions

Button	What it does
Activate selection	Activate the ticked items.
Remove selection	Take the ticked cards out of the batch.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. Choose the Batch reference.
2. Tick the cards to activate (the header box ticks the whole page).
3. Click Activate selection, or Remove selection to take cards out of the batch.
4. Reset clears the page.

7.5 Card RequestMobile

Menu path: Menu > Card Management > Card RequestMobile

Purpose: Card requests for customers onboarded on the mobile channel. It works exactly like Generate Cards Request, with the card PAN shown in the list.

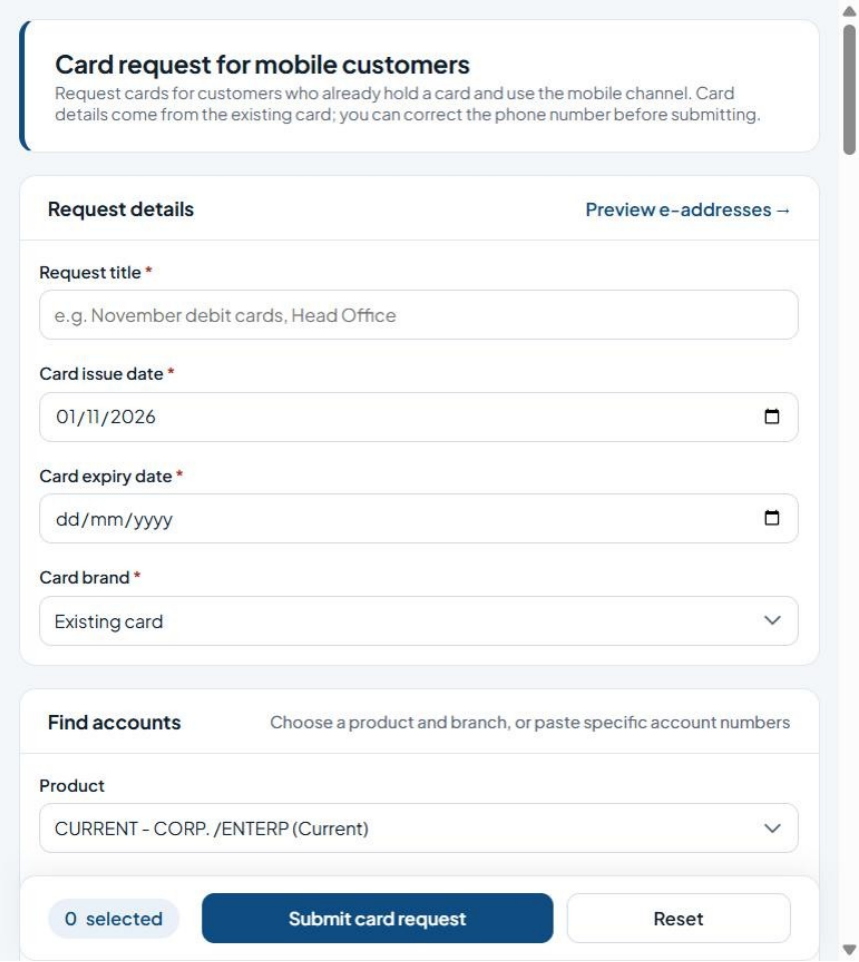

Figure 40: Card request for mobile customers

Fields

Field	Type	Description
Request title *	Text	Required. A short name for the request batch.
Card issue date *	Date picker	Required. Start (or issue) date.
Card expiry date *	Date picker	Required. End (or expiry) date.
Card brand *	Drop-down list	Required. The card scheme/brand to produce.
Product	Drop-down list	Account product to select customers by.
Branch	Drop-down list	The bank branch.
Specific accounts (optional)	Multi-line text	Enter the specific accounts (optional).
Include every page (all listed accounts)	Tick box	Tick to enable.

List columns: Account no, Card (pan), Card display name, Product, Address, City, Phone, Transaction status, Account status.

Buttons and actions

Button	What it does
Load accounts	List the accounts for the chosen product and branch (or the pasted accounts).
Submit card request	Submit the ticked accounts as one new card request batch.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. Enter the Request title, issue and expiry dates and Card brand.
2. Choose Product and Branch (or paste specific accounts) and click Load accounts.
3. Check the customers' details, tick the accounts (or Include every page) and click Submit card request.

7.6 Card Extraction Download

Menu path: Menu > Card Management > Card Extraction Download

Purpose: A read-only file browser for the card extraction files. It opens at the card extraction folder (C:\CardExtractionPath unless set otherwise in the site settings) and cannot go outside it. Each download is recorded in the audit log.

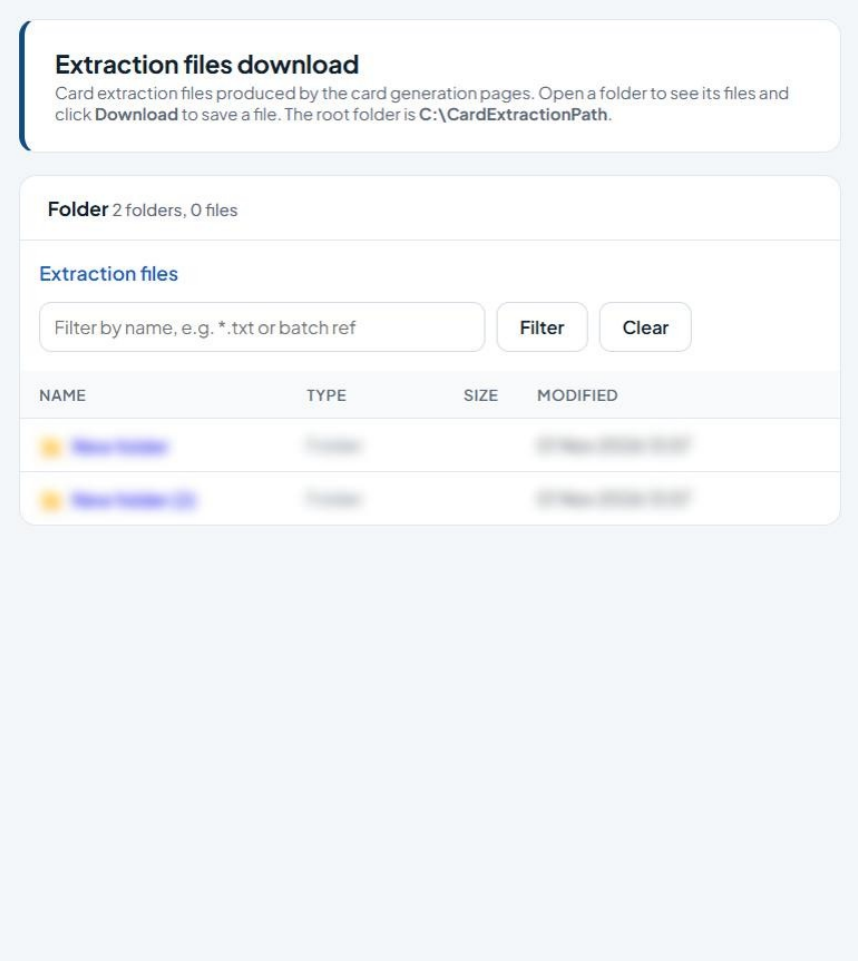

Figure 41: Extraction files download

Fields

Field	Type	Description
Filter by name (e.g. *.txt or batch ref)	Text	The batch to work on.

List columns: Name, Type, Size, Modified.

Buttons and actions

Button	What it does
Filter	Show only names that match the filter.
Clear	Clear the form without saving.
Download	Save the file to your computer.

How to use this screen

1. Click a folder name to open it; use the folder path at the top to go back up.
2. Type part of a name (or a pattern such as *.txt) and click Filter; Clear shows everything again.
3. Click Download on a file to save it to your computer.

7.7 Card USSD

Menu path: Menu > Card Management > Card USSD

Purpose: Card requests for customers onboarded on USSD. It works exactly like Generate Cards Request, with the card PAN shown in the list.

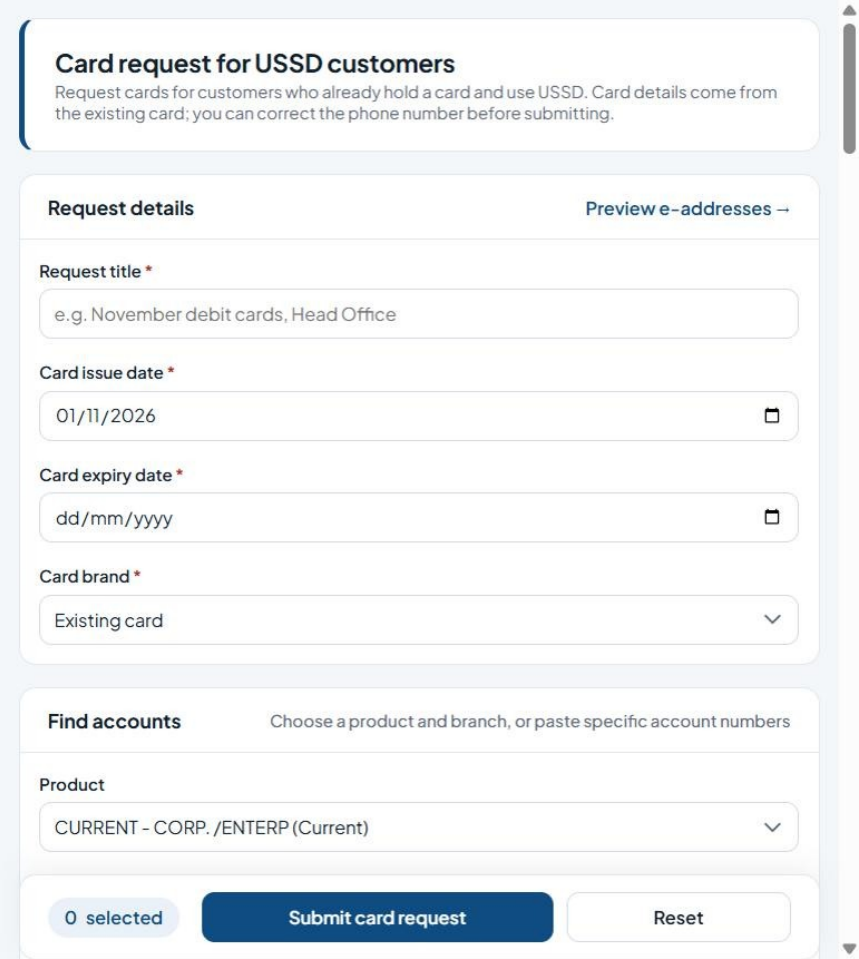

Figure 42: Card request for USSD customers

Fields

Field	Type	Description
Request title *	Text	Required. A short name for the request batch.
Card issue date *	Date picker	Required. Start (or issue) date.
Card expiry date *	Date picker	Required. End (or expiry) date.
Card brand *	Drop-down list	Required. The card scheme/brand to produce.
Product	Drop-down list	Account product to select customers by.
Branch	Drop-down list	The bank branch.
Specific accounts (optional)	Multi-line text	Enter the specific accounts (optional).
Include every page (all listed accounts)	Tick box	Tick to enable.

List columns: Account no, Card (pan), Card display name, Product, Address, City, Phone, Transaction status, Account status.

Buttons and actions

Button	What it does
Load accounts	List the accounts for the chosen product and branch (or the pasted accounts).

Button	What it does
Submit card request	Submit the ticked accounts as one new card request batch.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. Enter the Request title, issue and expiry dates and Card brand.
2. Choose Product and Branch (or paste specific accounts) and click Load accounts.
3. Check the customers' details, tick the accounts (or Include every page) and click Submit card request.

7.8 eRequest Booking

Menu path: Menu > Card Management > eRequest Booking

Purpose: Books card and e-channel requests sent in from the remote channels for your branch into a new card request batch, or drops them.

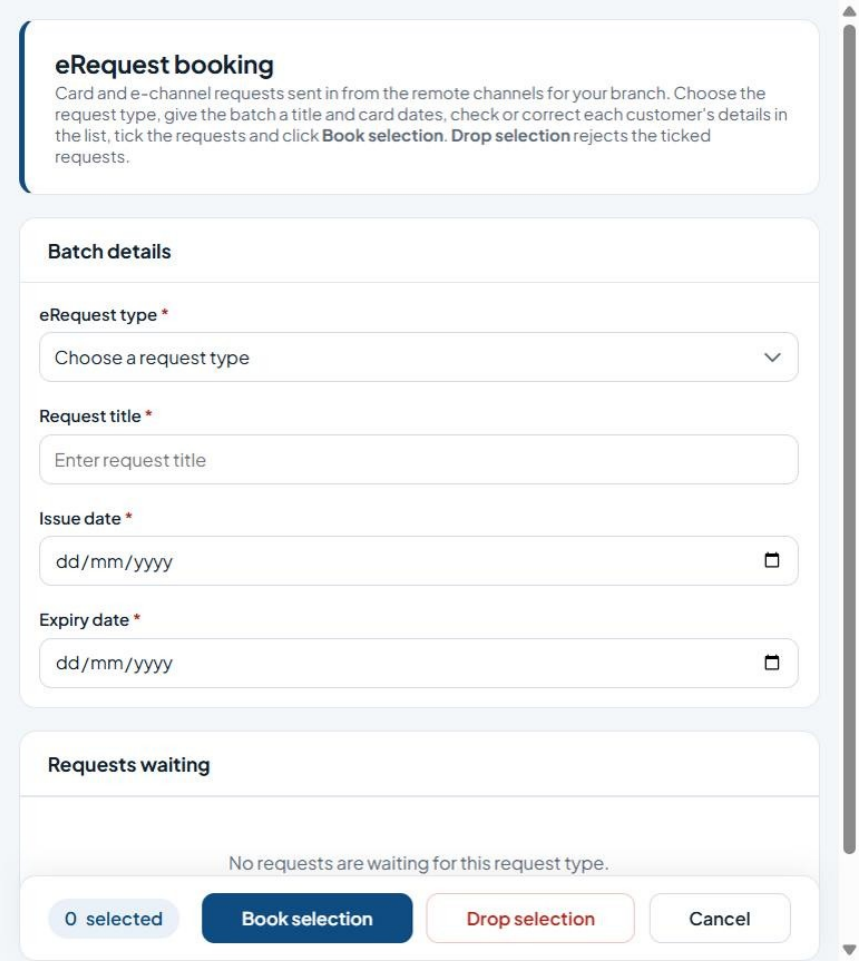

Figure 43: eRequest booking

Fields

Field	Type	Description
eRequest type *	Drop-down list	Required. Choose the type from the list.
Request title *	Text	Required. A short name for the request batch.

Field	Type	Description
Issue date *	Date picker	Required. Start (or issue) date.
Expiry date *	Date picker	Required. End (or expiry) date.

List columns: Branch, Track id, Account no, Display name, Product, Date of birth, Address, City, Phone no, Transaction status, Account status.

Buttons and actions

Button	What it does
Book selection	Book the ticked requests into a new batch.
Drop selection	Remove the ticked items (you are asked to confirm).
Cancel	Discard and clear the selection.

How to use this screen

1. Choose the eRequest type. The waiting requests are listed, grouped by branch.
2. Enter the Request title and the Issue date and Expiry date (expiry must be after issue).
3. Check each customer's display name, address, city, phone and date of birth and correct them in the list if needed.
4. Tick the requests and click Book selection. They are booked into a new batch (the reference is shown) and marked booked.
5. To reject requests, tick them and click Drop selection. Cancel reloads the page.

7.9 Cards Confirmation / Cards Maintenance

Menu path: Menu > Card Management > Cards Confirmation

Purpose: Confirms the cards produced for a batch (also opened from the Cards Maintenance menu item).

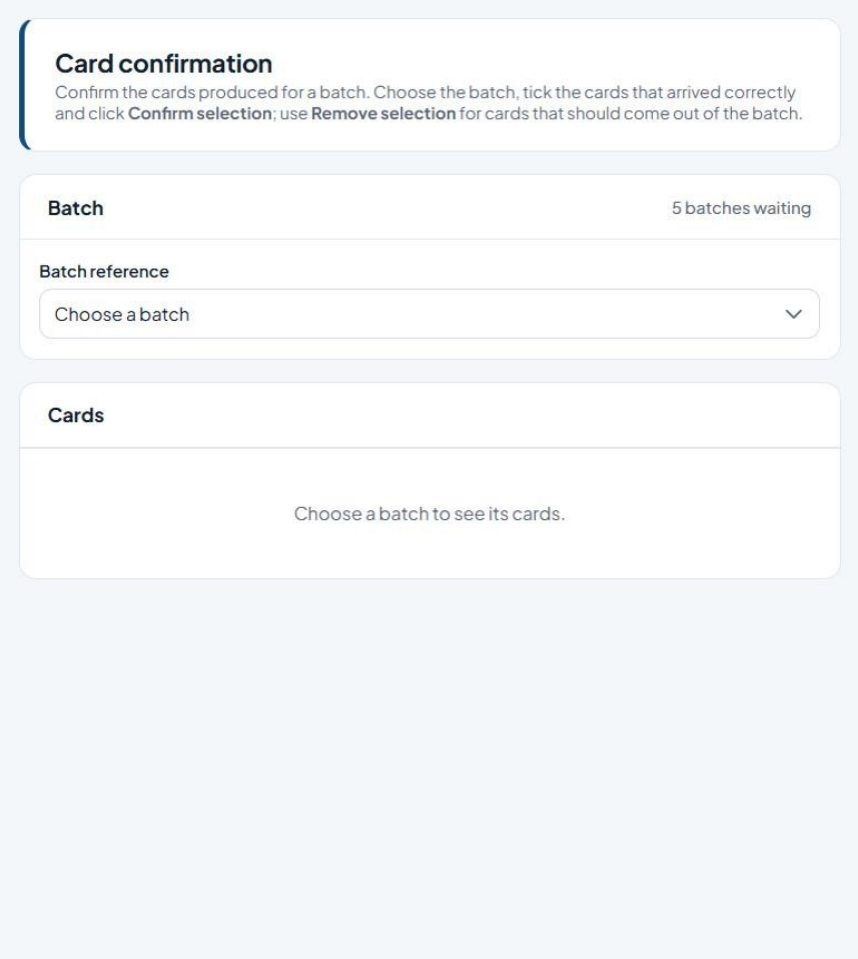

Figure 44: Card confirmation

Fields

Field	Type	Description
Batch reference	Drop-down list	The batch to work on.

List columns: Account no, Card display name, Product, Pan, Issued, Expires, Issue count, Address.

Buttons and actions

Button	What it does
Confirm selection	Confirm (or link) the ticked cards.
Remove selection	Take the ticked cards out of the batch.
Cancel	Discard and clear the selection.

How to use this screen

1. Choose the Batch reference.
2. Tick the cards that arrived correctly and click Confirm selection.
3. Tick cards that should come out of the batch and click Remove selection.
4. Cancel clears the selection.

7.10 Cards Allocation

Menu path: Menu > Card Management > Cards Allocation

Purpose: Links the cards allocated to you to customer accounts.

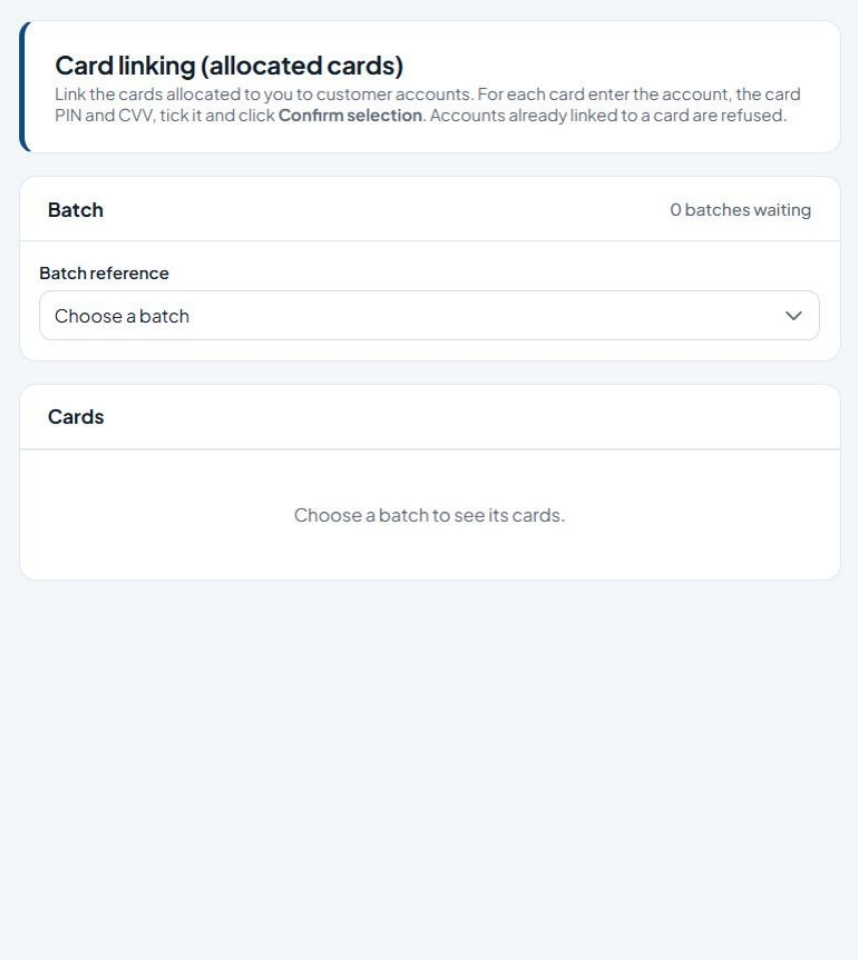

Figure 45: Card linking (allocated cards)

Fields

Field	Type	Description
Batch reference	Drop-down list	The batch to work on.

List columns: Account no, Card display name, Product, Pan, Card pin, Cvv, Issued, Expires, Link account.

Buttons and actions

Button	What it does
Confirm selection	Confirm (or link) the ticked cards.
Cancel	Discard and clear the selection.

How to use this screen

1. Choose the Batch reference.
2. For each card, enter the Link account, Card PIN and CVV.

3. Tick the cards and click Confirm selection. Accounts already linked to a card are refused and listed in the message.

7.11 Cards DeAllocation

Menu path: Menu > Card Management > Cards DeAllocation

Purpose: Takes allocated cards back from branch officers; the cards return to the pool for allocation again.

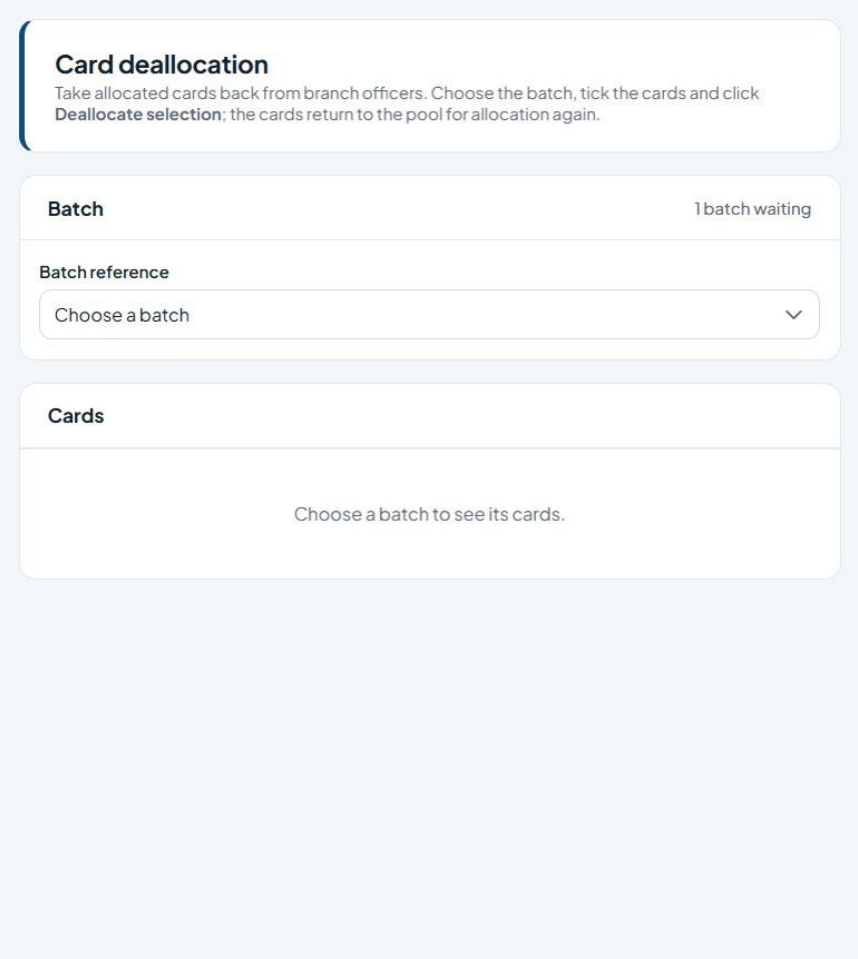

Figure 46: Card deallocation

Fields

Field	Type	Description
Batch reference	Drop-down list	The batch to work on.

List columns: Account no, Card display name, Product, Pan, Issued, Expires, Officer.

Buttons and actions

Button	What it does
Deallocate selection	Return the ticked cards to the pool.
Cancel	Discard and clear the selection.

How to use this screen

1. Choose the Batch reference. The Officer column shows who holds each card.
2. Tick the cards and click Deallocate selection.

8. Broadcast

Bulk e-mail and SMS notifications to customers, statement e-mails (immediate or scheduled), and the upload of terminal (POS) settlement files.

8.1 Bulk Email

Menu path: Menu > Broadcast > Bulk Email

Purpose: Sends a bulk e-mail to customers chosen by product and branch, or by a pasted list of accounts. Placeholders in the message are filled in for each account.

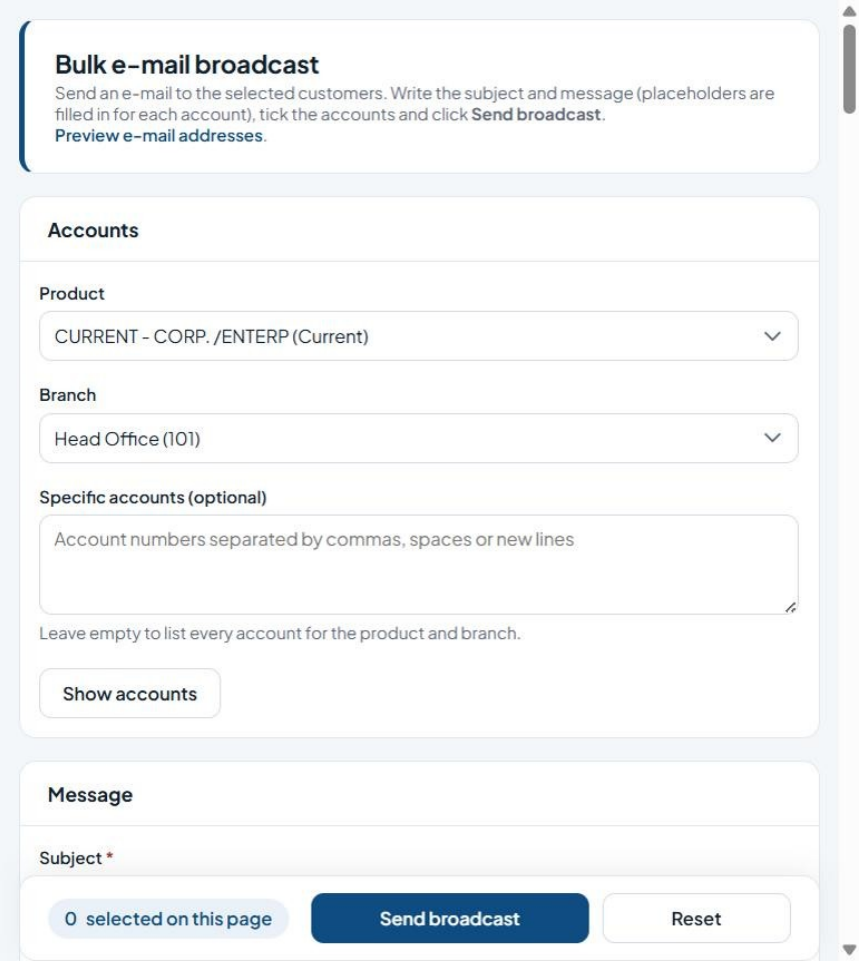

Figure 47: Bulk e-mail broadcast

Fields

Field	Type	Description
Product	Drop-down list	Account product to select customers by.
Branch	Drop-down list	The bank branch.
Specific accounts (optional)	Multi-line text	Enter the specific accounts (optional).
Subject *	Text	Required. Enter the subject.
Plain message / HTML message	Option buttons	Choose plain-text or HTML formatting.
Message *	Multi-line text	Required. Enter the message.

Field	Type	Description
Send to every listed account (all pages)	Tick box	Tick to enable.

List columns: Account no, Account name, Product, Date of birth, Address, City, Book bal, Cleared bal, Transaction status, Account status.

Buttons and actions

Button	What it does
Show accounts	List the accounts for the chosen product and branch (or the pasted accounts).
Send broadcast	Send the message to the ticked (or all listed) accounts.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. Under Accounts choose Product and Branch (or paste Specific accounts) and click Show accounts.
2. Enter the Subject, choose Plain message or HTML message and write the Message.
3. Tick the recipients, or tick Send to every listed account (all pages).
4. Click Send broadcast. The result shows how many were sent and lists any that failed (for example, no valid e-mail address).
5. Reset clears the page.

8.2 Bulk SMS

Menu path: Menu > Broadcast > Bulk SMS

Purpose: Sends a bulk SMS to the selected customers, optionally charging the SMS fee to their accounts.

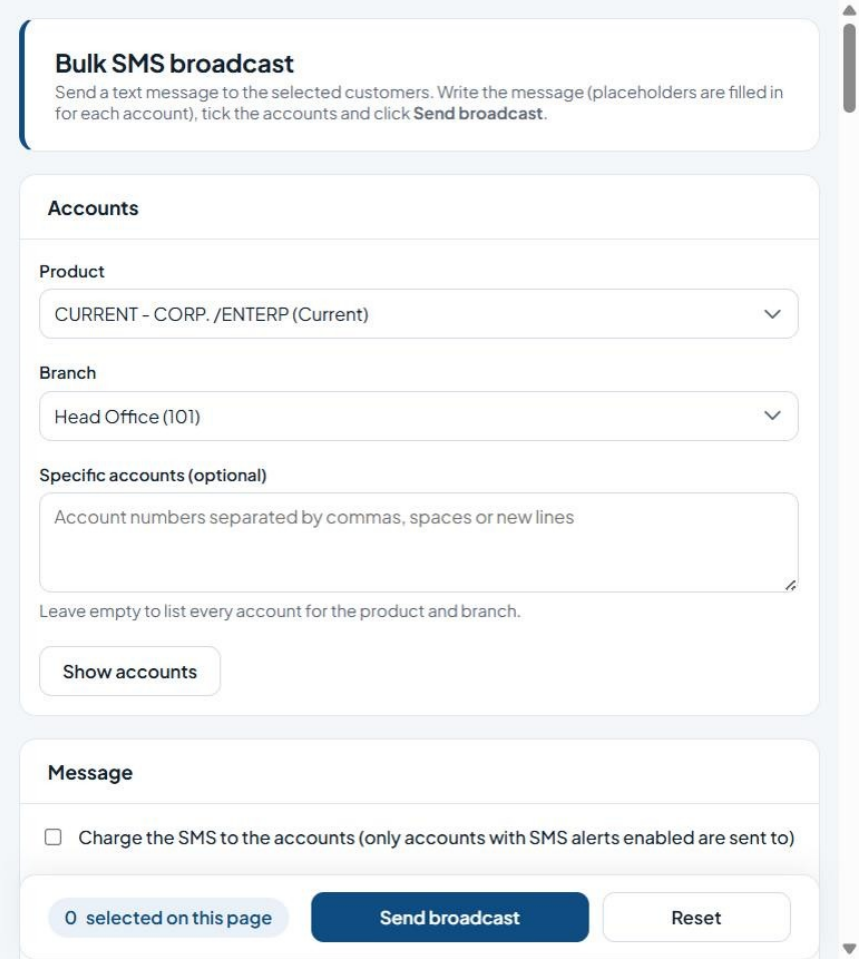

Figure 48: Bulk SMS broadcast

Fields

Field	Type	Description
Product	Drop-down list	Account product to select customers by.
Branch	Drop-down list	The bank branch.
Specific accounts (optional)	Multi-line text	Enter the specific accounts (optional).
Charge the SMS to the accounts	Tick box	Tick to enable.
Message *	Multi-line text	Required. Enter the message.
Send to every listed account (all pages)	Tick box	Tick to enable.

List columns: Account no, Account name, Product, Date of birth, Address, City, Book bal, Cleared bal, Transaction status, Account status.

Buttons and actions

Button	What it does
Show accounts	List the accounts for the chosen product and branch (or the pasted accounts).
Send broadcast	Send the message to the ticked (or all listed) accounts.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. Choose Product and Branch (or paste Specific accounts) and click Show accounts.
2. Tick Charge the SMS to the accounts if customers should pay for the message (only accounts with SMS alerts switched on are then sent to).
3. Write the Message.
4. Tick the recipients (or Send to every listed account) and click Send broadcast. The counter at the bottom shows how many are ticked on the page.

8.3 eTransactions Upload

Menu path: Menu > Broadcast > eTransactions Upload

Purpose: Uploads a tab-separated POS settlement file (terminal transactions) and posts it for approval.

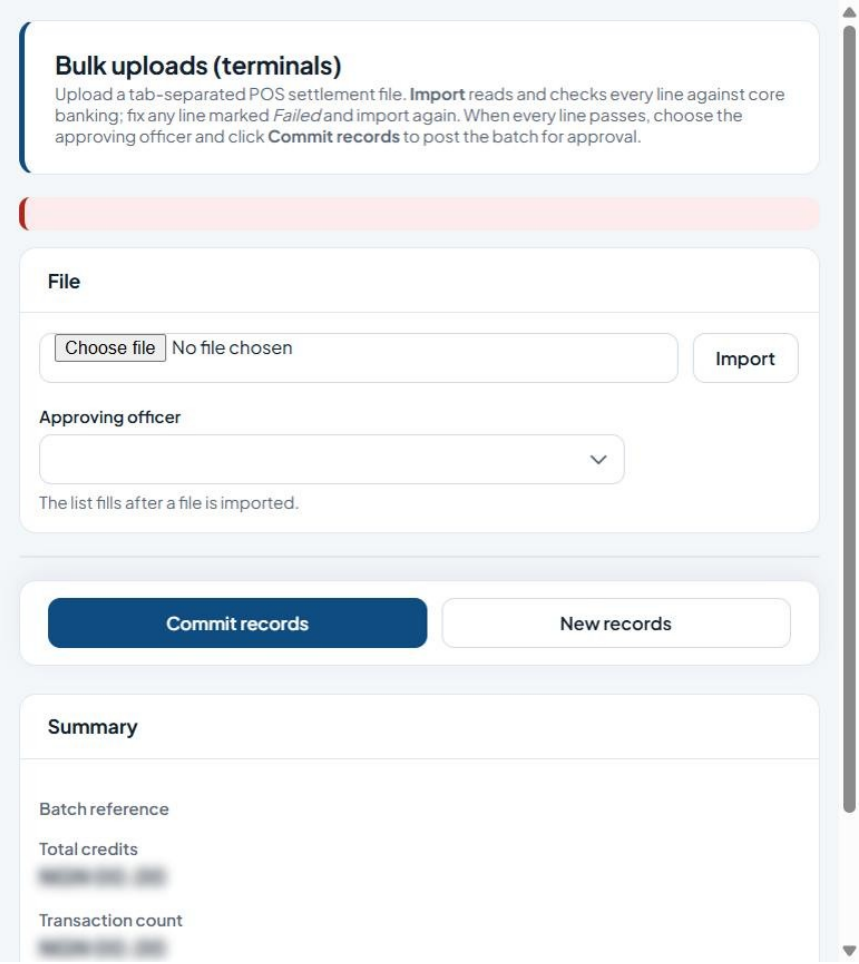

Figure 49: Bulk uploads (terminals)

Fields

Field	Type	Description
Settlement file	File picker	Enter the settlement file.
Approving officer	Drop-down list	The officer who will approve the upload.

Buttons and actions

Button	What it does
Import	Read and check the chosen file.
Commit records	Post the imported batch for approval.
New records	Clear the screen for a new upload.

How to use this screen

1. Click Choose file and pick the settlement file, then click Import.
2. Every line is checked against core banking. The Summary shows the batch reference, total credits, transaction count and failed count. Fix any line marked Failed in the file and import again.
3. When every line passes, choose the Approving officer (the list fills after an import).
4. Click Commit records to post the batch for approval, or New records to start again.

8.4 E-statements

Menu path: Not on the menu: open eOperations/eStatement.aspx (or add it to a role)

Purpose: E-mails each selected customer a password-protected PDF statement for the chosen period.

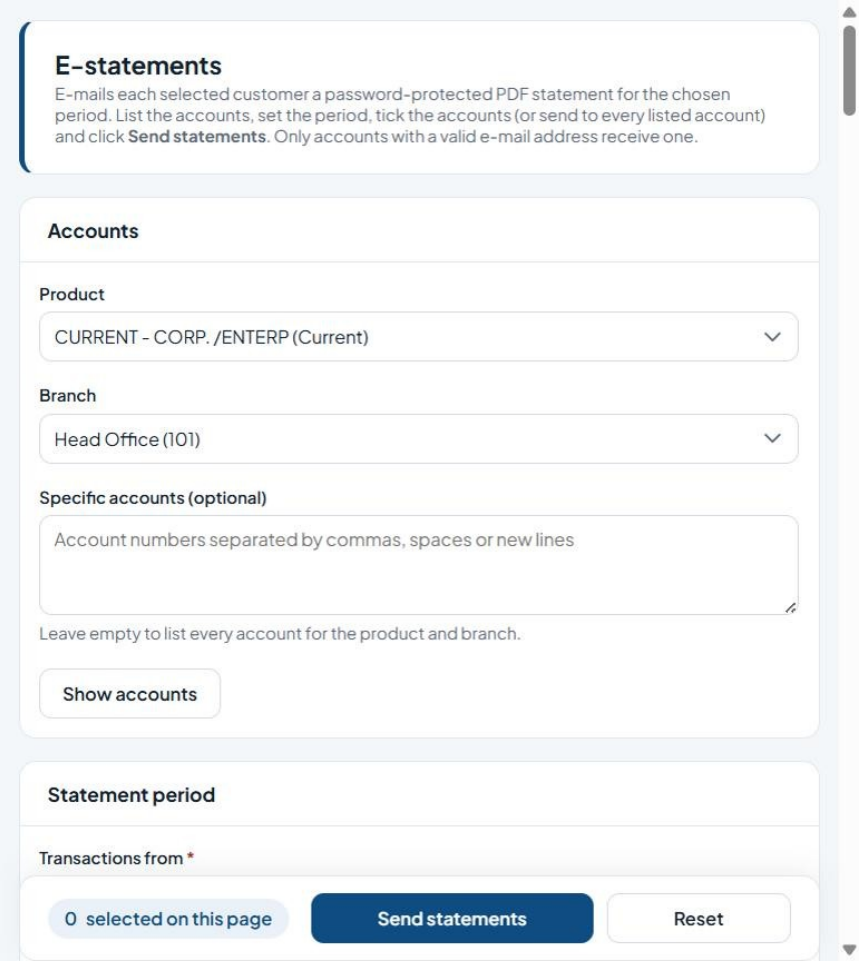

Figure 50: E-statements

Fields

Field	Type	Description
Product	Drop-down list	Account product to select customers by.
Branch	Drop-down list	The bank branch.
Specific accounts (optional)	Multi-line text	Enter the specific accounts (optional).
Transactions from *	Date picker	Required. Enter the transactions from.
Transactions to *	Date picker	Required. Enter the transactions to.
Statement type	Drop-down list	Choose the type from the list.
Send to every listed account (all pages)	Tick box	Tick to enable.

List columns: Account no, Account name, Product, Date of birth, Address, City, Book bal, Cleared bal, Transaction status, Account status.

Buttons and actions

Button	What it does
Show accounts	List the accounts for the chosen product and branch (or the pasted accounts).
Send statements	E-mail statements to the ticked (or all listed) accounts.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. Choose Product and Branch (or paste Specific accounts) and click Show accounts.
2. Under Statement period set Transactions from and Transactions to, or choose a Statement type (for example Monthly) to fill the dates.
3. Tick the accounts, or tick Send to every listed account.
4. Click Send statements. Only accounts with a valid e-mail address receive one; the result lists any that were skipped.

8.5 Account statements by e-mail

Menu path: Not on the menu: open eOperations/FrmBulkEmails.aspx (or add it to a role)

Purpose: Same as E-statements: e-mails password-protected PDF statements to the selected accounts.

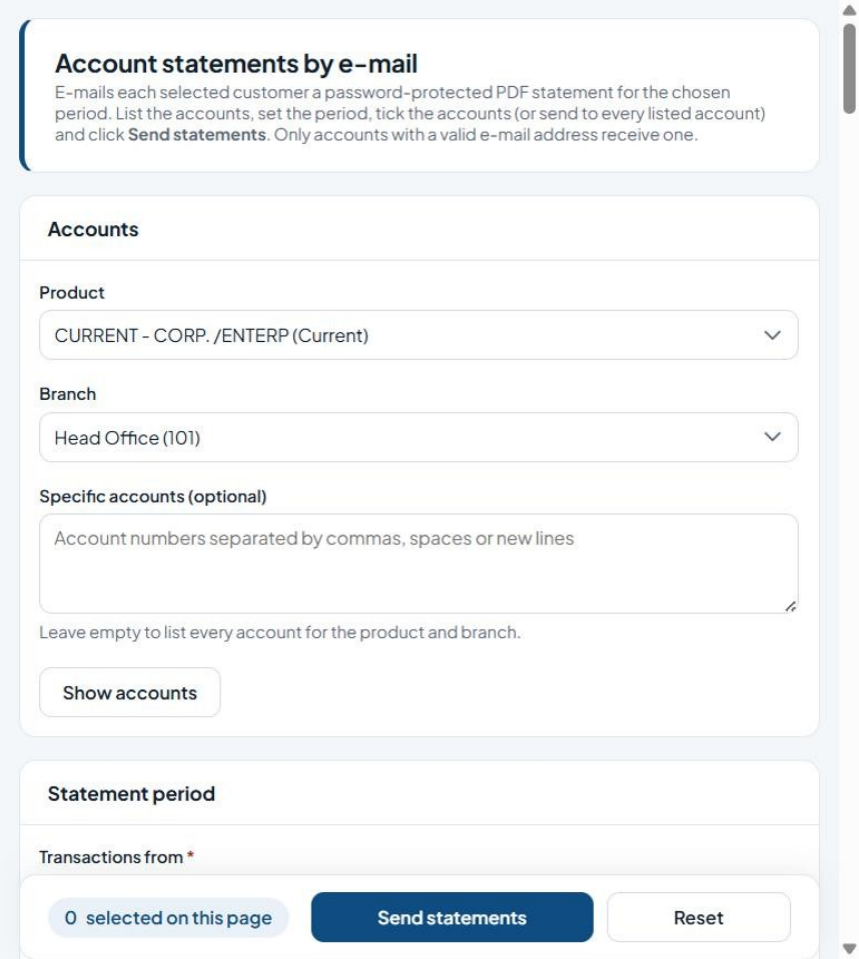

Figure 51: Account statements by e-mail

Fields

Field	Type	Description
Product	Drop-down list	Account product to select customers by.
Branch	Drop-down list	The bank branch.
Specific accounts (optional)	Multi-line text	Enter the specific accounts (optional).
Transactions from *	Date picker	Required. Enter the transactions from.
Transactions to *	Date picker	Required. Enter the transactions to.
Statement type	Drop-down list	Choose the type from the list.
Send to every listed account (all pages)	Tick box	Tick to enable.

List columns: Account no, Account name, Product, Date of birth, Address, City, Book bal, Cleared bal, Transaction status, Account status.

Buttons and actions

Button	What it does
Show accounts	List the accounts for the chosen product and branch (or the pasted accounts).
Send statements	E-mail statements to the ticked (or all listed) accounts.

Button	What it does
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. List the accounts with Show accounts.
2. Set the period (or a Statement type).
3. Tick the accounts (or all listed) and click Send statements.

8.6 Account statement notifications

Menu path: Not on the menu: open eOperations/FrmNstatements.aspx (or add it to a role)

Purpose: Statement notifications: e-mails password-protected PDF statements to the selected accounts.

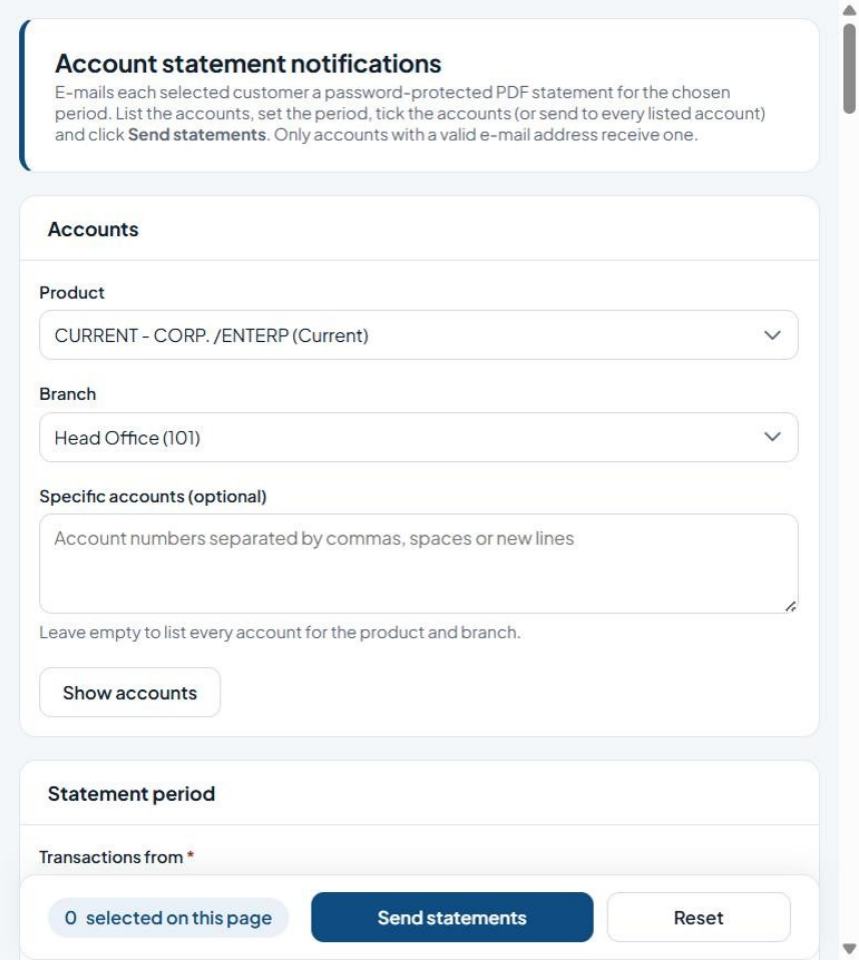

Figure 52: Account statement notifications

Fields

Field	Type	Description
Product	Drop-down list	Account product to select customers by.
Branch	Drop-down list	The bank branch.
Specific accounts (optional)	Multi-line text	Enter the specific accounts (optional).
Transactions from *	Date picker	Required. Enter the transactions from.

Field	Type	Description
Transactions to *	Date picker	Required. Enter the transactions to.
Statement type	Drop-down list	Choose the type from the list.
Send to every listed account (all pages)	Tick box	Tick to enable.

List columns: Account no, Account name, Product, Date of birth, Address, City, Book bal, Cleared bal, Transaction status, Account status.

Buttons and actions

Button	What it does
Show accounts	List the accounts for the chosen product and branch (or the pasted accounts).
Send statements	E-mail statements to the ticked (or all listed) accounts.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. List the accounts with Show accounts.
2. Set the period (or a Statement type).
3. Tick the accounts (or all listed) and click Send statements.

8.7 Statement e-mail scheduler

Menu path: Not on the menu: open eOperations/FrmShedBulkEmail.aspx (or add it to a role)

Purpose: Schedules statement e-mails to be sent later by the scheduler, once or for every period.

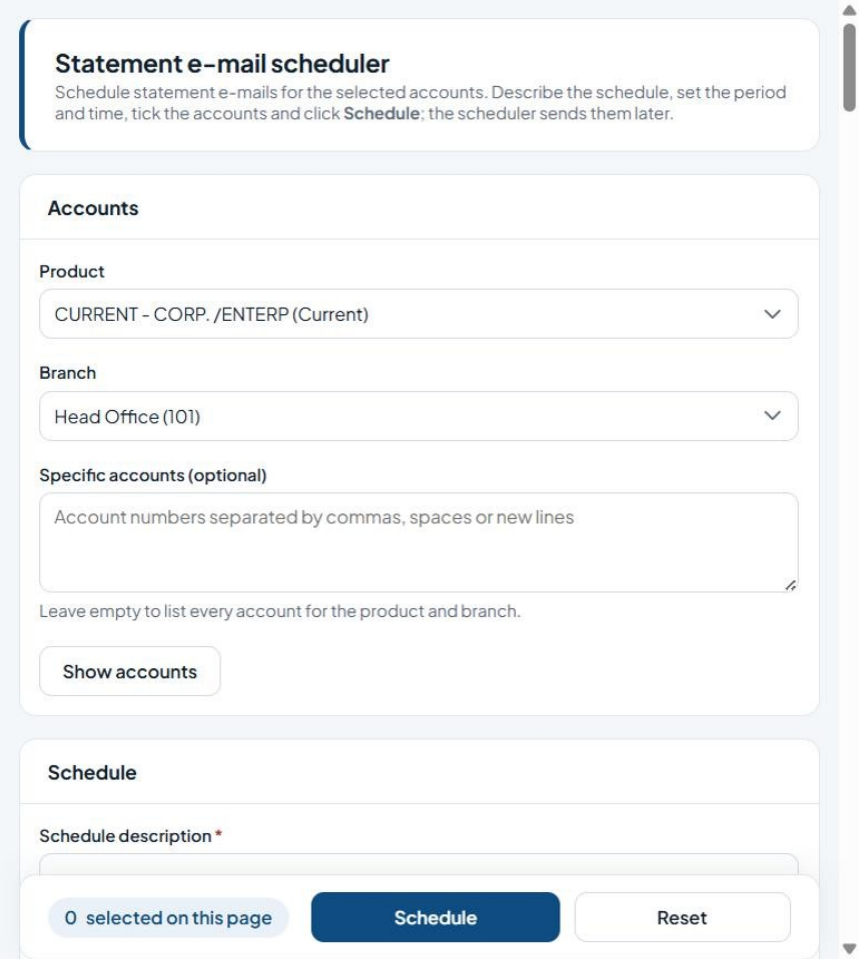

Figure 53: Statement e-mail scheduler

Fields

Field	Type	Description
Product	Drop-down list	Account product to select customers by.
Branch	Drop-down list	The bank branch.
Specific accounts (optional)	Multi-line text	Enter the specific accounts (optional).
Schedule description *	Text	Required. Free-text description.
Transactions from *	Date picker	Required. Enter the transactions from.
Transactions to *	Date picker	Required. Enter the transactions to.
Statement type	Drop-down list	Choose the type from the list.
Send at	Time picker	Enter the send at.
Recurrent (repeat for every period)	Tick box	Tick to enable.
Schedule every listed account (all pages)	Tick box	Tick to enable.

List columns: Account no, Account name, Product, Date of birth, Address, City, Book bal, Cleared bal, Transaction status, Account status.

Buttons and actions

Button	What it does
Show accounts	List the accounts for the chosen product and branch (or the pasted accounts).
Schedule	Save the schedule for the ticked (or all listed) accounts.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. List the accounts with Show accounts.
2. Under Schedule enter a Schedule description, the period (or Statement type) and the Send at time.
3. Tick Recurrent to repeat the schedule for every period.
4. Tick the accounts (or Schedule every listed account) and click Schedule.

9. eBranch Management

Branch-level requests for customers' cards and e-channels.

9.1 eChannels Requistion

Menu path: Menu > eBranch Management > eChannels Requistion

Purpose: Branch staff raise card and e-channel requests for customers and submit them for approval.

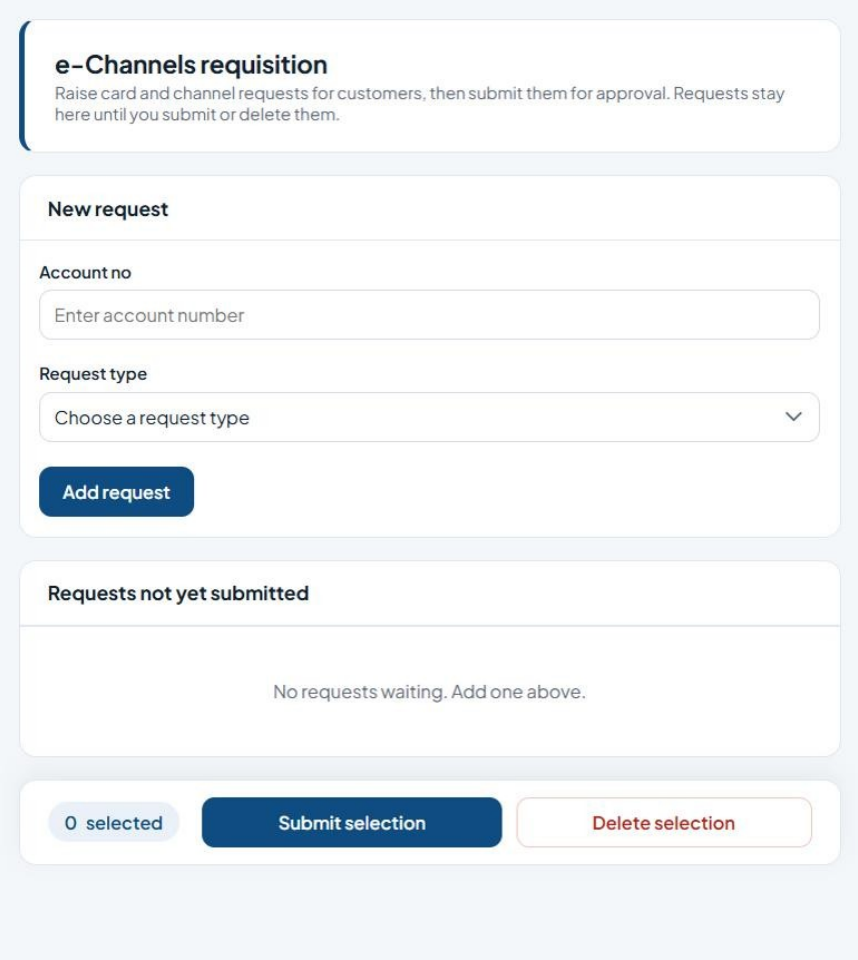

Figure 54: e-Channels requisition

Fields

Field	Type	Description
Account no	Text	The customer account number (validated against the core banking system).
Request type	Drop-down list	Choose the type from the list.
Select (per request)	Tick box	Tick to include the row(s) in the next action.

Buttons and actions

Button	What it does
Add request	Add the request to the pending list.

Button	What it does
Submit selection	Send the ticked items for approval.
Delete selection	Remove the ticked items.

How to use this screen

1. Enter the customer's Account no and choose the Request type.
2. Click Add request. It appears under Requests not yet submitted.
3. Tick the requests and click Submit selection to send them to Approval > Approve eChannels Request, or Delete selection to remove them.

> **Note:** Raise card and channel requests for customers, then submit them for approval. Requests stay here until you submit or delete them.

10. eChannels Management

Activation of new customer e-channel subscriptions.

10.1 eChannels Activation

Menu path: Menu > eChannels Management > eChannels Activation

Purpose: Activates new e-subscriptions (customer self-registrations) waiting for activation.

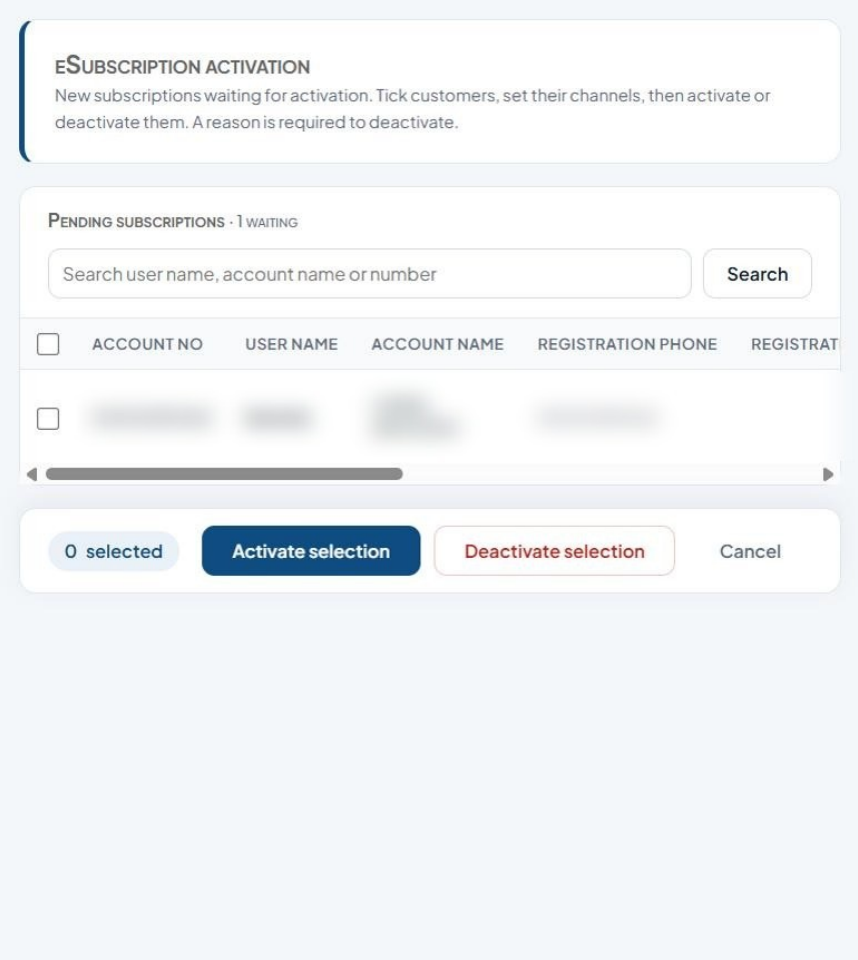

Figure 55: eSubscription activation

Fields

Field	Type	Description
Search user name, account name or number	Text	Text to search for.
Select all / Select (per customer)	Tick box	Tick to include the row(s) in the next action.
Mobile / iPortal (per customer)	Tick box	Tick to enable.
Reason (needed to deactivate)	Multi-line text	Explanation for the action; required when rejecting, disapproving, deactivating or clearing settings.

List columns: Account no, User name, Account name, Registration phone, Registration address, Date of birth, Gender, Mobile, Iportal, Reason.

Buttons and actions

Button	What it does
Search	Run the search.
Activate selection	Activate the ticked items.
Deactivate selection	Deactivate the ticked customers (reason required).
Cancel	Discard and clear the selection.

How to use this screen

1. Search by user name, account name or number.
2. Tick the customer(s) and set their channels (Mobile, iPortal).
3. Click Activate selection, or enter a reason and click Deactivate selection.

11. Revenue Collection

Lagos State revenue collection by tellers.

11.1 Pay Lagos State Bills

Menu path: Menu > Revenue Collection > Pay Lagos State Bills

Purpose: Lets tellers pay Lagos State bills that have already been assessed (billed), through the Lagos State revenue collection service.

> **Note:** The page could not be opened in the test environment: the Lagos State revenue service it connects to (98.71.64.150) did not respond. It requires a live connection to the revenue collection service. A screenshot and field list will be added once the service is reachable.

11.2 Generate Lagos State Bills

Menu path: Menu > Revenue Collection > Generate Lagos State Bills

Purpose: Lets tellers generate a Lagos State bill (unbilled payment) for a taxpayer and collect it.

> **Note:** The page could not be opened in the test environment: the Lagos State revenue service it connects to (98.71.64.150) did not respond. It requires a live connection to the revenue collection service. A screenshot and field list will be added once the service is reachable.

12. Direct Debit

NIBSS Direct Debit (NDD): billers, biller products, customer e-mandates and mandate status.

12.1 Create Biller Product (NDD)

Menu path: Menu > Direct Debit > Create Biller Product

Purpose: Sets up a customer biller together with its product title for NIBSS Direct Debit. New records go for approval.

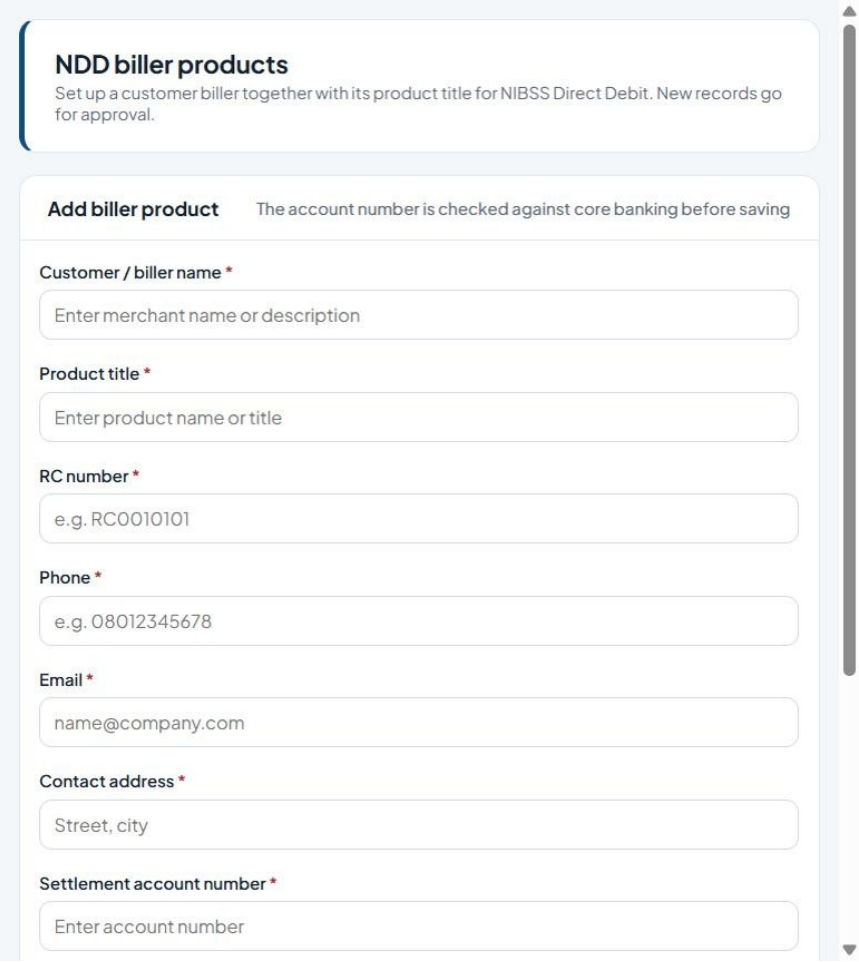

Figure 56: NDD biller products

Fields

Field	Type	Description
Customer / biller name *	Text	Required. Enter the customer / biller name.
Product title *	Text	Required. Enter the product title.
RC number *	Text	Required. Enter the RC number.
Phone *	Phone number	Required. Contact phone number.
Email *	E-mail address	Required. Contact e-mail address.
Contact address *	Text	Required. Enter the contact address.
Settlement account number *	Text	Required. Enter the settlement account number.

List columns: Customer / biller, Product, Rc number, Phone, Email, Address, Account no, Account name, Biller id, Status.

Buttons and actions

Button	What it does
Add biller product	Save the new biller product (the account is checked first).
Clear	Clear the form without saving.

How to use this screen

1. Enter the Customer / biller name, Product title, RC number, Phone, Email, Contact address and Settlement account number.
2. Click Add biller product. The account number is checked against core banking before saving.
3. The record appears in the Biller products list with its biller ID and status.

12.2 Create Biller (NDD) / Create Product (NDD)

Menu path: Menu > Direct Debit > Create Biller

Purpose: Sets up the merchants (billers) that collect payments through NIBSS Direct Debit. New billers go for approval; once approved, use Products to create the biller's NIBSS products.

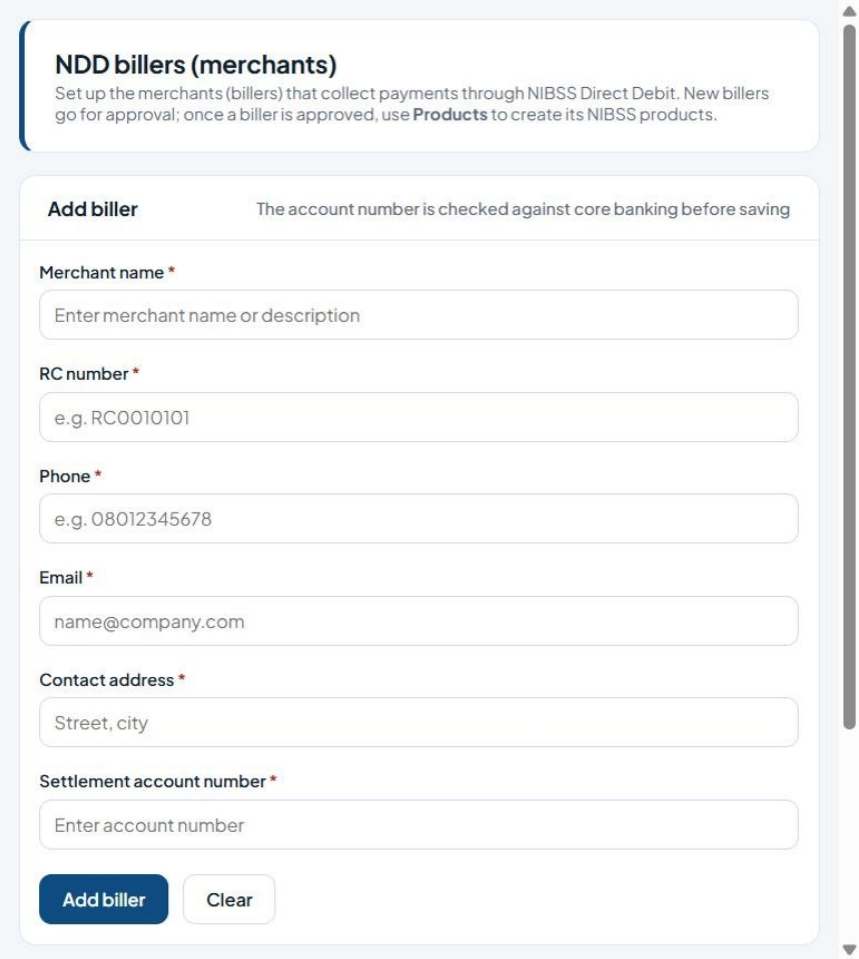

Figure 57: NDD billers (merchants)

Fields

Field	Type	Description
Merchant name *	Text	Required. Enter the merchant name.
RC number *	Text	Required. Enter the RC number.
Phone *	Phone number	Required. Contact phone number.
Email *	E-mail address	Required. Contact e-mail address.
Contact address *	Text	Required. Enter the contact address.
Settlement account number *	Text	Required. Enter the settlement account number.

List columns: Merchant, Rc number, Phone, Email, Address, Account no, Account name, Biller id, Status.

Buttons and actions

Button	What it does
Add biller	Save the new biller.
Clear	Clear the form without saving.
Products	Open the products of an approved biller.

How to use this screen

1. Under Add biller enter the Merchant name, RC number, Phone, Email, Contact address and Settlement account number (all required).
2. Click Add biller. The account number is checked against core banking before saving; the biller appears in the Billers list with its status.
3. When a biller is approved, click Products on its row to set up its products.
4. Clear empties the form.

12.3 eMandate Status Query (NDD)

Menu path: Menu > Direct Debit > eMandate Status Query

Purpose: Lists approved e-mandates, checks their status with NIBSS and sends mandates the bank has approved for recovery. It can also run automatically on a schedule.

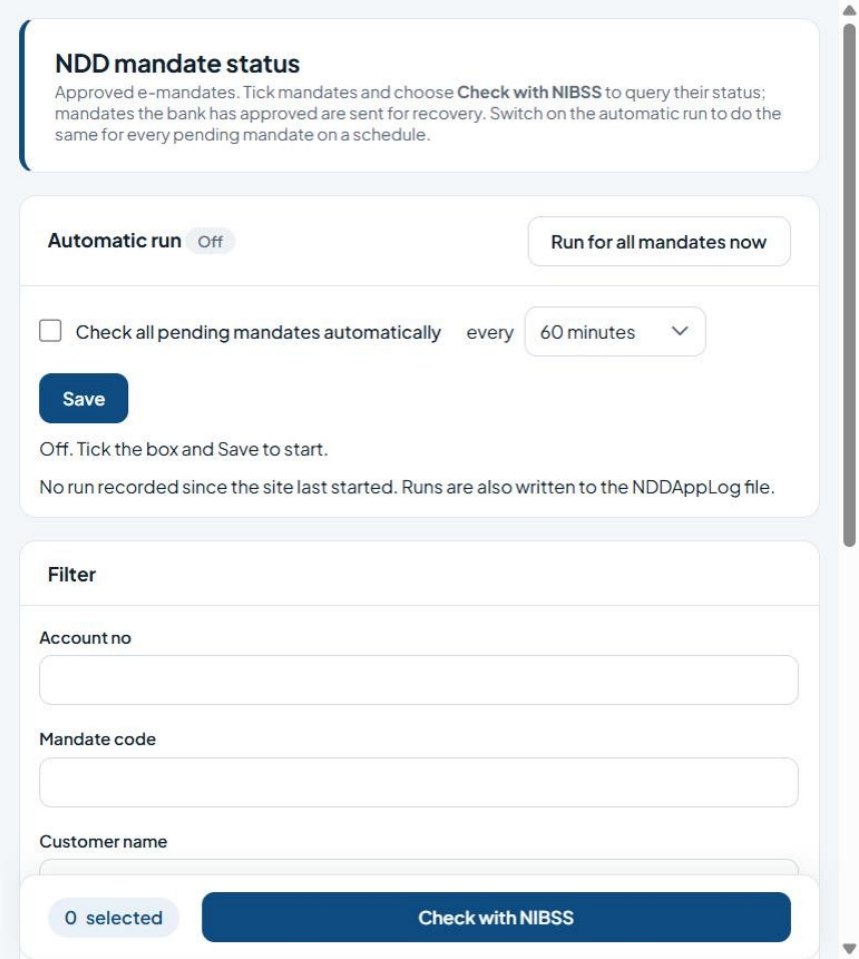

Figure 58: NDD mandate status

Fields

Field	Type	Description
Check all pending mandates automatically	Tick box	Tick to include the row(s) in the next action.
Every (minutes)	Drop-down list	Choose a value from the list.
Account no	Text	The customer account number (validated against the core banking system).
Mandate code	Text	Unique code/identifier.
Customer name	Text	Enter the customer name.
Date from	Date picker	Start (or issue) date.
Date to	Date picker	End (or expiry) date.
Narration contains	Text	Free-text description.

List columns: Mandate code, Account no, Customer name, Amount, Narration, Created, Sent, Next due, Status.

Buttons and actions

Button	What it does
Run for all mandates now	Check every pending mandate with NIBSS immediately.

Button	What it does
Save	Save the changes.
Apply filter	Show only mandates matching the filter.
Clear	Clear the form without saving.
Check with NIBSS	Query the status of the ticked mandates with NIBSS.

How to use this screen

1. Use the Filter (account no, mandate code, customer name, dates, narration) and click Apply filter.
2. Tick mandates and click Check with NIBSS to query them now.
3. To automate, tick Check all pending mandates automatically, choose how often (every ...), and click Save. The status badge shows On or Off.
4. Run for all mandates now checks every pending mandate at once. Each run is written to the NDDAppLog file.

12.4 Create eMandate (NDD)

Menu path: Menu > Direct Debit > Create eMandate

Purpose: Captures a customer's direct-debit mandate: who pays, from which bank account, how much and for how long. New and edited mandates go to Approval > NDD e-mandate approval; approved mandates cannot be changed or deleted.

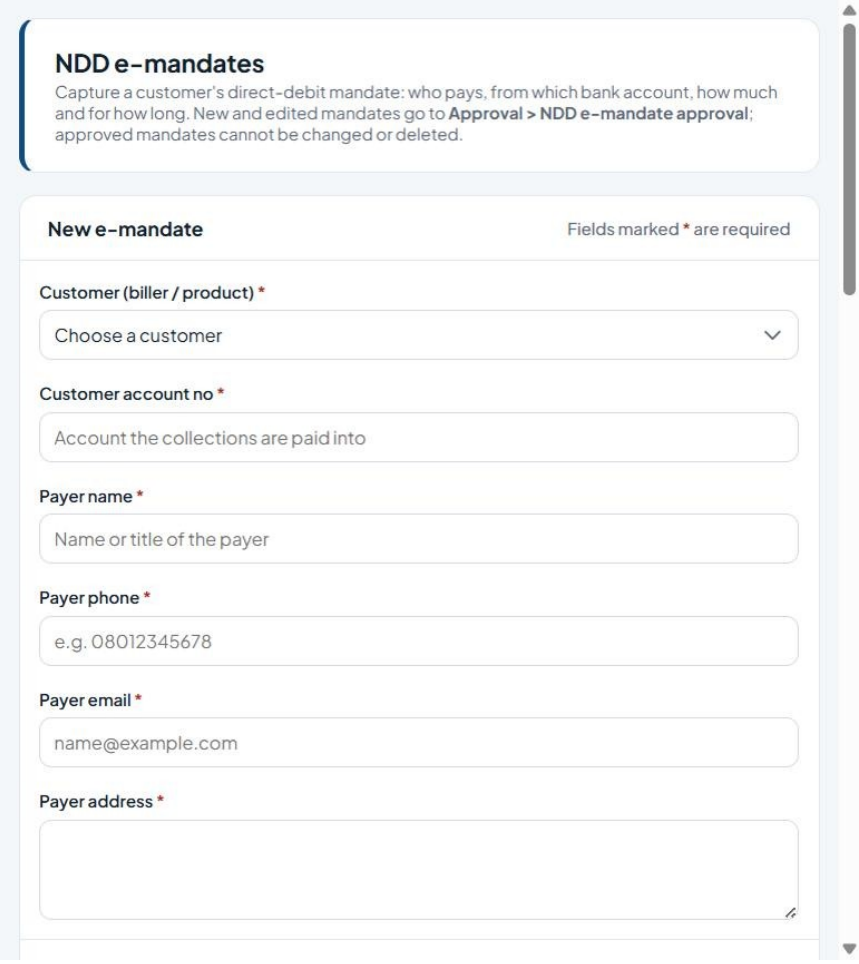

Figure 59: NDD e-mandates

Fields

Field	Type	Description
Customer (biller / product) *	Drop-down list	Required. Choose a value from the list.
Customer account no *	Text	Required. The customer account number (validated against the core banking system).
Payer name *	Text	Required. Enter the payer name.
Payer phone *	Phone number	Required. Contact phone number.
Payer email *	E-mail address	Required. Contact e-mail address.
Payer address *	Multi-line text	Required. Enter the payer address.
Bank *	Drop-down list	Required. Choose a value from the list.
Payer account no *	Text	Required. Enter the payer account no.
Amount (NGN) *	Number	Required. Amount in Naira (NGN).
Frequency (months) *	Number	Required. Enter the frequency (months).
Fixed amount mandate	Tick box	Amount in Naira (NGN).
Start date *	Date picker	Required. Start (or issue) date.
End date	Read-only	End (or expiry) date.
Narration *	Multi-line text	Required. Free-text description.

List columns: Payer, Payer account, Payer account name, Bank, Customer account, Amount, Months, Start, End, Fixed, Narration, Status.

Buttons and actions

Button	What it does
Save mandate	Save the e-mandate and send it for approval.
Clear	Clear the form without saving.
Edit	Edit the row.
Delete	Delete the record (cannot be undone).

How to use this screen

1. Choose the Customer (biller / product) and enter the Customer account no that collections are paid into.
2. Enter the Payer name, phone, e-mail and address.
3. Under Payer's bank account choose the Bank and enter the Payer account no.
4. Under Amount and period enter the Amount (NGN), Frequency (months) and Start date; the End date is worked out for you. Tick Fixed amount mandate if the amount never changes.
5. Enter the Narration and click Save mandate.
6. Use Edit or Delete in the E-mandates list for mandates that are not yet approved.

12.5 Bulk Status Query Push (NDD)

Menu path: Menu > Direct Debit > Bulk Status Query Push

Purpose: Checks every approved e-mandate that is waiting (status 3) with NIBSS in one run. Mandates NIBSS reports as Bank Approved are sent for recovery straight away.

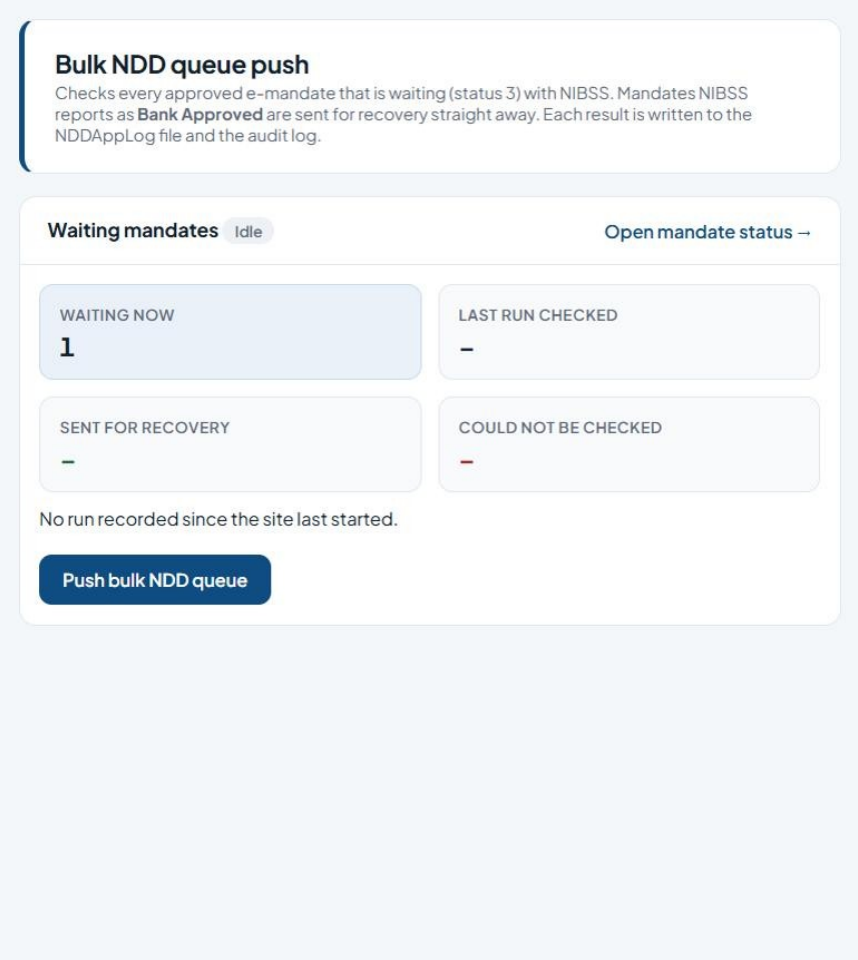

Figure 60: Bulk NDD queue push

Buttons and actions

Button	What it does
Push bulk NDD queue	Check every waiting mandate with NIBSS now.
Open mandate status	Open the NDD mandate status screen.

How to use this screen

1. Check Waiting now for the number of mandates in the queue.
2. Click Push bulk NDD queue.
3. When the run finishes, the cards show how many were checked, sent for recovery and could not be checked. Each result is written to the NDDAppLog file and the audit log.
4. Click Open mandate status to see individual mandates.

13. eOperations

Funds transfers, bulk transfers, external journal uploads and transaction reconciliation.

13.1 Transaction Reconciliation

Menu path: Menu > eOperations > Transaction Reconciliation

Purpose: Reconciles transaction batches: select transactions until the reconciliation difference is zero, then post.

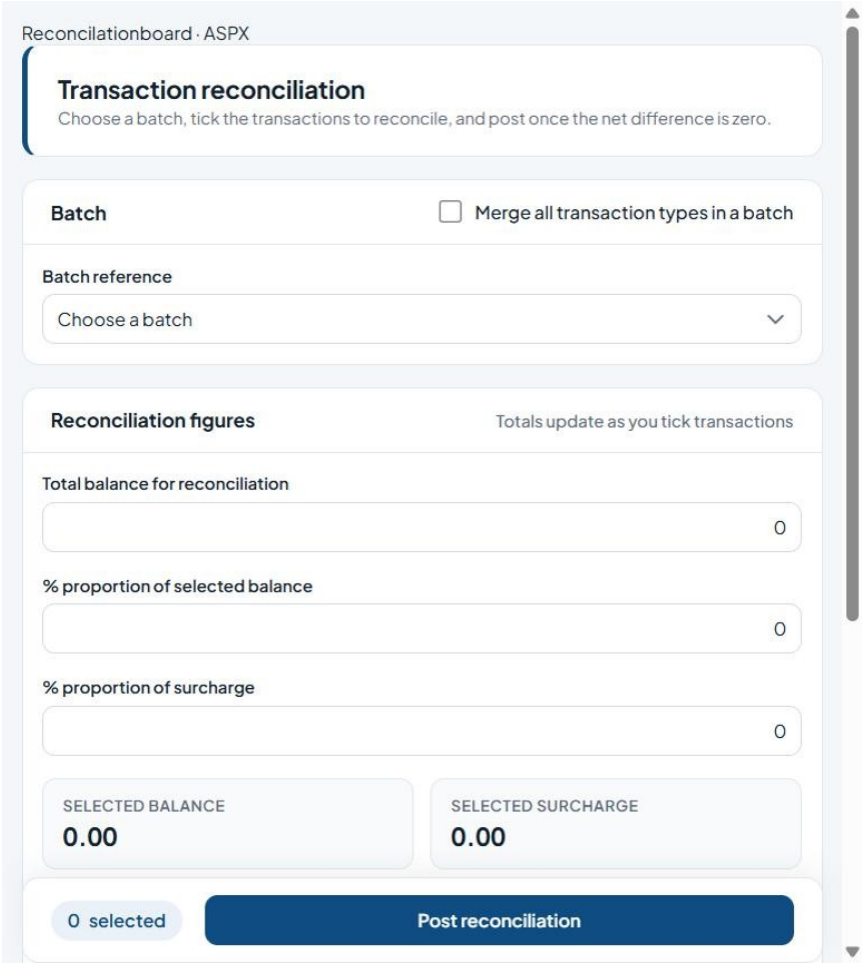

Figure 61: Transaction reconciliation

Fields

Field	Type	Description
Merge all transaction types in a batch	Tick box	Choose the type from the list.
Batch reference	Drop-down list	The batch to work on.
Total balance for reconciliation	Number	Enter the total balance for reconciliation.
% proportion of selected balance	Number	Enter the % proportion of selected balance.
% proportion of surcharge	Number	Enter the % proportion of surcharge.
Selected balance / Selected surcharge / Fee-only surcharge /	Read-only	Tick to include the row(s) in the next action.

Field	Type	Description
Difference		
Select (per transaction)	Tick box	Tick to include the row(s) in the next action.

Buttons and actions

Button	What it does
Post reconciliation	Post the reconciliation (only when the difference is zero).

How to use this screen

1. Choose the Batch reference. Tick Merge all transaction types in a batch if required.
2. Enter the Total balance for reconciliation and the % proportions of balance and surcharge.
3. Tick transactions in the list. Selected balance, selected surcharge, fee-only surcharge and difference update as you tick.
4. When the difference is zero, click Post reconciliation.

> **Note:** Choose a batch, tick the transactions to reconcile; totals update as you tick. Post once the net difference is zero.

13.2 Single FundsTransfer

Menu path: Menu > eOperations > Single FundsTransfer

Purpose: Makes a single funds transfer to another bank through NAPS.

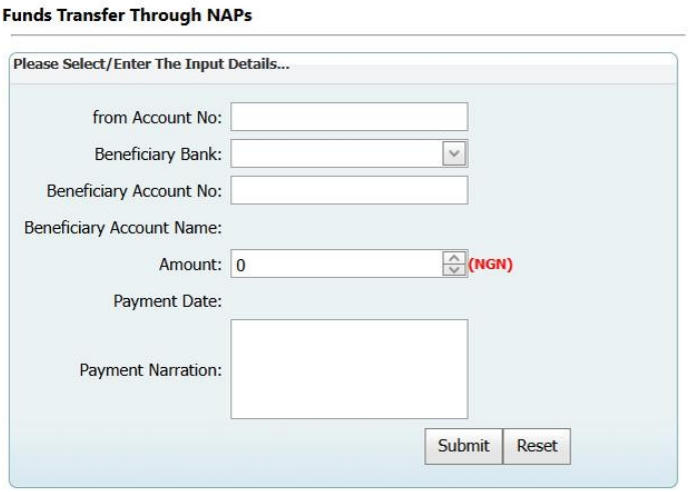

Figure 62: Funds Transfer Through NAPs

Fields

Field	Type	Description
From Account No	Text	The customer account number (validated against the core banking system).
Beneficiary Bank	Drop-down list	Choose a value from the list.
Beneficiary Account No	Text	Enter the beneficiary Account No.
Beneficiary Account Name	Read-only	Filled in automatically.
Amount (NGN)	Number	Amount in Naira (NGN).
Payment Date	Read-only	Filled in automatically.
Payment Narration	Multi-line text	Free-text description.

Buttons and actions

Button	What it does
Submit	Submit the form.
Reset	Clear the form, or apply the chosen reset to the ticked users.

How to use this screen

1. Enter the From Account No.
2. Choose the Beneficiary Bank and enter the Beneficiary Account No. The account name is looked up and shown.
3. Enter the Amount (NGN) and the Payment Narration.
4. Click Submit. Reset clears the form.

13.3 Bulk FundsTransfer

Menu path: Menu > eOperations > Bulk FundsTransfer

Purpose: Uploads a bulk funds-transfer file as a batch for approval.

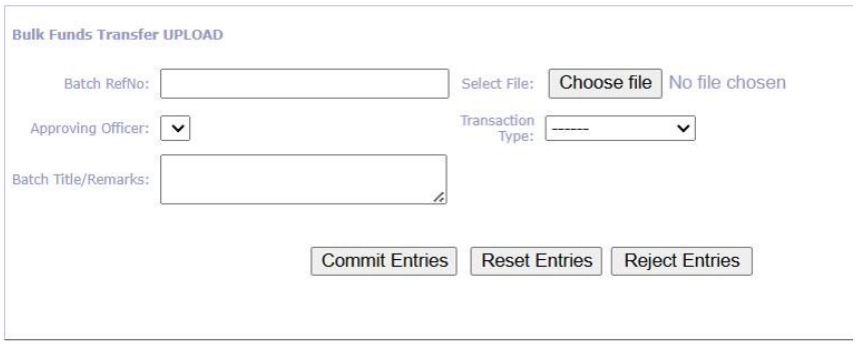

Figure 63: Bulk Funds Transfer Upload

Fields

Field	Type	Description
Batch RefNo	Text	The batch to work on.
Select File	File picker	Tick to include the row(s) in the next action.
Approving Officer	Drop-down list	The officer who will approve the upload.
Transaction Type	Drop-down list	Choose the type from the list.
Batch Title/Remarks	Multi-line text	Free-text description.

Buttons and actions

Button	What it does
Import Entries	Read the chosen bulk file.
Commit Entries	Submit the batch for approval.
Reset Entries	Clear the imported entries.
Reject Entries	Discard the imported batch.

How to use this screen

1. Enter the Batch RefNo and Batch Title/Remarks.
2. Choose the Transaction Type and the Approving Officer.

3. Click Choose file and select the bulk file, then import it.
4. Review the entries and click Commit Entries. Use Reset Entries to start again or Reject Entries to discard.
5. The batch is approved under Approval > Approve Bulk Payments.

Note: Committed batches are approved under Approval > Approve Bulk Payments.

13.4 External journal entries upload

Menu path: Not on the menu: open eOperations/TransImportsExt.aspx (or add it to a role)

Purpose: Uploads external journal entries as a batch for approval.

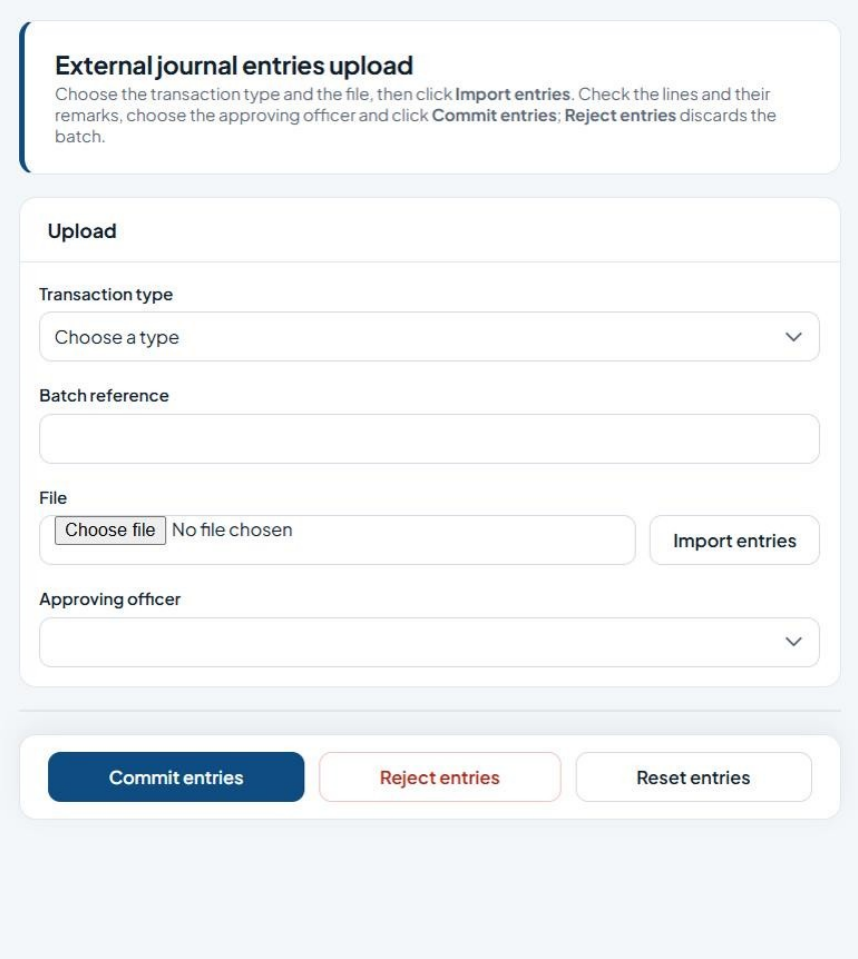

Figure 64: External journal entries upload

Fields

Field	Type	Description
Transaction type	Drop-down list	Choose the type from the list.
Batch reference	Text	The batch to work on.
File	File picker	Enter the file.
Approving officer	Drop-down list	The officer who will approve the upload.

Buttons and actions

Button	What it does
Import entries	Read the chosen file.
Commit entries	Submit the batch for approval.
Reject entries	Discard the imported batch.
Reset entries	Clear the imported entries.

How to use this screen

1. Choose the Transaction type and enter the Batch reference.
2. Choose the File and click Import entries. Check the imported lines and their remarks.
3. Choose the Approving officer and click Commit entries.
4. Reject entries discards the imported batch; Reset entries clears the page.

13.5 Reconciliation Maint.

Menu path: Menu > eOperations > Reconciliation Maint.

Purpose: Removes (drops) transactions from a reconciliation batch.

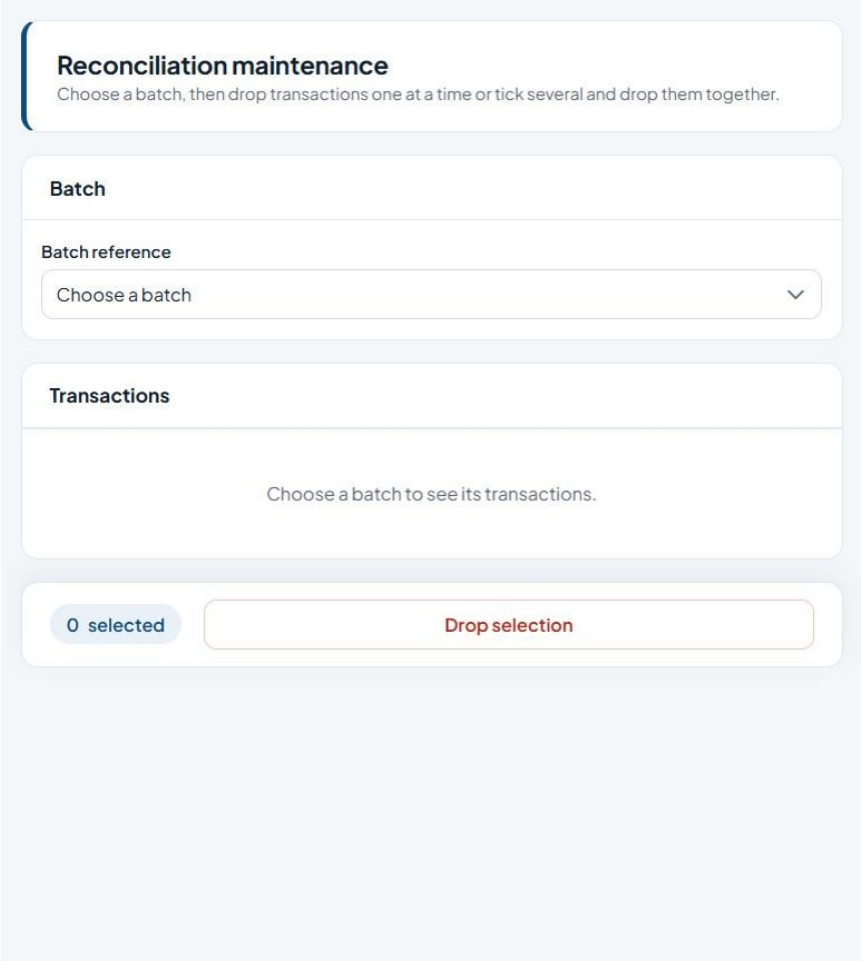

Figure 65: Reconciliation maintenance

Fields

Field	Type	Description
Batch reference	Drop-down list	The batch to work on.
Select (per transaction)	Tick box	Tick to include the row(s) in the next action.

Buttons and actions

Button	What it does
Drop	Remove that transaction from the batch.
Drop selection	Remove the ticked items (you are asked to confirm).

How to use this screen

1. Choose the Batch reference to list its transactions.
2. Drop transactions one at a time, or tick several and click Drop selection.

Note: Choose a batch, then drop transactions one at a time or tick several and drop them together.

Appendix A. Common controls

A.1 Data grids

- Tick the box at the start of a row to select it; the box in the header row ticks every row on the page.
- Where shown, tick the "every page" / "all listed accounts" option to include rows on all pages, not just the one on screen.
- The bar at the bottom of the screen shows how many rows are ticked and holds the main buttons.
- Use the page numbers under the list to move between pages.
- Actions that change or remove data ask you to confirm first. The result appears as a green or red message at the top; rows that failed are listed with the reason.
- Some older screens still use the previous grid, where you can drag a column header to group rows and click Create Filter to filter.

A.2 Report viewer toolbar

Control	Use
First / Previous / Next / Last and page box	Move between report pages.
Refresh	Re-run the report.
Back	Return to the parent report (drill-through).
Zoom (100%)	Change the report size.
Save (disk) menu	Export the report, e.g. to PDF, Excel or Word.

A.3 Signing out and security

- Always click Log out when you finish, especially on shared computers.
- Never share your user ID or password. If your account is locked, ask an administrator to use Administration > Reset User Profile.
- You only see the menu items allowed by your role (Administration > Roles & Permissions).

Appendix B. Menu index

Every menu item, the screen it opens and its page address (relative to the site root).

Module	Menu item	Page

eOperations	Reconciliation Maint.	/eOperations/ ReconMaintenance.aspx

Appendix C. About this edition

- Version 2.0 (November 2026) replaces version 1.0. It covers the new theme, the redesigned sign-in and home pages, and the rebuilt Card Management, Broadcast, Direct Debit and eOperations upload screens (see section 1.6).
- The screenshots were taken from the application running locally on branch ebizWorkingBr (http://localhost:8080), signed in as a user with full menu access.
- Customer names, account numbers, phone numbers and e-mail addresses are blurred in the screenshots for privacy.
- Revenue Collection (Pay / Generate Lagos State Bills) could not be opened because the external revenue service was unreachable from the test machine; those sections describe the purpose only.
- Screens were viewed only: no records were saved, submitted or approved while this manual was prepared. Button descriptions are based on the on-screen labels and instructions.
- Some menu labels point to the same screen (eChannels Reports and eChannels By Branch Reports; Cards Confirmation and Cards Maintenance; Create Biller and Create Product (NDD)). The second "Approve QRCode Information" item opens the NDD e-mandate approval screen.
